

MILWAUKEE & BUTLER

CARDING BOOK

1976

GENERAL INSTRUCTIONS AND INFORMATION

Keep in mind that we, the carrier, are responsible to all industries, on line or off line to move their product in the most safe, efficient and cheapest manner possible. Through the teamwork of the Operating and Non-Operating Departments, we will maintain an efficient operation.

Representing the Non-Operating Department, the importance of accurate I.D.P. reporting and record keeping is a necessary requirement. The following will be of some assistance in accomplishing our goal.

The General Regulations and Safety Rules, reissued effective June 1, 1967, govern "YOU" while employed with the Chicago And North Western Transportation Company. We are all required to be familiar with these rules in protecting our own safety and regulating our behavior as an employee of the C. & N. W. Trans. Co.

While in yards, checking trains or carding cars, be careful of moving cars. Look in both directions before crossing tracks.

In preparing car cards the revenue or car movement waybill must be reviewed in order to protect "weighing", "stop offs" or other pertinent information. Be familiar with "Special Notes" or "Pre-arrival Notices". Do not contribute to irate customers or possible error moves from connecting lines.

Car cards must be stapled on box car doors and as near the center of gondolas, hoppers and flat cars, as possible. Duplicate carding must be made out and affixed to all cars moving in interchange to the C.M.St.P.&P. or Soo Line. Be certain cars moving as empty are absolutely empty prior to movement from the yard. Keep in mind the complete unloading program which requires industry to completely unload all received carloads. This includes all dunnage, blocking, banding, bracing, etc., but does not include grain doors.

Carloads received "In Bond", if billed to be released at Milwaukee, card Collector of Customs, Fifth Ward Team Track, and send waybill to Freight Office. If billed to a Butler industry, car and waybill are to go to Butler. Carloads billed to the "Order Of" or "Notify", card "HOLD" with the understanding that the car will be held in the serving yard for the industry. The car card must clearly state, "Order of industry" as well as "Notify industry". The contents of the car are not to be made available to consignee until released by Agent's office. Keep in mind, the requirements of the carload movement or revenue waybill govern. When in doubt consult with the Chief Clerk on duty. When unable to reach a decision on a particular carload, consult the Agent's office, unless after hours, then card the car HOLD and request information, in writing, from the Freight Office.

In checking inbound and outbound trains, the car initial and number must be recorded and checked with that of the waybill.

NEVER change a car initial or number on a waybill unless authority that has been properly documented is received from the Agent's office. Carloads that you are unable to properly and promptly identify are to be carded "HOLD" and Agent's office notified.

Car seals from both inbound and outbound trains are to be inspected. When a loaded box is found to be without car seals a notation is to be made upon the manifest (wheel report). You will apply C.&N.W. car seals and record their application.

When in receipt of a car without a waybill, card the car "HOLD" and notify the Agent's office. The manifest (wheel report) is to be noted accordingly. Any cars loaded or empty arriving the Milwaukee or Butler Terminal without waybill or I.D.P. information, the car initial and number and load or empty are to be recorded on the manifest, and must be included when transmitting the I.D.P. deck on that particular train.

Turnover, reconsigning, or other instructions necessitating a change in the original waybill are to be directed to the Agent's office where these requests will be properly documented, recorded and fulfilled.

Card "HOLD" all carloads consigned to industry, care of team track delivery, unless a specific team track is named. This carrier will not switch a carload to a connecting line team track unless the car movement or revenue waybill clearly states C.M.St.P.&P. Dely. or Soo Line Dely.

When checking inbound and outbound trains always make it a point to inspect for possible load shift or damage. When certain of either, the Yardmaster or Trainmaster is to be promptly notified and the necessary information forwarded to the Freight Claim Department in the Agent's office.

Clerical forces at Mitchell Yard will prepare a memo waybill on carloads received in reciprocal switch for industry in the Butler area. All information from interchange will be shown: Industry name, care of party, and address.

Every effort will be made to insure the efficient handling and placement of all cars.

SPECIAL CARDING INSTRUCTIONS

When writing up carding for carloads subject to pilferage simply write in LOAD instead of tires, appliances, brandy, canned goods, meat or any other description that will contribute to vandalism or theft.

In-Bond shipments arriving Milwaukee, card to the Collector of Customs - 5th Ward (Florida Street) Team Track.

All perishable shipments billed for export through Jones Island, card - 5th Ward (Florida Street) Team Track. Waybill must be sent to Foreman at Florida Street.

Carloads received in interchange for industry taking team track delivery. When accompanied with waybill and waybill denotes specific team track or carding book denotes specific team track, then card Direct. When without waybill, card HOLD and notify reconsigning clerk, Milwaukee Freight Office.

All company material is to be carded as billed. When the waybill is not specific, the named consignee will be contacted for the necessary placement information.

GRAIN

Car movement or revenue waybills transporting grain into this terminal are to be inspected for the following notations: "WAIVE INSPECTION" or "SET DIRECT". When either notation is on the waybill, card direct to industry unless a "SPECIAL NOTE" from the reconsigning desk declares otherwise.

When the notations referred to above are not shown on the waybill, the load will be considered "TRACK GRAIN" and is to be carded to the Inspection Track.

WEIGHING INSTRUCTIONS

The necessity of furnishing an accurate track scale weight is a requirement necessary to the C&NW in assessing freight charges for services rendered, in reducing freight claims, preventing the transporting of overloads and our responsibility in maintaining good customer relations.

When a load arrives this terminal and the car movement or revenue waybill requests railroad weights and no weights are shown on the waybill, the load must be weighed. If the shipment originated on a carrier other than the C&NW, the Rate Department in the Milwaukee Freight Office will assess a charge of \$25.00 against the origin carrier per A.A.R. Car Service Rule 11. Keep in mind, the C&NW must also pay \$25.00 to the carrier performing the weighing on carloads or empties originating from this terminal that require origin track scale weights and are forwarded without weighing, or someone fails to apply the sticker portion of the scale ticket to the outbound waybill.

Necessary steps to be taken in being assured that you are doing your part in furnishing as accurate a scale weight as possible.

Weighing On Automatic Weigh In Motion Scales.

Upon receiving instructions from the Yardmaster that they will be weighing cars, the scale is to be calibrated in order to insure accurate weights.

Cars that are carded WEIGH are normally switched to one track. A track check is taken prior to weighing at which time it is necessary to record car initial and number, the tare weight and date, capacity, shipper or origin, commodity and outbound carding or industry. This track check should reflect the direction taken in checking East to West or West to East. Should the yardmaster instruct the switch foreman to weigh going East to West, the scale ticket information recorded from track check must be applied accordingly.

Should you experience an "F" or an "R" punched in the scale ticket, next to the punched in gross weight, the Yardmaster is to be informed immediately requesting reweigh, at which time he will instruct the switch foreman to reweigh going in the opposite direction, West to East. Prior to the second weigh, the clerk must re-calibrate the scale and promptly inform the Yardmaster when ready to weigh.

Proper care must be exercised in applying the correct car number and track check information to the proper scale ticket.

When experiencing problems with this scale, promptly notify the Communications Department. Recommended gap between live rail and dead rail is $\frac{1}{4}$ inch.

Weighing At National Avenue or Fifth Ward Scales.

The live rails of the scale must be inspected, bearing in mind that the gaps between the live rail and the dead rail should not be less than 1/4 inch or more than 3/4 inch. The scale platform must be kept clean. The beam of the scale, which records the weight, must be balanced prior to ordering cars on the scale and weighing.

The scale ticket must be complete in every detail, exercising care in entering car initial and number, tare weight and capacity. When recording the gross weight be certain the handle is compressed sufficiently to clearly imprint upon the scale ticket. Trouble with this scale is to be promptly reported to the B. & B. Department at Butler.

The following are gross weights which the various capacity cars are limited to. (Gross weight is the combined weight of car and lading.) The stencilled load limit on all cars must be used in preference to the following:

200 Capacity Cars	Maximum Loads	263,000 Gross Weight
154 " "	" "	220,000 " "
110 " "	" "	177,000 " "
80 " "	" "	142,000 " "
60 " "	" "	103,000 " "

When an overload car has been determined from either the load limit of car or by using the above chart, the following will govern: The load will be carded "HOLD". The load is not to be forwarded in C&NW line haul movement or switch move.

The scale ticket is to be noted "OVERLOAD" and mailed to the Weight Desk in the Milwaukee freight office. Upon receiving the scale ticket marked "OVERLOAD" the Weight Clerk will contact the industry responsible for the overload, determining -

1. Industry orders load returned to reduce.
2. Industry requests car placed on Rip at Mitchell Yard, and they would come over to reduce load.

INSTRUCTIONS ON INTERCHANGE

The proper - accurate documentation of car interchange with a connecting line is of utmost importance. In Milwaukee the C&NW has two (2) validated interchange connections involving the documentation of interchange as follows:

C&NW Mitchell Yard with the C.M.St.P.&P. or Soo Line via the C.M.St.P.&P. Airline Yard.

C&NW with the C.&O. or G.T.W. at Jones Island.

Interchange documents through these validated interchange points will be numbered. All industry interchange will be made as supplements to Mitchell Yard.

On the interchange of cars received or forwarded through validated interchange points, the yard date-time stamp will be applied to the back of each waybill, being certain the stamp indicates the correct date and time the waybills are received.

In order to properly protect PER DIEM the following will govern at Mitchell Yard:

When the C.M.St.P.&P. delivers, they must arrive by 10:30 P.M. in order for the C.M.St.P.&P. switch to return with the C&NW delivery to the Airline prior to midnight. When the C.M.St.P.&P. does not arrive Mitchell Yard by 10:30 P.M., C&NW interchange documents are to automatically reflect the interchange time of 11:59 P.M.

Switch foreman's transfer reports are of utmost importance and are to be sent to the Milwaukee Freight Office, Car Record Department with the interchange document.

Clerical forces at National Avenue will protect PER DIEM against the C.&O. and G.T.W. by obtaining actual delivery time from the Yardmaster or Switch Foreman. Received interchange from the C.&O. or G.T.W. depends on boat arrival.

I.D.P. manuals are to be reviewed for the proper way to document interchange in applying "Road to Road", "Road to Switch" "Switch to Road" or "Switch to Switch" divider cards.

Be absolutely certain to furnish accurate information to the receiving road on all cars interchanged. When accurate information is not furnished you are subjecting the C&NW to possible penalty charge which will be assessed from the receiving road in accordance with Car Service Rule 7 or Car Hire Rule 14 which are quoted in the back of each equipment guide.

RECIPROCAL SWITCH SERVICE

Reciprocal switch service is a privilege granted by the carrier to a particular industry, and only after an intensive study of the transportation requirements of that industry, entitling an industry to receive or forward carloads in interchange without the penalty of additional freight charges.

The following will govern the handling of carloads received or forwarded in reciprocal switch within the Milwaukee Switching District.

An asterisk (*) shown just before an industry's name denotes the fact that the industry is NOT OPEN to reciprocal switch.

Received in Interchange

When received from the C.M.St.P.&P. or Soo Line for industry located on the C&NW in the Milwaukee Switching District that are NOT OPEN to reciprocal switch.

If accompanied by waybill, card direct. If not, card HOLD and promptly notify reconsigning desk in the freight office.

All loads received from the C.&O. or the G.T.W. will be accompanied by a waybill -- card direct.

Forwarded in Interchange

When an industry NOT OPEN to reciprocal switch, located on the C&NW in the Milwaukee Switching District tenders a carload for subsequent movement that must move via C&NW - MILW - CMStP&P or SOO LINE - (If in doubt on junction, contact Outbound Rate Department, Milwaukee freight office) - be certain to obtain shipping order and C&NW must originate revenue waybill.

For industry open to reciprocal switch located on the C&NW in the Milwaukee Switching District, clerical forces in Milwaukee will simply card CMStP&P or Soo Line shipment on carload tendered for either road.

Butler agency forces will issue a copy of Form 477-memo waybill, denoting the origin, shipper, car initial and number to Agent, CMStP&P or Soo, commodity if known, and net weight. Upon arrival Mitchell Yard, clerical forces will simply card CMStP&P or Soo shipment and forward the memo waybill to the freight office.

On forwarded shipments to C.&O. Ferry from all industry located on the C.&N.W., the C.&N.W. must obtain the shipping order and originate the revenue waybill. Be certain shipping order declares C.&O. Ferry. When shipping order simply declares C&NW - C&O, junction via Chicago.

RECIPROCAL SWITCH SERVICE

On forwarded shipments to the G.T.W. Ferry from all industry located in the Milwaukee Switching District, clerical forces will card G.T.W. Ferry, denoting commodity and industry forwarding. Shipping order will be receipted for and sent to the freight office for delivery to the G.T.W. freight office. If shipping order simply denotes C&NW - GTW, junction via Chicago or Elsdon.

Butler agency forces will, when routed G.T.W. Ferry, originate a Form 477, memo waybill, denoting origin, shipper, car initial and number, and direct car to Agent, G.T.W. Ferry, Milwaukee. Send shipping order to Outbound Rate Department, Milwaukee freight office. On all shipments originating outside the Switching District, the C.&N.W. will originate the revenue waybill.

PERISHABLE SHIPMENTS

Yard clerical forces will inspect and record, upon arrival, all shipments being transported in mechanical refrigerators. It is absolutely necessary to record temperature reading and fuel supply and whether or not diesel and refrigeration unit are operating (running). Upon returning to the yard office the temperature of the car must be compared with the requirements noted on the waybill. Should the waybill be noted M.P.S., (Mechanical Protective Service) Rule 705, maintain zero (0-degrees) and the temperature of the car reflects a temperature above zero, the team track foreman at Florida Street must be promptly notified in order to protect the shipment. After hours or on weekends when the team track foreman is not on duty, contact the Agent or the Assistant Agent.

The inspection record of all cars moving under M.P.S., (Mechanical Protective Service) must be telephoned or mailed in writing to the Team Track Foreman at Florida Street.

Perishables moving to industry in the Milwaukee Switching District on the C.M.St.P.&P. or Soo Line, the carload is not to be interchanged when M.P.S. requirements are not being met. The car is to be carded to the Rip track and the Team Track Foreman, Agent, or Assistant to the Agent promptly notified. In addition, each car transporting a perishable commodity should have an adequate fuel supply. Anytime a fuel gauge reflects less than 75 gallons of fuel, the car is to be carded to the Rip Track and refueled with at least 150 gallons of No. 1 fuel oil from Hometown, Inc. Fuel delivery tickets are to be forwarded to Florida Street.

Perishable shipments received from the C.M.St.P.&P. - Soo Line - C&O or GTW for industry in the Milwaukee Switching District or for C&NW line haul beyond the City of Milwaukee. When the car reflects other than the requirements noted on the waybill or interchange document, the delivering carrier will be promptly notified and unless the delivering road requests the car be returned, the car will be carded to the Rip Track and the delivering road notified as to the exact address and location of the defective car in order that they may complete the necessary repairs.

The Agent or the Assistant to the Agent are to be notified promptly of defective mechanical refrigerators received under load in interchange, as the carload may have to be promptly returned to the delivering carrier for load transfer.

The "Carrier's Protective Service" (Heater) season begins on November 15th and lasts through April 15th each year. Information on all inbound loads requiring "Carrier's Protective Service" (C.P.S.) or "Shipper's Protective Service" (S.P.S.) is to be promptly furnished to the Team Track Foreman at Florida Street, who in turn will arrange to protect the perishable shipment as required.

HANDLING OF EXPLOSIVES AND HAZARDOUS COMMODITIES

When forwarding a carload of explosives in a train or switch run, C&NW Form 494 - "Notice Of Cars Containing Explosives" must be completed in four parts, to be distributed as follows:

One (1) each to the conductor and engineer. Staple one copy to the face of the waybill and the final copy to the Car Record Department, Milwaukee Freight Office. NOTE excerpt -- Handling and Blocking Instructions from the Interstate Commerce Commission on the back of Form 494.

Two posters of approximately 14 X 20 inches are posted in each yard office and they are headed as follows:

Poster #1 Handling of Cars Placarded Explosives, Dangerous Poisonous Gas, Dangerous Radioactive Material, Flammable Poisonous Gas, Dangerous Empty Flammable Poisonous Gas or Residue and Caution - Residue Phosphorous.

Poster #2 Guide For Handling Explosives and Other Dangerous Articles in T.O.F.C. Service.

Both posters dictate the absolute necessary requirements for the safe handling and placement of cars containing commodities of the referred to type in trains. In addition the proper notations that must appear on revenue or car movement waybill governing the movement of such commodities.

Handling Of Flammable Compressed Gas.

Waybills for loaded tank cars containing flammable gas placarded "DANGEROUS" must carry the notations, "DOT 112A" or "DOT 114 A" and must be handled in trains according to the requirements of Poster No. 1. In addition clerical forces will prepare the required form (available in yard office) headed "Message", "NOTICE OF CARS CONTAINING FLAMMABLE COMPRESSED GAS". This form to be completed in four parts and distributed as follows:

One copy each to conductor and engineer.
Staple one copy to the face of the waybill.
Final copy to the Car Record Department, Milwaukee Freight Office.

CASH CUSTOMERS

The following page contains a list of customers that should be handled on a cash basis, as follows:

Inbound collect - customer located on C.&N.W. T.

Hold in district - Notify freight office.

Inbound collect - customer located on connecting line.

Hold at Mitchell Yard - Notify freight office.

Outbound prepaid - customer located on our line.

Leave on spot - Notify freight office.

Outbound prepaid - customer located on connecting line.

Hold at Mitchell Yard - Notify freight office.

PLEASE NOTE: These instructions do not apply on inbound prepaid or outbound collect shipments.

INDUSTRIES ON A CASH BASIS

All Transport, Inc.	Chicago
Awe Casual Furniture	2510 S. Kinnickinnic Ave.
Economy Supply Co. of Wisc.	1500 S. 84th St.-West Allis
LaRosa, V. & Sons	3372 N. Holton St.
Milwaukee Cold Storage Co.	100 S. Second St.
