

The Railways' Answer to the Demand for Speed*

Faster passenger and freight trains, requiring longer braking distances, have brought to attention the necessity for respacing signals and providing more aspects.

- *(1) The Abraham Lincoln of the Alton
- (2) The Flying Yankee of the Boston & Maine—Maine Central
- (3) The Comet of the New York, New Haven & Hartford
- (4) The Twin Zephyrs of the Burlington
- (5) The Streamliner City of Portland of the Union Pacific
- (6) The Hiawatha of the Milwaukee
- (7) The "400" of the Chicago & North Western
