Foundation For Use When Sign Is Erected At The Side Of Highway

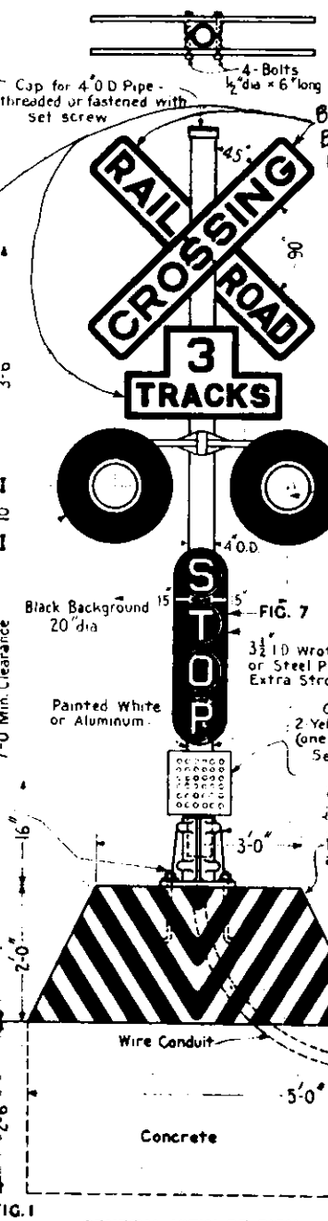

FIG. 1

GENERAL VIEW OF SIGN Showing Foundation For Use When Erected In Center Of Highway

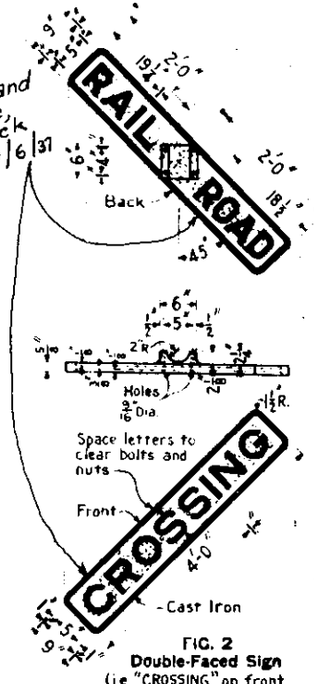

FIG. 2
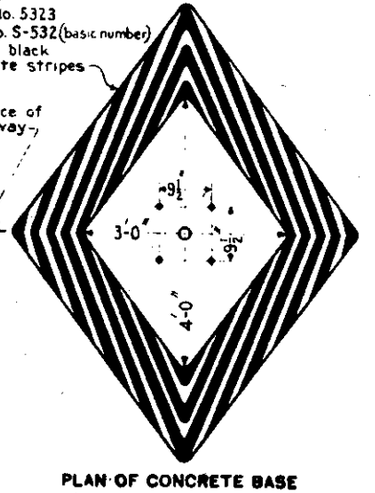
Double-Faced Sign
(ie "CROSSING" on front and "RAILROAD" on back)



PLAN OF CONCRETE BASE

NOTE:-

A sign made in accordance with Fig. 1, except as modified by the following notes and the legal requirements of several of the states, shall be erected on each side of the railroad crossing.

Signs shall be erected at such points as will afford the best view by persons approaching the crossing and generally on the right hand side of the highway, or on the left hand side of

Signs shall not be erected in the center of the highway except where required by public authorities having jurisdiction.

Where state law or local ordinance requires the sign designated as Fig. 1-a, it shall be located only at the side of the highway.

Where the distance between any two tracks is more than 100 feet a sign shall be erected on each side of each single track or group of tracks so separated.

A sign erected at a crossing of two or more tracks shall include the sign designated as Fig. 6, unless a state law or local ordinance prescribes a sign of the reflector type, in which case the sign designated as Fig. 9 shall be installed, the letters and numerals being studded with colorless reflectors [illegible] and all surfaces of the letters, Numerals [illegible] shall be white. All other parts dull black. The numerals appearing on the signs shown as Figs. 6 and 9 shall be the proper ones to indicate the number of tracks and shall be so specified on the requisition.

Signs shall be equipped with flashing lights only when ordered by special executive authority.

30. Flashing lights used to indicate the approach of trains shall start to flash at least [illegible] seconds before the arrival of the fastest train operated over the crossing and the electric circuits so arranged that the lights will continue to operate until rear of train reaches or clears the crossing.

Fig. 7 may be used with flashing lights where commercial current is available.

Fig. 8 shall be used with flashing lights if Fig. 7 is not used and shall have the letters studded with colorless reflectors [illegible] as shown. The letters [illegible] shall be white. All other parts dull black.

The yellow caution marker shown in Fig. 1 shall be used only on signs erected in the center of the highway.

Additions to the sign Figs. 1 or 1-a (modified in accordance with the above instructions), are made necessary by the legal requirements of several of the states as follows:

A - Within the State of West Virginia Fig. 3 shall be added to Figs. 1 or 1-a.
B - Within the State of Indiana Fig. 4 shall be added to Figs. 1 or 1-a.
C - Within the State of Virginia Fig. 5 shall be added to Figs. 1 or 1-a, except within the limits of incorporated cities and towns of 1000 population or more.

On Figs. 1-a, 3, 4, 5 and 8 the face of letters, numerals and borders, the edges and backs of signs shall be painted black, the background white.

The forms of the letters on Fig. 4 shall be full width letters and on Figs. 3 and 5 condensed letters and numerals as given on Standard Plan showing Letters and Figures for Signs and Notices, except that the serifs (the points at the corners of the letters) shall be omitted.

The forms of the letters and numerals on signs Figs. 1-a, 3, 4, 7, 8 and 9 shall be as given on this plan.

All letters, numerals and borders in relief shall be raised 1/8th inch with a slight draft.

All iron or steel parts shall be thoroughly cleaned and given a shop coat of red lead at the place of manufacture.

& See Note on Fig. 1, 2 & 6.

REFERENCES

Request must be made for encroachment on the limits shown for:
⊗ Thru Bridges in the State of Ohio.
✝ Standpipes 8'-3" } Illinois General Order
▲ Tanks 9'-0" } requires these Clearances to Main and Passing Track center lines.

Safety Lines, Yellow or White on Freight Platforms only:
District of Columbia - Obligatory 8'-6" from Center Line of Track.
Pennsylvania, Maryland and Delaware recommend 8'-6" from Center Line of Track.

Side Clearance for Handrails:
Bridges & Turntables - Plan 79400-().
Coal Trestles, concrete & steel - Plan 79320-().
Coal Trestles, timber - Plan 79325-().

Structures must not be located nearer to the track than the minimum clearance limits prescribed by this plan and these distances should be exceeded where possible.

Minimum Clearances:

For Tangent Track - Shall be as shown on this plan.

For Curved Track:

Above Top of Rail - Are same as shown for tangent track measured vertically from top of high rail, except passenger and freight platforms, the height of which shall be measured from top of nearest rail.

Side Clearances (Measured Radially)
- Outside - On the outside of curved track, side clearances shall be measured horizontally from the gage of nearest rail and be increased by 1 inch per degree of curvature over that shown for tangent track.
- Inside - On the inside of curved track, side clearances shall be measured horizontally from the gage of nearest rail and be increased by 1 inch per degree of curvature over that shown for tangent track, to which must also be added 3½ times the amount of super-elevation of the high rail above the low rail.

Consideration should always be given to the probability of increased distance between track centers, and widening ditches, and the structures located accordingly.

For standard distances, C. to C. of tracks and spacing of tracks where intertrack Clearance Limiting Objects are located, see Spec. for Standard Track C.E. 78-(), Paragraphs 937 to 941, incl.

Where physical conditions impose insurmountable restrictions, closer than those specified; the matter must be submitted to the Chief Engineer for any modification, also to local or state authorities if necessary.

Clearance Requirements set forth on this plan shall apply only to new construction or reconstruction. Structures and Tracks constructed prior to July, 1953 may be maintained and extended at the existing clearances.

For prescribed locations of Switch Operating Mechanisms and Switch Point Position Indicators, see instructions relative in Specifications for Standard Track C.E. 78-(), Paragraph 1210.

The lead rails covered by this plan are indicated by heavy solid lines and shall be ordered as separate items on the requisition, specifying quantity and length of rails required, weight and section of rail and number of this plan. 39'-0" Rails are not furnished where indicated as they shall be provided locally.

The lead rails specified on this plan are for standard turnouts with Design L or S stock rails according to Plan 69886-( ), for 18 Ft. Switch, and Plan 69887-( ), for 30 Ft. Switch, with joints in turnout run beyond heel of switch staggered not more than 5'-0".

Lead rails shall meet the requirements of No.1 Rails as prescribed by The Pennsylvania Railroad Specifications for O.H. Steel Rails, C.E. 35-( ), excluding "A" Rails.

Lead rails shall be drilled $2\frac{23}{32}$"-6"-7" and shall be furnished straight.

†These turnouts shall be used only to meet special limiting conditions.

*This rail is necessary for locating insulating joints but any variation in length that will provide a stagger between joints of not more than 5'-0" will be permitted. The length of rails between heel of switch and toe of frog shall be as specified.

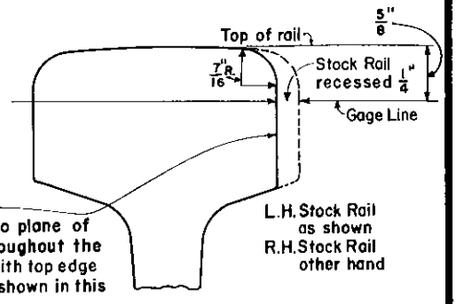
R. H. STOCK RAIL—STRAIGHT

STOCK RAILS FOR 18 FT. SPLIT SWITCHES, 130 LB. P.S., 3 HOLE DRILLING,—39'-0" LONG



This surface of recess shall be perpendicular to plane of base of stock rail throughout the length of the recess with top edge rounded throughout as shown in this section.

SECTION THROUGH STOCK RAIL AT ⅛" PT. OF SWITCH
DETAIL A

NOTE:-

Requisitions for stock rails shall specify weight and type of rail, hand, whether straight or curved, design, the length of switch with which they are to be used, and the number of this plan.

Wherever practicable, two Design L or one Design L and one Design S stock rails shall be used. Two Design S stock rails shall be used only to meet special limiting conditions.

Stock Rails shall meet the requirements of No. 1 Rails as prescribed by the Pennsylvania Railroad Specifications for O.H. Steel Rails, excluding "A" Rails, C.E. 35-( ). No rails which were cut when cold by the use of a high speed friction saw shall be used.

Rail Ends shall be beveled as indicated on Plan 71099-( ).

One straight and one curved stock rail are used with each standard switch.

Details of curved stock rails are same as for straight stock rails of same hand except curved stock rails shall be furnished bent and curved to the alinement specified above and below.

Joint Bolt Holes shall be 1 5/16" Dia. Center line of Joint Bolt Holes shall be 2¾" above base of rail.

⊛ Any variation in rail length, within limits prescribed by rail specification, shall occur in this dimension.

■ Spread of 3" between theoretical gage lines.

STOCK RAILS FOR 45 FT. SWITCHES – 131 & 140 R.E., 152 & 155 P.S., 60'-0" LONG (FOR NO. 20 TURNOUTS)

NOTE :–

Requisitions for stock rails shall specify weight and type of rail, hand, whether straight or curved, design, the length of switch with which they are to be used and the number of this plan. (One straight and one curved stock rail are used with each standard switch).

Wherever practicable, two Design L or one Design L and one Design S stock rails shall be used. Two Design S stock rails shall be used only to meet special limiting conditions.

Details of curved stock rails are same as for straight stock rails of same hand except curved stock rails shall be furnished bent and curved to the alinement specified on this plan.

Size and distance of joint bolt holes from rail base shall conform to Standard Plans of the respective rail sections.

The ends of the stock rails shall be beveled as shown on Standard Plan 71099-( ).

Stock rails shall meet the requirements of No. 1 Rails as prescribed by the Pennsylvania Railroad Specifications for O.H. Steel Rails, C.E. 35-( ), excluding "A" Rails. No rails which were cut when cold by the use of a high speed friction saw shall be used.

◉ Any variation in rail length within limits prescribed by rail specifications, shall occur in this dimension.

✱ Full width of head of rail at gage line – (2 31/32" for 131 R.E. & 152 P.S., and 2 7/8" for 140 R.E. & 155 P.S.).

♦ Spread between theoretical gage lines – (2 31/32" for 131 R.E. & 152 P.S., and 2 7/8" for 140 R.E. & 155 P.S.).

Center line of stop on switch rail; (spread between theoretical gage lines shown).

8 Standard Tie Plates, (double shoulder):
140 lb. R.E. Rail, Plan 72022-(), (Ref. IB-568)
155 lb. P.S. Rail Plan 72027-(), (Ref. IB-572)
8 CJ Twin Tie Plates, Plan 66228-(), (Ref. IB-875)
8 CK Twin Tie Plates, Plan 66228-(), (Ref. IB-876)
4 FT-20 Frog Tie Plates, Plan 66237-(), (Ref. IB-852)
2 TR Tie Plates, Plan 69478, (Ref. 140 R.E. IB-928 — 155 P.S. IB-690)

Plate A
For use with bolts through timbers. Furnished from Chambersburg on SK-5 order.

Sections and other details shall be in accordance with Plan 73816-( ).

NOTE:-

Requisitions for switches or mates as per this plan, shall specify the weight and type of rail, and hand of switch or mate desired.

When switches as per this plan are ordered, Manufacturer shall furnish switch complete with tongue, but excluding the mate, and switch shall be furnished with the two running rails heat treated as shown.

The mates for use with this switch are shown also on this plan, and shall be ordered on a separate requisition.

The Body Casting for the mate shall be manganese or other approved alloy steel.

When tongues alone are desired, they shall be described on the requisition as follows, with hand of tongue being same as the hand of switch into which they are to fit:

TONGUES, R.H.-L.H. 155 lb. P.S. (140 lb. R.E.) Switch Type C, Forged steel, H.T. and reinforced per this plan.

* Bolt through lug shall be removed when throwing device is applied.

All rail parts shall meet the requirements of No. 1 Rails as prescribed by The Pennsylvania Railroad Spec. C.E.35-( ).

All body bolts shall be 1⅜" Dia. except 1⅛" Dia. bolt through pin.

The Tongue Switch and Mate shall be marked, where indicated on this plan, with characters not less than ½" high to indicate the manufacturer's name or trade mark, weight and type of rail, the letters "HT" to indicate Heat Treated running rails for the switch, and design of switch or mate, ("Type C" for switch; "Type A" for mate).

The steel of manganese steel casting shall conform to the following requirements as to chemical composition:

Carbon, per cent	1.00 - 1.30
Manganese, Min., percent	12.00
Silicon, Max., per cent	2.00
Phosphorus, Max., per cent	0.10
Sulfur, Max., per cent	0.05

A copy of the analysis of the manganese steel with test drillings shall be furnished by manufacturer to the P.R.R. inspector.

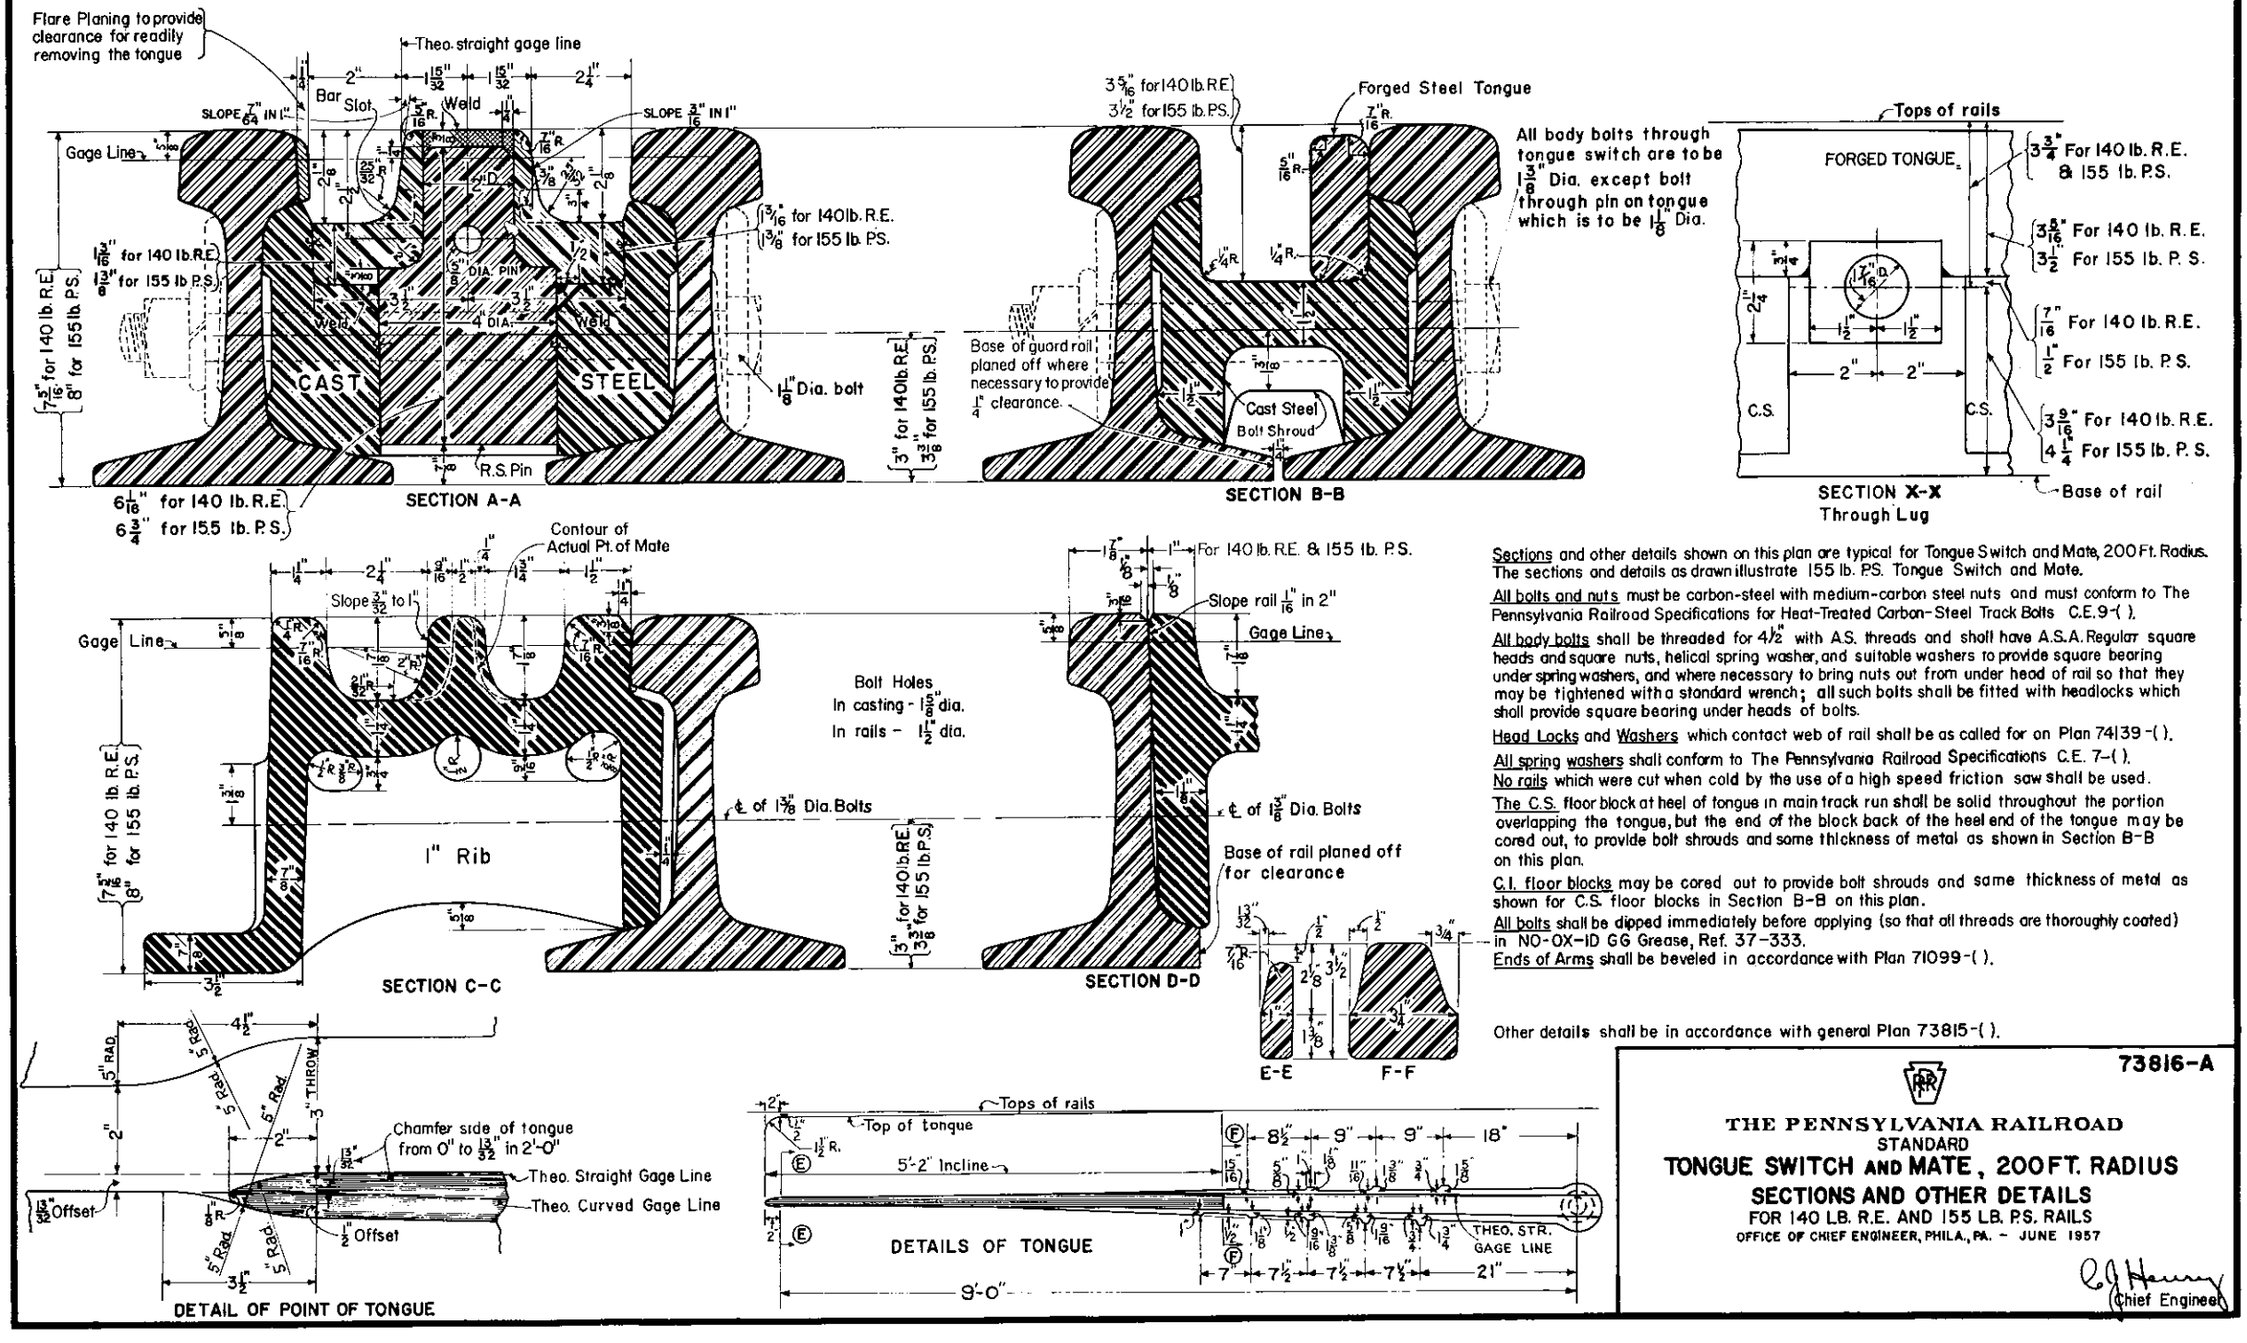
THE PENNSYLVANIA RAILROAD
STANDARD
TONGUE SWITCH AND MATE, 200 FT. RADIUS FOR USE IN PAVED STREETS
FOR 140 LB. R.E. AND 155 LB. P.S. RAILS
OFFICE OF CHIEF ENGINEER, PHILA., PA. - JUNE 1957

C.J. Henry
Chief Engineer



Sections and other details shown on this plan are typical for Tongue Switch and Mate, 200 Ft. Radius. The sections and details as drawn illustrate 155 lb. P.S. Tongue Switch and Mate.

All bolts and nuts must be carbon-steel with medium-carbon steel nuts and must conform to The Pennsylvania Railroad Specifications for Heat-Treated Carbon-Steel Track Bolts C.E.9-( ).

All body bolts shall be threaded for 4 1/2" with A.S.A. Regular square heads and square nuts, helical spring washer, and suitable washers to provide square bearing under spring washers, and where necessary to bring nuts out from under head of rail so that they may be tightened with a standard wrench; all such bolts shall be fitted with headlocks which shall provide square bearing under heads of bolts.

Head Locks and Washers which contact web of rail shall be as called for on Plan 74139-( ).

All spring washers shall conform to The Pennsylvania Railroad Specifications C.E. 7-( ).

No rails which were cut when cold by the use of a high speed friction saw shall be used.

The C.S. floor block at heel of tongue in main track run shall be solid throughout the portion overlapping the tongue, but the end of the block back of the heel end of the tongue may be cored out, to provide bolt shrouds and same thickness of metal as shown in Section B-B on this plan.

C.I. floor blocks may be cored out to provide bolt shrouds and same thickness of metal as shown for C.S. floor blocks in Section B-B on this plan.

All bolts shall be dipped immediately before applying (so that all threads are thoroughly coated) in NO-OX-ID GG Grease, Ref. 37-333.

Ends of Arms shall be beveled in accordance with Plan 71099-( ).

Other details shall be in accordance with general Plan 73815-( ).

Reflectorized Low Switch Targets shall be used in accordance with The Pennsylvania Railroad Specifications for Construction and Maintenance of Track, C.E. 78-( ) and where not prohibited by Public Authorities having jurisdiction.

Targets shall be 1/8" thick (#11 gage) copper bearing steel, AAR-M117.

Mast shall be 1" I.D.-W.I. pipe or 1 1/4" Dia. bar stock.

Steel surfaces shall be well sanded to remove corrosion, oil and dirt, and cleaned with turpentine substitute and dried thoroughly.

Mast shall have one coat zinc chromate primer, Ref. 47-2077, then one coat black enamel Ref. 47-3315.

Steel targets shall have one coat of white primer Ref. 47-2366 both sides. The pointed blades shall have a finish coat of Bulletin White, Ref. 47-3314, both sides. The circular blades shall be finished in either Target Red, Ref 47-2289 both sides or Yellow Enamel, Ref. 47-2590 both sides as required.

Stimsonite Reflectors, 5 3/8" Dia. shall be applied after painting and secured by retaining ring with semi-tubular type rivets 3/16" Dia. 5/16" long.

TYPICAL LOCATIONS

Highway Crossing Signs as shown in the General Assembly shall be erected on each side of the railroad crossing, on the right hand side of the highway and placed at a point which shall afford the best view to all approaching the crossing. Any deviation from the location of crossing signs, as shown on this plan, shall be at the direction of the Public Authorities having jurisdiction.

The 90° Crossing Sign, Figure 1, shall be used universally except where State Laws require the 50° Crossing Sign, Figure 2. When the distance between any two tracks or group of tracks is 100 feet or more, a crossing sign shall be erected on each side of each single track or group of tracks, so separated. At a crossing of two or more tracks, auxiliary sign, Figure 3, shall be included with a numeral indicating the number of tracks to be crossed. Auxiliary Signs, Figures 4, 5 & 6 shall be used only in compliance with the State Laws. Letters, numerals and borders of all signs shall be raised in relief 1/8" with a slight draft, as shown.

All signs shall have the letters and numerals black and the borders and background white. All surfaces shall be well sanded to remove corrosion, oil and dirt, shall be cleaned with turpentine substitute and dried thoroughly. The faces of all signs shall have one coat, white primer, Ref. 47-2366, then the borders and background, one finish coat, self cleaning white, Ref. 47-3152. The letters and numerals shall have a finish coat, black enamel, Ref. 47-3315. The backs of all signs shall have one coat, zinc chromate primer, Ref. 47-2077, then a finish coat, black enamel, Ref. 47-3315. The post shall have one coat, white primer, Ref. 47-2366, then one finish coat, self cleaning white, Ref. 47-3152 or one coat, aluminum, Ref. 47-3159.

Where State Laws require reflectorization of Highway Crossing Signs, existing cast iron signs shall be reflectorized by the overlay method.
New or replacement signs where reflectorization is desired, shall be in accordance with Plan ~~78301-A~~.

J.E.R.

SPECIFICATION

1. PURPOSE:
   (a) The purpose of this specification is to provide welded steel pipe for signals and interlocking.
2. DRAWINGS:
   (a) The drawing forms an essential part hereof.
3. CHEMICAL PROPERTIES:
   (a) The steel shall conform to the following requirements as to chemical composition:
   Phosphorus, not more than 0.11 per cent.
   Copper, 0.20 per cent. to 0.35 per cent.
4. PHYSICAL PROPERTIES AND TESTS:
   (a) The steel shall conform to the following minimum requirements as to tensile properties:
   Tensile strength, 50,000 lbs. per sq. in.
   Yield point, 30,000 lbs. per sq. in.
   Elongation in 8 in., 18 per cent.
   (b) The yield point shall be determined by the drop of the beam of the testing machine.
   (c) Weights, dimensions and hydrostatic pressure shall be as follows:

Pipe	
External	1.315"
Internal	1.047"
Thickness	0.134"
Weight per ft.	1.712 lbs.
Hydrostatic pressure	700. lbs.
Coupling	
External	1.750"
Length	2.250"
Weight	0.688 lbs.

   (d) The outside diameter (Section 4-c) at any point shall not vary more than 1/64 in. from the size specified.
   (e) The inside diameter (Section 4-c) of all pipe must be large enough to receive a steel plug 63/64 inch in diameter for a distance of 6 in.
   (f) The weight of the pipe and couplings (Section 4-c) shall not vary more than 5 per cent. from that specified.
   (g) The pipe shall be tested at the mill to the hydrostatic pressure specified in Section 4-c.
   (h) A sufficient length of pipe shall stand being bent through 90 deg. around a cylindrical mandrel the diameter of which is 12 times the nominal diameter of the pipe, without developing cracks at any portion and without opening the weld.
   (i) A piece of pipe 1 ft. long will be selected at random and be subjected to a flattening test by hammering the piece until the opposite sides are within the thickness of the wall from each other; the piece shall show no cracks in the steel except at the weld.
   (j) Specimens:
      1. Test specimens shall consist of sections cut from a pipe.
      2. Tension test specimens shall be longitudinal.
      3. All specimens shall be tested cold.
   (k) One of each of the tests specified in Section 4 may be made on a length in each lot of 500 or less. Each length shall be subjected to the hydrostatic test.
   (l) If the results of the tests of any lot do not conform to the requirements specified, retests of two additional pipes shall be made, each of which shall conform to the requirements specified.
   (m) Contractor shall give the Purchaser sufficient notice of time when material will be ready for testing.
   (n) Contractor shall provide, at point of production, apparatus and labor for making the required tests under supervision of the Purchaser.
   (o) If tests are to be made at point of production, it shall be so stated. Purchaser will distinctly indicate which of the tests herein specified are to be made and what portion of the material shall be tested.
5. ENDS:
   (a) Ends of pipe must be cut square and two holes drilled 0.257 inch in diameter for two ¼ in. rivets on one end only; first rivet hole shall be drilled 2 in. from the end and the second 2 in. from this and at right angles to it.
6. THREADS:
   (a) Each length of pipe shall have a thread 1⅛ in. long, ⅜ in. total taper per ft., 11½ slightly rounded top and bottom "V" threads to the inch. The threaded portion of the pipe shall be of such diameter as to permit the coupling to be screwed on five turns by hand, with a permissible variation of one turn either way.
7. COUPLINGS:
   (a) Each length of threaded pipe shall be provided with one coupling faced at ends, tapped straight through, having clear cut threads and of such pitch diameter as to make a tight joint. Couplings shall be made of wrought iron or steel.
8. PLUGS:
   (a) Plugs shall be open hearth steel, 10 in. long, 31/32 inch in diameter, drilled 0.257 inch in diameter, for four ¼ in. rivets spacing to be 1 in., 2 in., 4 in., 2 in. and 1 in., the first and third holes to be in the same plane and the second and fourth holes at right angles thereto.
9. RIVETS:
   (a) Rivets must be made of soft iron or steel ¼ inch in diameter and 1-11/16 in. long.
10. LENGTHS:
   (a) The pipe shall be in random lengths of 16 ft. to 22 ft. ("Jointers," which are two pieces coupled together, will be rejected.)
11. MATERIAL AND WORKMANSHIP:
   (a) Material and workmanship shall be first-class in every respect.
12. INSPECTION:
   (a) Purchaser may inspect the material at all stages of manufacture.
   (b) Purchaser may inspect the completed product to determine that the requirements of this specification have been met.
   (c) If the material has not been accepted at point of production and if, upon arrival at destination, it does not meet the requirements of this specification, it may be rejected, and the Contractor, upon request, shall advise the Purchaser what disposition is to be made of the defective material. The Contractor shall pay all freight charges.
   (d) If Purchaser is to make inspection at point of production, it shall be so stated.

SPECIFICATION.

1. PURPOSE.
   (a) THE PURPOSE OF THIS SPECIFICATION IS TO PROVIDE REQUIREMENTS FOR RAIL BONDS AND RAIL BOND CLIPS FOR RAILWAY SIGNALLING TRACK CIRCUITS.
2. MATERIAL AND WORKMANSHIP.
   (a) MATERIAL AND WORKMANSHIP SHALL BE FIRST CLASS IN EVERY RESPECT.
3. DESIGN.
   (a) GENERAL CONSTRUCTION AND DIMENSIONS OF RAIL BONDS AND RAIL BOND CLIPS SHALL BE IN ACCORDANCE WITH CURRENT ISSUE OF DWG. S-179.
4. CONDUCTORS.
   (a) CONDUCTORS FOR RAIL BONDS 1794, 1796 AND 1798 SHALL CONSIST OF ONE ANNEALED COPPER WIRE SURROUNDED BY SIX GALVANIZED STEEL WIRES WITH SUCH A LAY THAT THE AXIAL LENGTH OF ONE TURN OF WIRE WILL BE MIN. 2½ IN., MAX. 3 IN.
   (b) CONDUCTORS FOR RAIL BONDS 1795, 1797 AND 1799 SHALL CONSIST OF SEVEN ANNEALED COPPER COVERED WIRES WITH SUCH A LAY THAT THE AXIAL LENGTH OF ONE TURN OF WIRE WILL BE MIN. 2½ IN., MAX. 3 IN.
   (c) CONDUCTORS SHALL BE CYLINDRICAL IN FORM, FREE FROM SCALES, INEQUALITIES, SPLITS AND ALL IMPERFECTIONS.
   (d) COPPER, STEEL AND COPPER COVERED STEEL WIRES SHALL MEET THE FOLLOWING REQUIREMENTS AS TO MECHANICAL AND ELECTRICAL PROPERTIES:-

	STEEL	COPPER	COPPER COVERED STEEL
DIAMETER IN MILS	77 OR 83	77 OR 81	81
BREAKING STRENGTH MIN. LBS. PER SQ. IN.	50,000	38,500	55,000
ELONGATION IN 10 IN. EACH WIRE, MIN. PERCENT	8	25	15
AVER. ELONGATION IN 10 IN. ALL WIRES, MIN. PERCENT	11	--	18
RESISTIVITY, OHMS PER MIL. FT. MAX. AT 68°F.	81.37	10.56	28.59

   (e) DIAMETER OF COPPER WIRE WILL BE 77 MILS WHERE USED WITH 77 MILS STEEL WIRE AND 81 MILS WHERE USED WITH 83 MILS STEEL WIRE.
   (f) COMMERCIAL TOLERANCES FOR DIAMETERS SHALL BE USED.
5. TERMINALS.
   (a) TERMINALS SHALL BE MADE OF OPEN HEARTH STEEL CONTAINING NOT MORE THAN 0.20 PER CENT OF COMBINED CARBON.
   (b) TERMINALS SHALL WITHSTAND BEING DRIVEN THE ENTIRE LENGTH OF THE PIN INTO A HOLE ⅜ IN. IN DIA., DRILLED IN A STEEL PLATE ⅜ IN. THICK, WITHOUT SHOWING A CRACK OR FLAW OF ANY KIND. IN ADDITION THE TERMINAL, AFTER BEING DRIVEN INTO THE STEEL PLATE APPROXIMATELY ONE-HALF ITS LENGTH, SHALL WITHSTAND BENDING AT 90° WITHOUT CRACKING OR SHOWING A FRACTURE OF ANY KIND.
6. WELDING.
   (a) WELDING SHALL BE DONE WITH ELECTRIC DEVICES CAPABLE OF PRODUCING UNIFORMLY GOOD RESULTS. THE WELD SHALL BE SO MADE THAT THE ENDS OF ALL WIRES ARE UNITED DIRECTLY WITH THE TERMINAL TO INSURE A DENSE AND HOMOGENEOUS METAL WHICH SHALL BE FREE FROM BLOW HOLES AFTER FUSION.
7. IDENTIFICATION.
   (a) EACH TERMINAL SHALL BE SO MARKED THAT THE MANUFACTURER CAN BE READILY IDENTIFIED.
8. GALVANIZING AND TINNING.
   (a) AFTER WELDING, TERMINALS OF BONDS 1794, 1796 AND 1798 SHALL BE GALVANIZED IN ACCORDANCE WITH DRAWING, BY THE HOT DIP PROCESS.
   (b) AFTER WELDING, TERMINALS OF BONDS 1795, 1797 AND 1799 SHALL BE GALVANIZED OR TINNED IN A MANNER IN ACCORDANCE WITH DRAWING. TINNING OR GALVANIZING SHALL BE HEAVY, WELL DONE, EVEN IN THICKNESS THROUGHOUT, SMOOTH AND FREE FROM LUMPS.
   (c) TINNING SHALL BE OF LEAD TIN ALLOY, CONTAINING 70 PER CENT PURE TIN AND 30 PER CENT PURE LEAD.
9. ELONGATION.
   (a) MANUFACTURER MUST SUBJECT EACH RAIL BOND TO A STRETCHING PROCESS SUFFICIENT TO ELONGATE BOND (REGARDLESS OF LENGTH) TO PERMANENT SET OF ¼ IN. TO DETERMINE THE QUALITY OF THE WELDS. BONDS SHALL BE HELD BY THEIR TERMINALS IN SUCH A MANNER THAT THE WELDS ARE SUBJECTED TO THE FULL STRAIN DEVELOPED IN THE STRETCHING OPERATION.
   (b) STRETCHING MACHINE SHALL BE OF SUCH DESIGN THAT THE STRAIN WILL BE APPLIED TO EACH TERMINAL FOR NOT MORE THAN ONE SECOND.
10. INSPECTION.
   (a) PURCHASER MAY INSPECT MATERIAL AT ALL STAGES OF MANUFACTURE.
   (b) PURCHASER MAY INSPECT THE COMPLETED PRODUCT TO DETERMINE THAT THE REQUIREMENTS OF THIS SPECIFICATION HAVE BEEN MET.
   (c) IF MATERIAL HAS NOT BEEN ACCEPTED AT POINT OF PRODUCTION AND IF, UPON ARRIVAL AT DESTINATION, IT DOES NOT MEET THE REQUIREMENTS OF THIS SPECIFICATION, IT MAY BE REJECTED, AND THE CONTRACTOR, UPON REQUEST, SHALL ADVISE THE PURCHASER WHAT DISPOSITION IS TO BE MADE OF THE DEFECTIVE MATERIAL. CONTRACTOR SHALL PAY ALL FREIGHT CHARGES
   (d) IF PURCHASER IS TO MAKE INSPECTION AT POINT OF PRODUCTION, IT SHALL BE SO STATED.
11. TESTS.
   (a) TESTS MAY BE MADE AT POINT OF PRODUCTION, OR ON SAMPLES SUBMITTED, AND MAY ALSO BE MADE AT DESTINATION.
   (b) UNLESS OTHERWISE AUTHORIZED BY THE PURCHASER, THE CONTRACTOR SHALL GIVE THE ENGINEER OF TESTS, AT ALTOONA, PA., SUFFICIENT NOTICE OF TIME WHEN MATERIAL WILL BE READY FOR TESTING.
   (c) CONTRACTOR SHALL PROVIDE, AT POINT OF PRODUCTION, APPARATUS AND LABOR FOR MAKING REQUIRED TESTS UNDER SUPERVISION OF THE PURCHASER.
   (d) TESTS ARE TO MADE AT POINT OF PRODUCTION, UNLESS OTHERWISE STATED.
   (e) THREE BONDS TAKEN AT RANDOM FROM EACH SET OF 1000 OR LESS SHALL BE SELECTED BY THE PURCHASER FOR TESTS.
   (f) TERMINALS OF ALL SAMPLE BONDS SHALL BE CHECKED AGAINST THE REQUIRED DIMENSIONS.
   (g) TWO-THIRDS OF THE SAMPLES SHALL BE TESTED TO DESTRUCTION.
      1. ON THE SAMPLES TESTED TO DESTRUCTION, THE TERMINALS SHALL BE GRIPPED IN THE TENSILE MACHINE AND UNIFORM STRESS APPLIED ALONG THE AXIS OF THE BOND. FAILURE SHALL NOT OCCUR AT LESS THAN 3300 LBS. AND SHALL NOT OCCUR IN THE WELD, THAT IS; EACH INDIVIDUAL WIRE SHALL SHOW FRACTURE AND NOT PULL OUT OF THE WELDED AREA.
      IF ONE SAMPLE FAILS TO MEET THE 3300 LBS. LIMIT OR FAILS IN THE WELD, TWO ADDITIONAL SAMPLES TAKEN FROM THE SAME LOT SHALL BE SIMILARLY TESTED. IF MORE THAN ONE SAMPLE FROM A GIVEN LOT OR EITHER OF THE ADDITIONAL SAMPLES FAIL, THE ENTIRE LOT SHALL BE REJECTED.
      2. TERMINALS FROM THE SAMPLES USED FOR MECHANICAL TESTS SHALL BE TESTED FOR DRIVING AND BENDING REQUIREMENTS OF SECTION 5 (b). IF ONE OF THESE TERMINALS FAILS IN EITHER OF THESE TESTS, TWO ADDITIONAL SAMPLES TAKEN FROM THE SAME LOT SHALL BE SIMILARLY TESTED. IF MORE THAN ONE SAMPLE FROM A GIVEN LOT OR EITHER OF THE ADDITIONAL SAMPLES FAIL THE ENTIRE LOT SHALL BE REJECTED.
   (h) ONE THIRD OF THE SAMPLES SHALL BE USED FOR TINNING OR GALVANIZING TEST OF TERMINALS, GALVANIZING TEST OF STEEL WIRES, PHYSICAL TEST OF INDIVIDUAL WIRES AND ELECTRICAL TEST OF INDIVIDUAL WIRES. IF ANY SAMPLE FAILS ON ANY TEST, THE ENTIRE LOT SHALL BE REJECTED.
      1. TINNING TEST.
         (a) SOLUTION.
            (1) POTASSIUM FERRICYANIDE SOLUTION: 5 GRAMS OF THE SALT ARE DISSOLVED IN 1000 C.C. OF DISTILLED WATER.
            (2) NITRIC ACID SOLUTION SHALL HAVE A SPECIFIC GRAVITY OF 1.027 AT 60 DEG. F. MADE BY DILUTING 50 C.C. OF NITRIC ACID CHEMICALLY PURE, HAVING A SPECIFIC GRAVITY OF 1.42, WITH 950 C.C. OF DISTILLED WATER.
         (b) METHOD.
            (1) THE SAMPLES SELECTED FOR THE TEST SHALL BE THOROUGHLY CLEANED WITH GASOLINE AND THEN WITH SOAP AND WATER. AFTER RINSING THE CLEAN SAMPLES WITH DISTILLED WATER, THEY SHALL BE IMMERSED IN THE NITRIC ACID SOLUTION FOR ONE MINUTE, AND WITHOUT WIPING, DIPPED INTO THE FERRICYANIDE SOLUTION; IF A BLUE PRECIPITATE OR DISCOLORATION TAKES PLACE, IT INDICATES THE COATING HAS BEEN DISSOLVED OR PITTED. THE SAMPLES SHALL THEN BE WASHED WITH DISTILLED WATER TO FREE THEM FROM THE FERRICYANIDE SOLUTION AND THE ABOVE OPERATION REPEATED. SAMPLES WHICH HAVE BEEN COATED IN A SATISFACTORY MANNER SHALL STAND FOUR IMMERSIONS OF ONE MINUTE EACH IN THE NITRIC ACID SOLUTION WITHOUT SHOWING A BLUE PRECIPITATE OR DISCOLORATION IN THE FERRICYANIDE SOLUTION. IF BLUE PRECIPITATE APPEARS THE WHOLE SHIPMENT SHALL BE REJECTED.
            (2) GALVANIZING TEST SHALL BE IN ACCORDANCE WITH G.S.T. SPECIFICATION NO. 1002.
      (i) GALVANIZING OF RAIL BOND CLIPS SHALL BE TESTED IN ACCORDANCE WITH G.S.T. SPECIFICATION NO. 1002.
12. PACKING.
   (a) UNLESS OTHERWISE SPECIFIED, BONDS SHALL BE SECURELY TIED IN BUNDLES OF 50, WITH THE TERMINALS COMPLETELY AND CAREFULLY WRAPPED IN BURLAP OR EQUIVALENT PROTECTION.
   (b) RAIL BOND CLIPS SHALL BE PACKED SO AS TO FACILITATE HANDLING AND SHIPPING.
13. MARKING.
   (a) PURCHASER'S ORDER, NAME OF CONSIGNOR, AND NAME AND ADDRESS OF CONSIGNEE, SHALL BE PLAINLY MARKED ON OUTSIDE OF PACKAGE.
14. WARRANTY.
   (a) CONTRACTOR SHALL WARRANT THE MATERIAL COVERED BY THIS SPECIFICATION TO BE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP UNDER ORDINARY USE AND SERVICE, HIS OBLIGATION UNDER THIS WARRANTY BEING LIMITED TO MAKING, AT POINT OF PRODUCTION, ANY PART OR PARTS TO REPLACE THOSE WHICH SHALL BE FOUND DEFECTIVE AFTER SHIPMENT TO THE PURCHASER. THIS WARRANTY SHALL NOT APPLY TO ANY APPARATUS WHICH HAS BEEN SUBJECTED TO MISUSE, NEGLIGENCE OR ACCIDENT.
   (b) CONTRACTOR SHALL COVENANT AND AGREE TO SAVE HARMLESS, AND INDEMNIFY THE PURCHASER AGAINST ALL CLAIMS, SUITS, ACTIONS OR PROCEEDINGS, DAMAGES, COSTS, FEES AND EXPENSES BY REASON OF INFRINGEMENT OR ALLEGED INFRINGEMENT OF PATENTS, OR PATENT ROYALITIES INVOLVED, IN CONSEQUENCE OF THE PURCHASE OR THE USE OF MATERIAL COVERED HEREBY.
15. FIELD WORK.
   (a) 1795, 1797 OR 1799 SHALL BE USED THROUGH ROAD CROSSINGS, STATION PLATFORMS AND TUNNELS. 1794, 1796 OR 1798 SHALL BE USED AT ALL OTHER POINTS.
   (b) AT POINTS WHERE JOINTS IN ROAD CROSSINGS AND STATION PLATFORMS CANNOT BE AVOIDED, THE PLANKING SHALL BE CUT BACK ⅜ OF AN INCH FROM HEAD OF RAIL TO ALLOW FOR INSPECTION OF BONDS.
   (c) HOLES FOR TERMINALS SHALL BE DRILLED IN OIL WITH ⅜ OF AN INCH DRILL AND PLUGGED SAME DAY AS DRILLED.
   (d) WHERE PRACTICABLE HOLES SHALL BE DRILLED FROM OUTSIDE OF TRACK AND NOT FROM GAUGE SIDE OF RAIL. TERMINAL SHALL BE DRIVEN INTO RAIL FROM SAME SIDE OF HOLE AS DRILLED.
   (e) GAUGE 5803, PLAN S-580, SHALL BE USED FREQUENTLY TO DETERMINE IF HOLE DRILLED IN RAIL IS WITHIN THE LIMITS INDICATED ON THE GAUGE.
   (f) WHERE CONDITIONS CAUSE EXCESSIVE CORROSION, RAIL BONDS SHALL BE GIVEN A PROTECTIVE COATING OF NO-OX-ID, CONSISTENCY "A SPECIAL" OR NO. 2 SLUSHING OIL.
   (g) HOLES SHALL BE DRILLED AS SHOWN IN FIG. "A," SO AS TO BE PROPERLY LOCATED FOR CROPPING RAIL ENDS.

REQUISITES.

1. THE STRANDS OF BONDS 1794, 1798 AND CONNECTORS 17916, 17917, 17918 AND 17920 SHALL BE MADE OF 1-ANNEALED COPPER WIRE AND 6-GALVANIZED STEEL WIRES. THE DIAMETER OF EACH WIRE .077" AND DIAMETER OF EACH STRAND .231". AXIAL LAY. 254".
2. THE STRANDS OF BONDS 1795 AND 1799 SHALL BE MADE OF 7-40% COPPER COVERED STEEL WIRES. THE DIAMETER OF EACH WIRE .081" AND DIAMETER OF EACH STRAND .243". AXIAL LAY .275".
3. THE STRANDS OF CONNECTORS 17910, 17912, 17914 & 17921 SHALL BE MADE OF 7-40% COPPER COVERED STEEL WIRES. THE DIAMETER OF EACH WIRE .102" AND DIAMETER OF EACH STRAND .306". AXIAL LAY .300".
4. THE STRANDS OF CONNECTORS 17911, 17913 & 17922 SHALL BE MADE OF 7-ANNEALED COPPER WIRES. THE DIAMETER OF EACH WIRE .102" AND DIAMETER OF EACH STRAND .306". AXIAL LAY .375".
5. MANUFACTURING TOLERANCES ALLOWED ON WIRE AND STRAND SIZES.
6. MATERIAL, WORKMANSHIP, TINNING, GALVANIZING, TESTS AND GENERAL SPECIFICATIONS SHALL BE IN ACCORDANCE WITH A.A.R. SIGNAL SECTION SPECIFICATION 151, CURRENT ISSUE.

APPLICATION OF WEB TYPE RAIL BONDS AND CONNECTORS

ITEM	APPLIED
1794	AROUND RAIL JOINTS, AND FOR OTHER USES AS SPECIFIED ON DRAWINGS
1795	SAME AS 1794, EXCEPT FOR USE AT ROAD CROSSINGS, STATION PLATFORMS & TUNNELS
1798	SAME AS 1794, ALSO BETWEEN STOCK RAIL AND WING RAIL OF FROGS (SEE DWG. S-182-J)
1799	SAME AS 1795.
17910	FOR SHUNTING TRACK, EXCEPT IN CAB SIGNAL AND ELECTRIFIED TERRITORIES
17911	SAME AS 17910, BUT USED IN CAB SIGNAL TERRITORY.
17912	SAME AS 17910.
17913	SAME AS 17911.
17914	AS FOULING CONNECTOR.
17916	BETWEEN RAIL AND PARKWAY OUTLET. SEE DWG. S-184-H.
17917	BETWEEN DRAGGING EQUIPMENT DETECTOR AND PARKWAY OUTLET. SEE DWG. S-241-J.
17918	BETWEEN STOCK RAIL AND 1¼ IN. PIPE AROUND FROG. SEE DWG. S-184-K.
17920	SAME AS 17916.
17921	FOR SHUNTING TRACK WITH SL-26 ELECTRIC LOCK, EXCEPT CAB SIGNAL TERRITORY.
17922	SAME AS 17921, BUT USED IN CAB SIGNAL TERRITORY.

FIELD WORK.

1. BONDS 1795 AND 1799 SHALL BE USED THROUGH ROAD CROSSINGS, STATION PLATFORMS AND TUNNELS. BONDS 1794 AND 1798 SHALL BE USED AT ALL OTHER POINTS.
2. AT POINTS WHERE JOINTS IN ROAD CROSSINGS AND STATION PLATFORMS CANNOT BE AVOIDED, THE PLANKING SHALL BE CUT BACK ¾" FROM HEAD OF RAIL TO ALLOW FOR INSPECTION OF BONDS.
3. RAIL BONDS AND CONNECTORS SHALL BE APPLIED SAME DAY HOLES ARE DRILLED.
4. WHERE PRACTICABLE, HOLES SHALL BE DRILLED FROM OUTSIDE OF TRACK AND NOT FROM GAUGE SIDE OF RAIL. TERMINAL SHALL BE DRIVEN INTO RAIL FROM SAME SIDE OF HOLE AS DRILLED.
5. GAUGE 5803, PLAN S-580, SHALL BE USED FREQUENTLY TO DETERMINE IF HOLE DRILLED IN RAIL IS WITHIN THE LIMITS INDICATED ON GAUGE.
6. WHERE CONDITIONS CAUSE EXCESSIVE CORROSION, RAIL BONDS AND CONNECTORS SHALL BE GIVEN A PROTECTIVE COATING OF NO-OX-ID, CONSISTENCY "A-SPECIAL" OR NO. 2 SLUSHING OIL.
7. HOLES FOR RAIL BONDS SHALL BE DRILLED AS SHOWN IN FIG. "A", SO AS TO BE PROPERLY LOCATED FOR CROPPING RAIL ENDS.
8. FOULING AND SHUNT CONNECTORS SHALL BE STAPLED ONE INCH BELOW TOP OF TIE.
9. CONNECTORS 17911, 17913 & 17922 ARE FOR USE IN CAB SIGNAL TERRITORY.
10. FOR STANDARD ARRANGEMENTS OF FOULING AND SHUNTING CIRCUITS SEE PLAN S-803.
11. FOR 133 AND 140 LB. RAIL AND FOR 130 LB. RAIL OTHER THAN WITH L-3 JOINT BAR, INSTALL RAIL BONDS AND CLIPS IN ACCORDANCE WITH A, FIG. "A".
12. FOR 131, 152 AND 155 LB. RAIL AND FOR 130 LB. RAIL WITH L-3 JOINT BAR, INSTALL RAIL BONDS AND CLIPS IN ACCORDANCE WITH B, FIG. "A".

RAIL BONDS AND CONNECTORS ON THIS DRAWING ARE FOR USE OUTSIDE OF ELECTRIFIED TERRITORY, EXCEPT 17916, 17917, 17920, WHICH ARE UNIVERSAL.

REVISIONS

REDRAWN FROM PLAN S-179-K, DATED 11-4-37 AND REVISED AS FOLLOWS:- BONDS 1796 & 1797 ELIMINATED. TERMINALS OF BONDS 1794, 1795, 1798 & 1799 MADE TAPER HEAD. CLIPS NOW SHOWN ON PLAN S-178. SPECIFICATIONS CHANGED TO A.A.R. 316. SEC. 151. CONNECTORS 17910, 17911, 17912, 17913 & 17914 FORMERLY SHOWN ON PLAN S-182-I. CONNECTORS 17916, 17917, 17918 & 17920 FORMERLY SHOWN ON PLAN S-184. CONNECTORS 17921 AND 17922 ADDED.

REVISED NOVEMBER 12, 1946. FIG. A AMPLIFIED TO INCLUDE BOND UNDER BOLTS. NOTES 11 & 12 ADDED.

ITEM	APPLIED
17924, 17925	AROUND RAIL JOINTS AND FOR OTHER USES AS SPECIFIED ON DRAWINGS.
17927, 17928, 17929	FOR SHUNTING WITH T-20 MECH'S., H.D. CONTROLLERS, AND STRUCTURE GROUNDING.
17930, 17931, 17932 17933, 17934	FOR FOULING PROTECTION AND OTHER USES AS SPECIFIED ON DRAWINGS.
17935, 17936	BETWEEN RAIL AND IMPEDANCE BOND (SPEC. 1754)
17937	BETWEEN IMPEDANCE BONDS (SPEC. 1754) (NEUTRAL CONNECTION).

NOTES:-

1. AFTER BUTT WELDING, THE 2/0, 61-STRAND CABLE OR THE 250,000 CM, 61-STRAND CABLE SHALL BE PROPERLY SOLDERED INTO TERMINALS 17939 OR 17940
2. THE 3/8" AND 1/2" COPPER SLEEVES OF 17939 AND 17940 SHALL BE TINNED INSIDE AND OUTSIDE.
3. PARAGRAPHS 2, 3, 4, 5, 6, 7, 8 & 10 OF FIELD WORK AND PARAGRAPH 3 OF REQUISITES ON SHEET 1 OF THIS DRAWING SHALL APPLY TO BONDS AND CONNECTIONS INCLUDED ON THIS SHEET.
4. WELDING AND SOLDERING OF TERMINALS 17939 AND 17940 SHALL BE SUCH THAT, WHEN GIVEN A TENSILE TEST, THE CABLE SHALL FAIL WITHOUT PULLING OUT OF THE SLEEVE AND WITHOUT FAILURE OF THE SLEEVE OR WELD.
5. FOR TOLERANCES SEE SHEET 1 OF THIS DRAWING.
6. FOR RAIL HEAD TYPE OF RAIL BONDS SEE DRAWING S-180.
7. MATERIAL, WORKMANSHIP, TINNING, GALVANIZING, TESTS AND GENERAL SPECIFICATIONS SHALL BE IN ACCORDANCE WITH P.R.R. SPECIFICATION C.E. 48.

CONNECTORS 17935, 17936 AND 17937 ARE FOR USE WITH IMPEDANCE BOND SPECIFICATION 1754.

REVISIONS

THIS DRAWING SUPERSEDES M.P. DRAWINGS ET-R93D-3, F-41291A, AND F-91064. TERMINAL 17939 IS IN ACCORDANCE WITH M.P. DRAWING F-40671-7. M FIRST ISSUE THIS SHEET.

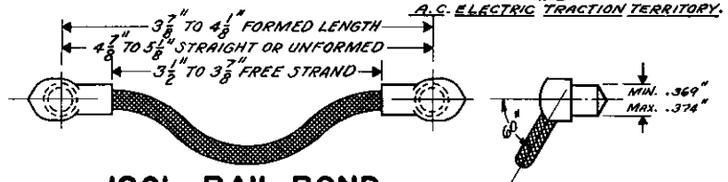
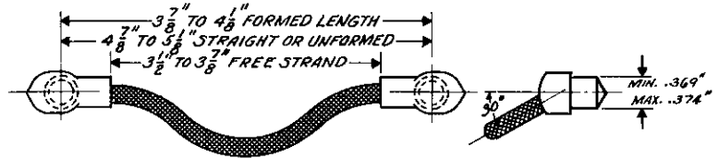
APPLICATION OF BOND AND DRILLING OF RAIL.
STEAM ROAD TERRITORY AND A.C. ELECTRIC TRACTION TERRITORY.



1801 - RAIL BOND STORES CAT. REF. NO. 2A-3707



1802 - RAIL BOND STORES CAT. REF. NO. 2A-3708

NOTE:-

1. BOND 1801 OR 1802 SHOULD BE ORDERED, AND USED (1 BOND PER JOINT), FOR BOTH STEAM AND A.C. ELECTRIFIED TERRITORY, WHEN MAKING RAIL RENEWALS OR GENERAL REPLACEMENTS. THE USE OF THE WEB TYPE DOUBLE STRAND LONG BOND PLAN S-179 (FOR STEAM ROAD) OR PLAN M.P. 412914 (FOR A.C. ELECTRIFIED TERRITORY) SHOULD BE CONFINED TO LOCATIONS WHERE FLANGE WORN RAILS DO NOT PERMIT SATISFACTORY APPLICATION OF THE RAIL HEAD TYPE BOND.
2. BONDS SHALL BE IN ACCORDANCE WITH A.A.R. SIGNAL SECTION SPECIFICATION 179-42 AND DRAWING 1048-B.
3. AT POINTS WHERE JOINTS IN ROAD CROSSINGS AND STATION PLATFORMS CANNOT BE AVOIDED THE PLANKING SHALL BE CUT BACK 3/4 OF AN INCH TO ALLOW FOR INSPECTION OF BONDS.
4. HOLES FOR BONDS SHALL BE DRILLED FROM OUTSIDE OF TRACK AND NOT FROM GAUGE SIDE OF RAIL. HOLES SHALL BE PLUGGED SAME DAY AS DRILLED.
5. AFTER RAIL BONDS ARE INSTALLED, THEY SHALL BE GIVEN A PROTECTIVE COATING OF "NO-OX-ID", CONSISTENCY "A-SPECIAL" OR NO. 2 SLUSHING OIL.

NOTES :-

1(a) Shunt and Fouling Connectors for turnout shall be arranged similar to one end of crossover. At derail or clearance point in Cab Signal Territory, arrangement shall be in accordance with Figure F or H (see note 3)

(b) At clearance point of turnout, where derail is not used, locate Circuit Controller as indicated by Mark on tie of Main Track and pipe connect it to T-20 Mechanism.

(c) At clearance point of turnout, where derail is used, locate Circuit Controller as indicated by S or J

2. Shunt and Fouling Connectors where passing along ties shall be stapled near top of tie.

3. In Non-Cab Signal Territory, or trailing point switch in Cab Signal Territory, shunt connections in Figs. F & H are not necessary.

4 For Standard Circuits showing bonding and insulation of switches see Drawing S-803.

5 In Fig. H, pipe line to be arranged as indicated in full lines: where derail is in service apply controller as at J, where derail is not used apply controller as at K near clearance point.

6. Cables P_1 and P_2 shall each be 2-№6 single conductor non-metallic parkway cables, S. Cat. Ref. 2A-5751 for steam territory, and 2-№2/0 single conductor non-metallic parkway cables, S. Cat. Ref. 2A-3031, for A-C elect. territory.

7. For the №6-19 strand cable apply BURNDY terminal YAV26-L3 or equal: USING BURNDY HYTOOL MY 28, or equal for pressing terminal to either cable. BURNDY terminal YAV 26-L3 or equal: USING BURNDY HYTOOL MY 28, or equal for pressing terminal to either cable. Where the №6-19 strand cable is applied to AAR binding post use BURNDY terminal YAV6C-L4, or equal.

SPECIFICATION

MATERIAL

1. PURPOSE:
The purpose of this specification is to provide material adequate for the protection of insulated wires.

2. KIND OF WOOD:
Red cypress, cedar, or redwood.

3. GENERAL QUALITY:
(a) Trunking and capping shall be free from any defects which will impair the durability, strength or water tightness of the piece, such as decay, holes, splits, shakes, large, loose or numerous knots, or wane, and be free of sap wood elsewhere than on bottom corners of trunking.
(b) Sapwood shall not be wider than 1½ inches, measured across the face of sap.

4. STRENGTH:
Trunking and capping shall be of compact wood, and have an average of six (6) or more rings of annual growth per inch.

5. DIMENSIONS:
All trunking and capping shall conform to the dimensions specified, and may be 8 to 20 feet long; but 50 per cent. of each shipment shall be 16 to 20 feet in length; 35 per cent. shall be 10 feet and over.

6. MANUFACTURE:
All trunking and capping shall be straight, well manufactured and surfaced on all exterior planes, with ends sawed square.

7. INSPECTION:
(a) Trunking and capping will be rejected when decayed, or split more than ¼ inch deep and 6 inches in length.
(b) A shake is a separation of one ring of annual growth from another.
(c) A large knot is one more than 1 inch in diameter in capping and more than 2 inches in diameter in trunking.
(d) A loose knot is one not firmly held in place by growth or position.
(e) Numerous knots are any number equalling a large knot in damaging effect.
(f) Wane is bark, or lack of wood from any cause on corners.
(g) Trunking and capping is not well sawed and surfaced, and trunking is not well grooved, when their surfaces are not even.
(h) All dimension requirements are minimum measurements. An excess of ¼ inch in outside dimensions, and of ⅛ inch in groove dimensions are maximum tolerances.
(i) Trunking and capping will be inspected at points of shipment by Pennsylvania Railroad System Inspectors. The Manufacturer shall afford the Inspector, free of cost, all reasonable facilities to satisfy him that the trunking and capping supplied is in accordance with this specification.

FIELD WORK

1. Top of trunking, inside of ballast line, shall be level with the surface of the ballast.
2. Where trunking and capping is above ground, the exposed surface shall be given not less than two (2) coats of SLATE COLORED FIRE RETARDING PAINT that meets the approval of the Chief Signal Engineer.
3. After fire retarding paint is applied, the top of capping for cross runs, running under tracks, other than for track connections, shall be covered, from the ballast line, with sheet steel of number 16 U. S. Standard gauge, except under and two inches each side of the rail.
4. Capping, where run lengthwise, shall be secured to built up trunking by ⅜" x 3½" lag screws with flat washers.
5. The joints in capping and bottom of built up trunking, shall be staggered not less than 1 foot in relation to the joints in the sides.
6. All joints in grooved trunking shall be reenforced on the bottom with a piece of capping ten inches long and the width of the trunking.
7. Nails shall not be driven through the trunking from the inside of the groove, nor shall they be driven into the groove from the outside.
8. Inside corner of trunking at turns shall be rounded to prevent injury to wire insulation.

REVISIONS.
REDRAWN FROM APPROVED PLAN S-186-A DATED 4-25-21 AND REVISED C. SEPTEMBER 6, 1929.

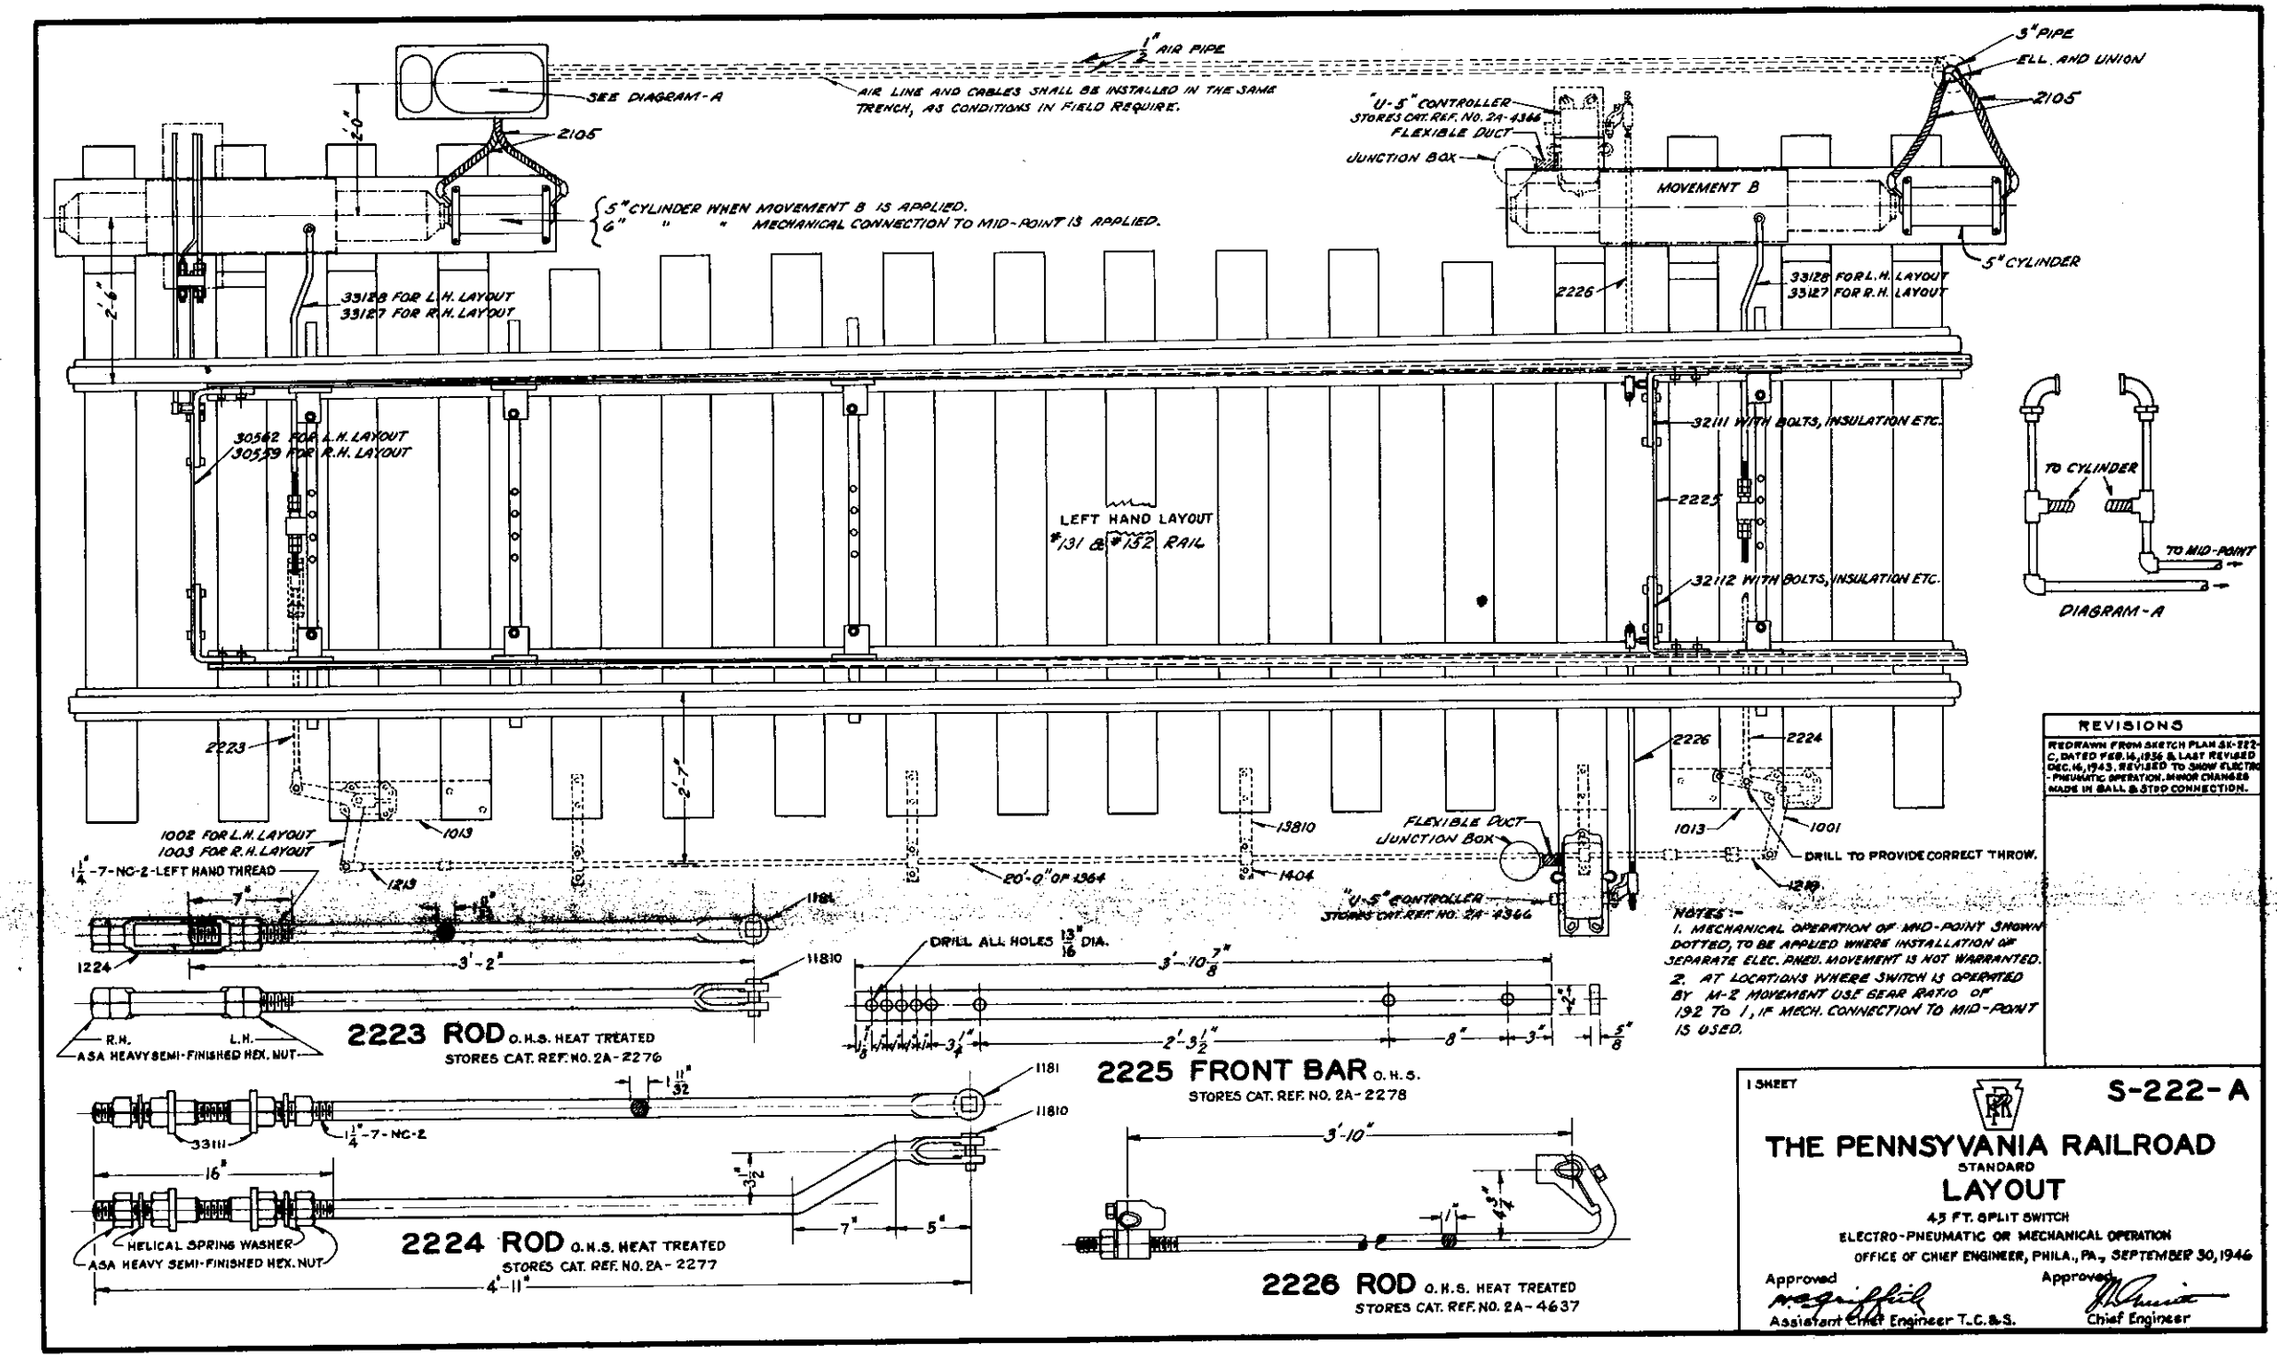
SWITCH CIRCUIT CONTROLLER CONNECTION

OFFICE OF CHIEF SIGNAL ENGINEER, PHILA., PA., SEPT. 11, 1924.

Approved A.H. Rudd
Chief Signal Engineer

Approved
Chief Engineer



REVISIONS

REDRAWN FROM SKETCH PLAN SK-722-C, DATED FEB. 14, 1936 & LAST REVISED DEC. 16, 1943. REVISED TO SHOW ELECTRO-PNEUMATIC OPERATION. MINOR CHANGES MADE IN BALL & STUD CONNECTION.

NOTES:-

1. MECHANICAL OPERATION OF MID-POINT SHOWN DOTTED, TO BE APPLIED WHERE INSTALLATION OF SEPARATE ELEC. PNEU. MOVEMENT IS NOT WARRANTED.
2. AT LOCATIONS WHERE SWITCH IS OPERATED BY M-2 MOVEMENT USE GEAR RATIO OF 192 TO 1, IF MECH. CONNECTION TO MID-POINT IS USED.

Chief Engineer

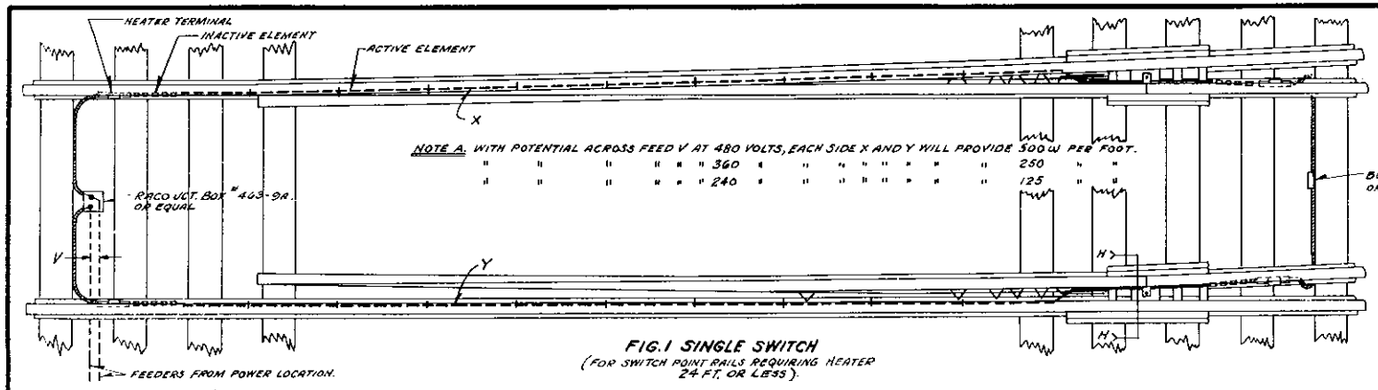

FIG. 1 SINGLE SWITCH
(FOR SWITCH POINT RAILS REQUIRING HEATER 24 FT. OR LESS).

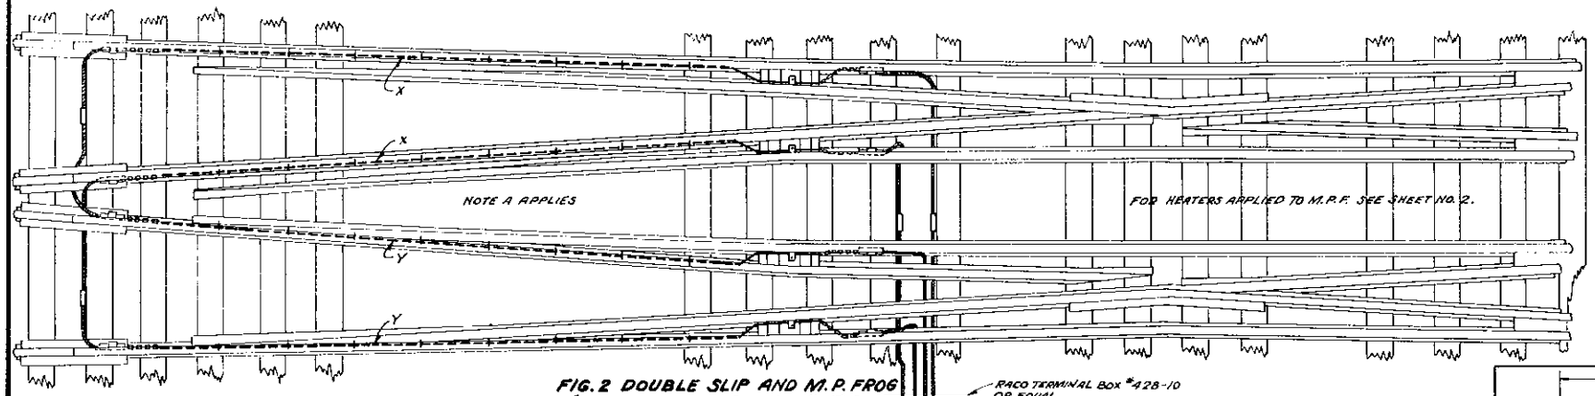

FIG. 2 DOUBLE SLIP AND M.P. FROG
(FOR SLIP SWITCH RAILS REQUIRING HEATER 24 FT. OR LESS).

RACO TERMINAL BOX #428-10 OR EQUAL
FEEDERS FROM POWER LOCATION.
V

NOTES:-

GENERAL - APPLIES TO ALL HEATERS.

1. THE APPLIED HEATERS SHALL MEET THE REQUIREMENTS OF SPEC. C.E. 252(a) AND M.W. DWG. 69898, OR APPROVED REVISIONS THEREOF, TO SUIT CONDITIONS OF INSTALLATION.
2. THE ACTIVE ELEMENT OF HEATER SHALL BE CARRIED OVER THE HEEL BLOCK TO THE FAR END, THE INACTIVE PORTION TERMINATED THELVE INCHES BEYOND, EXCEPT AT HEEL END OF M.P.F. SWITCH RAIL, WHERE TERMINAL SHALL BE LOCATED TO SUIT LOCAL CONDITIONS.
3. THE ACTIVE HEATING ELEMENT SHALL EXTEND TWO FEET BEYOND SWITCH POINT, THE HEATER TERMINAL BEING MOUNTED AS INDICATED IN FIG. I (SEE FIG. H) WHERE THE NEAREST JOINT BAR PERMITS. WHERE THIS IS NOT PRACTICABLE THE HEATING ELEMENT SHALL EXTEND BEYOND THE SWITCH POINT THE MAXIMUM DISTANCE PERMITTED BY FIELD CONDITIONS, MOUNTING TERMINAL AS INDICATED IN FIG. O.
4. AT THE TERMINAL, THE INACTIVE PORTION OF CALROD SHALL BE SO FORMED AS TO PERMIT THE TERMINAL TO REST LOOSELY IN CLIP AS SHOWN IN FIG. N. WHERE SUFFICIENT DISTANCE BETWEEN SWITCH POINT AND NEAR END OF JOINT BAR DOES NOT PERMIT MOUNTING THE TERMINAL AS INDICATED IN FIG. N, THE INACTIVE PORTION SHALL BE FORMED SO THAT TERMINAL MAY BE SUPPORTED BY THE FIRST JOINT BAR BOLT IN ACCORDANCE WITH FIG. O.
5. FEEDER CONDUCTORS FROM POWER LOCATION, AS INDICATED ON THIS DRAWING ARE TYPICAL, THEY SHALL BE ARRANGED TO MEET THE CONDITIONS IN THE FIELD AS TO TYPE OF POWER USED, CURRENT CONSUMPTION AND METHOD OF INSTALLATION.
6. POWER SUPPLY AND EQUIPMENT SHALL BE IN ACCORDANCE WITH SPECIFICATION C.E. 500 AND C.E. 501.
7. INACTIVE PORTION OF CALROD SHOWN THUS □□□□□
8. WHERE INTERFERENCE TO THE MOUNTING OF HEATER BENEATH HEAD OF RAIL EXISTS, DUE TO REINFORCING BAR, FOOTGUARD, OR OTHER SWITCH DEVICES, ARRANGEMENT SHALL BE MADE TO GRIND SUCH DEVICES TO PROVIDE SUFFICIENT CLEARANCE FOR HEATER AS REQUIRED BY M.W. DRAWING NO 69898 F.
9. WRAP RUBBER TAPE AND ADHESIVE TAPE AROUND HYLINKS YSGC-L.
10. APPLY $\frac{5}{8}$" RUBBER HOSE (SINGLE PLY FABRIC) TO COVER LEADS BETWEEN TERMINALS AND HYLINKS AND PARKWAY RISERS. STAPLE LEADS TO TIES.
11. USE BURNDY OR EQUAL, TERMINALS ON WIRES IN RISERS, APPLIED WITH PROPER CRIMPING TOOL.
12. CALROD SHALL BE SECURED TO WEB OF RAIL AS PER M.W. DWG. 69898 F EXCEPT, AT CENTER OF SWITCH RAIL, CALROD SHALL BE CLAMPED TO PREVENT MOVEMENT.

OPERATION - A.C. OR D.C.

FOR A.C. OPERATION.

(a) EACH HEATER X AND Y FIGS. 1 & 2 (SH. 1) 24 FT. OR LESS IN LENGTH OF ACTIVE ELEMENT, IS RATED 500 WATTS PER FT. AT A POTENTIAL OF 240 VOLTS, AND CONNECTED IN SERIES. THIS ARRANGEMENT WILL PROVIDE WATTAGE IN ACCORDANCE WITH NOTE "A" FIGS. 1 & 2 (SH. 1).
(b) EACH HEATER X AND Y FIGS. 3 & 4 (SH. 2) OVER 24 FT. IN LENGTH OF ACTIVE ELEMENT, IS RATED 500 WATTS PER FOOT AT A POTENTIAL OF 480 VOLTS, AND CONNECTED IN MULTIPLE. THIS ARRANGEMENT WILL PROVIDE WATTAGE IN ACCORDANCE WITH NOTE "B" FIGS. 3 & 4 (SH. 2).

FOR D.C. OPERATION.

(a) EACH HEATER X AND Y FIGS. 5 & 6 AND F^1 & F^2 FIG. 6 (SH. 2) OF ALL LENGTHS OF ACTIVE ELEMENT, IS RATED 500 WATTS PER FT. AT A POTENTIAL OF 700 VOLTS, AND NORMALLY CONNECTED IN SERIES. WHEN CONNECTED IN SERIES, OR IN MULTIPLE THIS ARRANGEMENT WILL PROVIDE WATTAGE IN ACCORDANCE WITH NOTE "C" FIG. 5 & 6 (SH. 2)

FIELD NOTES:-

IN JUNCTION & TERMINAL BOXES, ETC., WHERE IT IS PRACTICABLE, CABLES SHALL BE TERMINATED BY APPLYING BURNDY HYLUGS, OR EQUAL, AS FOLLOWS:-
(a) FOR #6-19 STRANDS CABLE USE YAVGC-L10 FOR $\frac{1}{4}$" TERMINAL POST. YAVGC-L4 FOR AAR BINDING POST.
(b) FOR #2/0-61 STRANDS CABLE USE YAV25E-L38 FOR $\frac{1}{2}$" TERMINAL POST. YAV25E-L28 FOR AAR BINDING POST
(c) FOR #4/0 19 STRANDS USE YSGC-L (HYLINK)
TO APPLY (a) & (c) USE HYTOOL MY14G C.
TO APPLY (b) USE HYTOOL MY2926-1

ALTERNATE CLAMP - 25E-148 CLAMPS, BRASS WITHOUT SCREWS 3RD-RAIL LIGHTING, MACHINED AND TAPPED FOR SET SCREWS. L.I.R.R. DWG 7770-16 (FOR ALTERNATE CADWELD CABLE CONNECTION - SEE FIGURES F & G ON SHEET 2 OF THIS DRAWING.)

8 — 25E-G763. SWITCH, HEATER, 600-V, 60 AMPS, FUSED UNDER BLADE, QUICK BREAK, REF. G52-2, DWG. 1054, SHIELD ELECTRIC CO.

9 — 25E-1274. FUSE, ENCLOSED, FERRULE CONTACT, NEC STANDARD, 60 AMPS, 600 VOLTS

10 — NON-METALLIC BOX, WITH HINGED LID, TO BE MADE BY FIELD FORCES.

11 — NON-METALLIC BOX TO BE MADE BY FIELD FORCES.

12 — 2A-SPECIAL. CABLE, SINGLE-CONDUCTOR, NON-METALLIC, UNDERGROUND, #6 AWG, 7-STRAND, ANNEALED COPPER, INSULATION IN ACCORDANCE WITH SPECIFICATION C.E. 210 OR 112C-SECT. 601 FOR 750-VOLT SERVICE.

13 — HEATERS ARE FURNISHED WITH TEN-FOOT LEADS UNLESS OTHERWISE SPECIFIED IN THE PURCHASE ORDER. WHEN NECESSARY TO SPLICE ADDITIONAL CABLE TO THE HEATER CABLE LEADS, THE ADDITIONAL CABLE SHALL BE:
FOR A-C SERVICE: — 2A-SPECIAL. CABLE, SINGLE-CONDUCTOR, NON-METALLIC, UNDERGROUND #6 AWG, 37-STRAND, ANNEALED COPPER, INSULATION IN ACCORDANCE WITH SPECIFICATION C.E. 210 OR 112C-SECT. 601 FOR CIRCUITS OF 600 VOLTS OR LESS.
FOR D-C SERVICE: USE CABLE SAME AS ITEM 12.

14 — 2A-SPECIAL. RACO TERMINAL BOX #463-108, OR EQUAL, WITH TWO WATER-PROOF BOX CONNECTORS TO FIT CABLE SIZE.

15 — 2A-SPECIAL. RACO TERMINAL BOX #463-107, OR EQUAL WITH FOUR WATER-PROOF BOX CONNECTORS TO FIT CABLE SIZE.

16 — 2A-SPECIAL. RACO TERMINAL BOX #428-74 OR EQUAL WITH FOUR WATER-PROOF BOX CONNECTORS ON BACK SIDE TO FIT CABLE SIZE. PROVIDE ONE SIX-POST #390 RACO UNIVERSAL TERMINAL, OR EQUAL.

17 — 2A-SPECIAL. RACO TERMINAL BOX #428-73, OR EQUAL WITH SIX WATER-PROOF BOX CONNECTORS (FOUR ON BACK SIDE AND TWO ON FRONT SIDE) TO FIT CABLE SIZE. PROVIDE TWO SIX-POST #390 RACO UNIVERSAL TERMINALS, OR EQUAL.

DETAILS FOR FORMING CADWELD TERMINALS
FIG. G

SPECIAL INSTRUCTIONS - SEE FIG. G
1- CABLE AND SLEEVE MUST BE BRIGHT, CLEAN, AND DRY.
2- LET CABLE EXTEND 1/32" TO 1/16" BEYOND END OF SLEEVE (AS SHOWN IN a).
3- PLACE CABLE AND SLEEVE IN HAMMER DIE (AS SHOWN IN b).
4- FORM CABLE AND SLEEVE IN HAMMER DIE TO MAKE TERMINAL (AS SHOWN IN c).

NOTES

1- ORDERING INFORMATION: HEATER, ELECTRIC, TUBULAR TYPE, IN ACCORDANCE WITH LATEST EDITION OF AAR ELECTRICAL SECTION MANUAL, SECTION II, CHAPTER 2, PART 4, SPECIFICATION FOR TUBULAR TYPE ELECTRIC HEATERS FOR TRACK SWITCHES. ACTIVE LENGTH (SPECIFY ONE FOOT LESS THAN LENGTH OF SWITCH), 500 WATTS PER FOOT FOR ONE HALF OF HEATER AND 300 WATTS PER FOOT FOR OTHER HALF AT (SPECIFY 650, 460, OR 230) VOLTS, (SPECIFY WITH OR WITHOUT MOUNTING SUPPORTS, BOLTS, ETC.) FOR (SPECIFY SIZE RAIL). INCLUDE ALL TESTS IN ABOVE SPECIFICATION INCLUDING TESTS 10B.

2(a) - (HEATERS FOR MOVABLE POINT FROGS, A-C POWER SUPPLY) ORDERING INFORMATION: SAME AS 1 EXCEPT THE ACTIVE LENGTH OF HEATERS SHALL BE NO LONGER THAN TWICE THEIR CENTER SWITCH-POINT LENGTHS, PLUS THE DISTANCE BETWEEN THE TWO FACING CENTER SWITCH-POINTS MINUS SIX FEET. HEATERS SHALL BE RATED 500 WATTS PER FOOT FOR THEIR ENTIRE ACTIVE LENGTH AT ONE HALF RATED VOLTAGE (FOR SERIES CONNECTION).

2(b) - (HEATERS FOR MOVABLE POINT FROGS, D-C POWER SUPPLY) ORDERING INFORMATION: SAME AS 2(a) EXCEPT HEATERS SHALL BE RATED 500 WATTS PER FOOT FOR THEIR ENTIRE LENGTH AT 650 VOLTS (FOR PARALLEL CONNECTION).

3 - RATED VOLTAGE OF HEATERS FOR TRACK SWITCHES, A-C SUPPLY, SHALL BE 460 (PREFERRED) OR 230. RATED VOLTAGE OF HEATERS FOR TRACK SWITCHES, D-C SUPPLY, SHALL BE 650.

4 - FOR TRACK SWITCHES THE ACTIVE PART OF THE HEATER SHALL EXTEND APPROXIMATELY TWO FEET AHEAD OF THE POINT OF SWITCH. (THE FIRST 12 INCHES OF SHEATH IS INACTIVE). THE HIGHER WATTAGE (500 WATTS PER FOOT) END OF THE HEATER SHALL BE INSTALLED TOWARD THE POINT OF SWITCH. THE WORD POINT IS STAMPED ON THE HIGHER WATTAGE END OF HEATER. THE LOWER WATTAGE (300 WATTS PER FOOT) END OF THE HEATER SHALL EXTEND BACK TOWARD THE HEEL BLOCK ENDING SHORT OF THE HEEL BLOCK. THE CABLE LEAD SHALL BE TAKEN UNDER THE HEEL BLOCK THEN UNDER THE RAIL BASE TO THE TERMINAL BOX.

5 - THE HEATERS SHALL BE LOCATED AS HIGH AS PRACTICABLE ON THE INSIDE OF THE WEB OF THE STOCK RAIL (SEE FIG. A). THE HEATERS SHALL BE INSTALLED SO THAT THE INFORMATION STAMPED ON THE TERMINAL HOUSING OR ON THE HEATER SHEATH SHALL BE LOCATED APPROXIMATELY 45 DEGREES FROM THE VERTICAL AXIS OF THE RAIL POINTING UPWARD.

6 - HEATERS SHALL BE SECURED TO THE WEB OF THE RAIL BY MEANS OF HEATER SUPPORTS SPACED 18" TO 24" APART, TO CLEAR BOLTS AND RIVETS IN REINFORCING BAR, IT WILL BE NECESSARY IN SOME CASES TO GRIND THE SWITCH POINT AND REINFORCING BAR TO ALLOW A MINIMUM CLEARANCE OF 5/16 (SEE FIG. A). ONE HEATER SUPPORT SHALL BE LOCATED ON RAIL JUST AHEAD OF THE POINT OF SWITCH.

7 - SPECIAL SUPPORTS SHALL BE PROVIDED FOR ATTACHING TERMINAL HOUSING TO RAIL WHERE SEPARABLE HOUSINGS ARE USED (SEE FIG. B) ON SWITCH POINT WHERE NEAREST JOINT BAR DOES NOT PERMIT, THE HEATING ELEMENT SHALL EXTEND BEYOND THE SWITCH POINT THE MAXIMUM DISTANCE PERMITTED BY FIELD CONDITIONS, MOUNTING TERMINAL HOUSING AT THE FIRST JOINT BAR BOLT AS INDICATED IN FIG. C.

8 - ALL SUPPORTS SHALL BE SECURED BY MEANS OF 5/8 CORROSION RESISTANT BOLT, LOCKWASHER, AND SELF-LOCKING NUT (EVERDUR 1015 BRONZE OR EQUAL). BOLT HOLE SHALL BE 5/8 DRILLED IN THE WEB OF THE RAIL AT THE NEUTRAL AXIS (SEE FIG. A). IF REQUIRED THE HEAD OF THE SUPPORT BOLT SHALL BE GROUND TO PROVIDE 5/16 CLEARANCE BETWEEN BOLT HEAD AND REINFORCING BAR OF THE SWITCH POINT (SEE FIG. A). A HEATER SUPPORT SHALL BE PLACED AGAINST BOTH ENDS OF THE ANTI-CREEP COLLAR OR SPLICE, WHERE USED, TO PREVENT LONGITUDINAL MOVEMENT OF HEATERS DUE TO VIBRATION OR EXPANSION AND CONTRACTION. WHERE ANTI-CREEP COLLARS OR SPLICES ARE NOT USED AN ANTI-CREEP CLAMP SHALL BE USED AT THE MIDPOINT OF THE HEATER FIRM AGAINST THE HEATER.

9 - AT MOVABLE POINT FROGS IN AREA OF KNUCKLE REINFORCING, TO PERMIT INSTALLATION OF HEATER, PORTION OF CLIP WASHER FOR TRACK BOLT SHOULD BE REMOVED.

10 - CABLE LEADS BETWEEN HEATER AND TERMINAL BOXES SHALL BE SO LOCATED AS TO MINIMIZE POSSIBLE DAMAGE. LEADS SHALL BE ENCASED IN 5/8 RUBBER HOSE WHERE POSSIBLE.

11 - TERMINAL BOXES SHALL BE LOCATED AS CLOSE AS POSSIBLE TO THE ENDS OF THE HEATERS, PREFERABLY OUTSIDE OF TIES, WITH TOP OF BOX APPROXIMATELY AT THE LEVEL OF THE TOP OF TIE.

12 - IN JUNCTION AND TERMINAL BOXES, WHERE IT IS PRACTICABLE, CABLES SHALL BE TERMINATED BY APPLYING PROPER SIZE BURNDY HYLUG 5, OR EQUAL.

13 - EACH GROUP OF HEATERS SERVING A TRACK SWITCH SHALL BE PROVIDED WITH SUITABLE FAULT PROTECTION, PREFERABLY THERMAL BREAKERS. THE PROTECTIVE UNITS SO PROVIDED SHALL BE HOUSED IN A WEATHER-PROOF BOX LOCATED AS CLOSE AS POSSIBLE TO THE CENTER OF THE LOAD.

14 - FEEDER CABLES FROM POWER LOCATION AS INDICATED ON SHEET 1 OF THIS DRAWING ARE TYPICAL, THEY SHALL BE ARRANGED TO MEET THE CONDITIONS IN THE FIELD.

15 - IN A-C ELECTRIFIED TERRITORY POWER SUPPLY AND APPARATUS SHALL BE IN ACCORDANCE WITH SPECIFICATIONS C.E. 500, PART X, PARAGRAPH 1002 AND C.E. 501, PART XI. IN NON-ELECTRIFIED TERRITORY APPARATUS SHALL BE APPROVED BY THE CHIEF ENGINEER.

WHEN A T-20 MOVEMENT IS EQUIPPED WITH SEPARATE LOCK BAR, LOCKING THE LOCK ROD WITH SWITCH IN BOTH NORMAL AND REVERSE POSITIONS, USE LOCK RODS AS SHOWN IN FIGS. 23 AND 24.

NOTES:
1. PLUNGER OR LOCKING DOG FOR LOCKING LOCK RODS FOR SWITCH MOVEMENTS, WILL ENTER LOCK RODS AS FOLLOWS:-
2. FOR A1 AND A5, FIRST INTO TOP SMALL NOTCH IN STRAIGHT LOCK ROD FOR BOTH LEFT HAND AND RIGHT HAND LAYOUTS WHEN SWITCH IS IN THE NORMAL POSITION.
3. FOR M-M2-M10-M22- FIRST INTO BOTTOM SMALL NOTCH IN BENT LOCK ROD FOR RIGHT HAND LAYOUT, AND INTO TOP SMALL NOTCH IN STRAIGHT LOCK ROD FOR LEFT HAND LAYOUT, BOTH WITH SWITCH IN THE NORMAL POSITION.
4. FOR MODEL 14, FIRST INTO TOP LARGE NOTCH IN STRAIGHT LOCK ROD FOR BOTH R.H. AND L.H. LAYOUTS WHEN SWITCH IS IN THE NORMAL POSITION.
5. FOR T-20 OR S-20 WITH SWITCH LOCKED NOR. ONLY, LOCK BAR ENTERS SMALL NOTCH IN LOCK ROD, WHICH IS LOCATED IN FAR LOCK ROD SPACE, FOR BOTH R.H. & L.H. LAYOUTS.
6. FOR T-20 WITH SWITCH LOCKED BOTH NOR. AND REV., SEE FIGS. 23 & 24. LOCK BAR ENTERS LARGE OR SMALL NOTCH FIRST, DEPENDING UPON CONDITIONS.
7. FOR T-10 WITH SWITCH LOCKED NORMAL ONLY, FIRST INTO TOP LARGE NOTCH IN STRAIGHT LOCK ROD FOR BOTH RIGHT HAND AND LEFT HAND LAYOUTS, WHEN IN THE NOR. POSITION.
8. FOR T-10 WITH SWITCH LOCKED BOTH NOR. AND REV., FIRST INTO TOP LARGE NOTCH IN STRAIGHT LOCK ROD, FOR BOTH RIGHT HAND AND LEFT HAND LAYOUTS, WHEN IN THE NOR. POSITION.
9. FOR TYPE G, FIRST INTO TOP SMALL NOTCH IN BENT LOCK ROD FOR BOTH RIGHT HAND AND LEFT HAND LAYOUTS WHEN SWITCH IS IN THE NORMAL POSITION.
10. FOR PLUNGER LOCK WITH SWITCH LOCKED NORMAL ONLY, FIRST INTO TOP SMALL NOTCH IN STRAIGHT LOCK ROD, WHEN IN THE NORMAL POSITION.
11. FOR PLUNGER LOCK WITH SWITCH LOCKED NORMAL AND REVERSE, FIRST INTO TOP LARGE NOTCH IN STRAIGHT LOCK ROD, FOR BOTH RIGHT HAND AND LEFT HAND LAYOUTS, WHEN SWITCH IS IN THE NORMAL POSITION.
12. OTHER COMBINATIONS OF LOCK RODS ARE SPECIAL. RODS SHOULD BE SELECTED FOR EACH INDIVIDUAL CASE.

Chief Engineer

-: FIELD WORK :-

1. A CIRCUIT CONTROLLER, PLAN S-221, SHALL BE CONNECTED TO AND OPERATED BY EACH DRAW WEDGE, DRAW LATCH, RAIL LIFT BEAM AND RAIL LOCK BAR. THE CIRCUIT CONTROLLER OPERATED BY RAIL LOCK BAR MUST BE CONNECTED AT FARTHEST POINT FROM OPERATING LEVER.

2. WHEN LOCKED, THE LOCKING BLOCK ON RAIL LOCK BAR, SHALL PASS 4" BEYOND FAR SIDE OF LOCKING TONGUE, WHEN UNLOCKED IT SHALL CLEAR LOCKING TONGUE 2".

3. CIRCUIT CONTROLLERS OPERATED BY DRAW WEDGES, DRAW LATCHES AND RAIL LOCK BARS SHALL BE ADJUSTED TO MAKE CONTACTS IN BOTH LOCKED AND UNLOCKED POSITIONS, CONTROLLERS OPERATED BY RAIL LIFT BEAM SHALL MAKE CONTACTS IN COMPLETE RAISED POSITION ONLY.

4. INSULATION SHALL BE PLACED IN PIPE LINES AND CONNECTIONS, IF NECESSARY, TO PREVENT THE GROUNDING OR SHUNTING OF TRACK CIRCUITS.

-: ENGINEERING REQUIREMENTS :-

1. (a) FOR SINGLE TRACK DRAW, USE ONE LEVER FOR LOCKING RAILS BOTH ENDS OF DRAW AND OPERATING ELECTRIC BRIDGE COUPLERS.

(b) FOR TWO TRACK DRAW, USE SEPARATE LEVER FOR LOCKING RAILS AND OPERATING ELECTRIC BRIDGE COUPLERS FOR EACH END.

2. (a) CIRCUITS THRU CIRCUIT CONTROLLERS SHALL BE SO ARRANGED THAT ALL RAILS MUST BE UNLOCKED (ELECTRIC BRIDGE COUPLERS BEING WITHDRAWN AT SAME TIME) BEFORE DRAW WEDGES AND DRAW LATCHES CAN BE WITHDRAWN AND RAIL LIFT BEAM CAN BE RAISED. DRAW WEDGES MUST BE ENTIRELY WITHDRAWN AND DRAW LATCHES AND RAIL LIFT BEAM RAISED PROPERLY BEFORE POWER CAN BE APPLIED TO SWING DRAW.

(b) IN RETURNING DRAW TO NORMAL POSITION CIRCUITS SHALL BE SO ARRANGED THAT DRAW MUST BE CENTERED WITH DRAW LATCH ENTIRELY DOWN BEFORE DRAW WEDGES CAN BE DRIVEN; DRAW WEDGES MUST BE DRIVEN PROPERLY AND RAIL LIFT BEAM DROPPED IN PLACE BEFORE LEVER OPERATING RAIL LOCKS AND ELECTRIC BRIDGE COUPLERS CAN BE OPERATED.

(c) TO MAKE THIS PROCEDURE IMPERATIVE, THE LOCK AND INDICATION CIRCUITS SHALL BE SO INTERCONNECTED WITH THE DRAW WEDGE AND SWING CONTROLS THAT ALL OPERATIONS OF SIGNAL AND DRAW MACHINERY MUST SUCCEED EACH OTHER IN THE PROPER PREDETERMINED ORDER.

3. THE CONTROLLING FONCTIONS OF OTHER TYPES OF DRAWBRIDGES SHALL CONFORM TO THESE SAME GENERAL PRINCIPLES.

REVISIONS

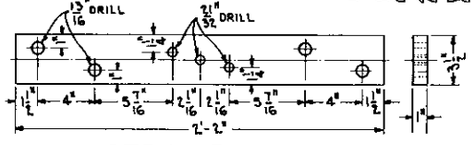
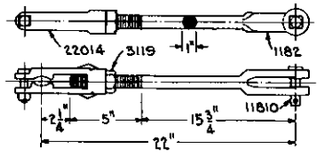
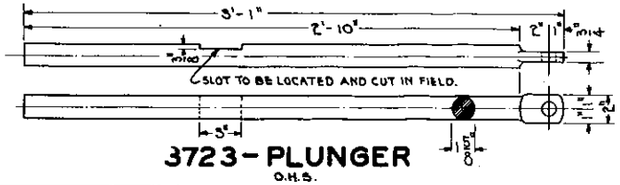
O.H.S.



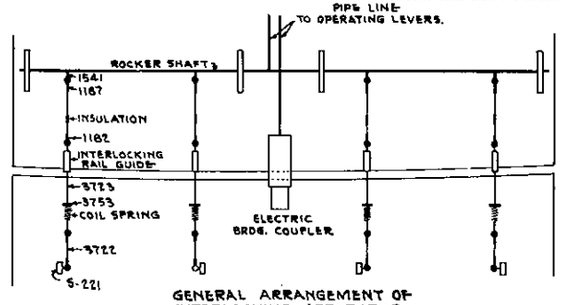
3724 – PLATE
O.H.S.



3722 – CONNECTOR



3723 – PLUNGER
O.H.S.



GENERAL ARRANGEMENT OF INTERLOCKING APPARATUS.

ENGINEERING REQUIREMENTS

1. (a) FOR EACH FOUR RAIL LOCKS, USE ONE LEVER, AND A SEPARATE LEVER FOR OPERATING THE ELECTRIC BRIDGE COUPLERS.
(b) PROVIDE MECHANICAL OR ELECTRICAL LOCKING SO THAT THE RAIL LOCKING LEVER MUST BE IN THE UNLOCKED POSITION BEFORE THE LEVER FOR OPERATING THE ELECTRIC BRIDGE COUPLER IS PUT NORMAL (COUPLER DISENGAGED).
2. (a) CIRCUITS SHALL BE SO ARRANGED THAT ALL RAILS MUST BE UNLOCKED, ELECTRIC BRIDGE COUPLERS WITHDRAWN BEFORE POWER CAN BE APPLIED TO WITHDRAW WEDGES AND RAISE LATCHES AND LIFT BEAMS. DRAW WEDGES MUST BE ENTIRELY WITHDRAWN AND DRAW LATCHES AND RAIL LIFT BEAMS RAISED PROPERLY BEFORE POWER BE APPLIED TO SWING DRAW.
(b) IN RETURNING DRAW TO CLOSED POSITION, CIRCUITS SHALL BE SO ARRANGED THAT DRAW MUST BE CENTERED WITH DRAW LATCH ENTIRELY DOWN BEFORE DRAW WEDGES CAN BE DRIVEN; DRAW WEDGES MUST BE DRIVEN PROPERLY AND RAIL LIFT BEAMS DROPPED IN PLACE BEFORE LEVERS OPERATING ELECTRIC BRIDGE COUPLERS AND RAIL LOCKS CAN BE THROWN.
(c) TO MAKE THE PROCEDURE OUTLINED EFFECTIVE, THE CIRCUITS SHALL BE SO INTERCONNECTED WITH THE DRAW WEDGE AND SWING CONTROLS THAT ALL OPERATIONS OF SIGNAL AND DRAW MACHINERY MUST SUCCEED EACH OTHER IN THE FOLLOWING PREDETERMINED ORDER:—

TO OPEN DRAW

(a) SIGNALS AND SMASHBOARD NORMAL.
(b) TROLLEY CARRIERS WHEN REQUIRED, OPEN.
(c) RAIL LOCKS WITHDRAWN.
(d) BRIDGE COUPLERS WITHDRAWN.
(e) WITHDRAW WEDGES, RAISE RAILS AND LATCHES.
(f) TURN BRIDGE.

TO CLOSE DRAW

THE ABOVE ORDER OF OPERATION SHALL BE REVERSED.

FIELD WORK

1. A CIRCUIT CONTROLLER, PLAN S-221, SHALL BE CONNECTED TO AND OPERATED BY EACH DRAW WEDGE, DRAW LATCH, RAIL LIFT BEAM AND RAIL LOCK PLUNGER FOLLOWER. CIRCUIT CONTROLLERS SHALL BE CONNECTED TO EACH TROLLEY CLOSING DEVICE WHEN REQUIRED. ELECTRIC OR MECHANICAL LOCKING SHALL BE PROVIDED TO LOCK THE BRIDGE AND RAIL OPERATING CLUTCHES IN PROPER SEQUENCE.
2. ELECTRICAL BRIDGE COUPLERS SHALL BE EQUIPPED WITH CONTACTS TO INDICATE WHEN THE COUPLER IS NORMAL (COUPLER DISENGAGED) AND REVERSE (COUPLER CLOSED).
3. WHEN LOCKED, THE RAIL LOCKING PLUNGER SHALL ENTER LOCKING HOLE FULL THICKNESS OF BRIDGE SEAT CASTING, LESS 1/4", WHEN UNLOCKED IT SHALL CLEAR THE LOCKING HOLE, NOT LESS THAN 3 INCHES.
4. CIRCUIT CONTROLLERS OPERATED BY DRAW WEDGES, DRAW LATCHES AND RAIL LOCKING PLUNGERS, SHALL BE ADJUSTED TO MAKE CONTACTS IN BOTH THE LOCKED AND UNLOCKED POSITIONS; CONTROLLERS OPERATED BY THE RAIL LIFT BEAM SHALL MAKE CONTACTS IN RAISED AND SEATED POSITIONS.
5. INSULATION SHALL BE PLACED IN PIPE LINES AND CONNECTIONS, IF NECESSARY, TO PREVENT THE GROUNDING OR SHUNTING OF TRACK CIRCUITS.
6. CIRCUIT CONTROLLERS CONNECTED TO WEDGES SHALL BE SO ADJUSTED THAT THE CIRCUITS WILL OPEN IF WEDGES ARE NOT FULLY DRIVEN, OR IF DRIVEN TOO FAR.

NOTES:
1. SIGNAL ASPECTS INDICATED IN DIAGRAM D SHALL BE ORDERED FROM TABLE O AND SHALL BE FURNISHED COMPLETE WITH HUB, NECESSARY RADIAL ARMS, TERMINAL BOX, FLEXIBLE CONDUIT, CABLE OUTLETS, WIRING BETWEEN TERMINAL BOX AND LIGHT UNITS, BACKGROUND AS INDICATED, BOLTS, NUTS, ETC FOR ATTACHING TO 5 INCH MAST. USE ORDER NUMBER FOR TOP ARM AND LETTER FOR BOTTOM ARM. WHEN ORDERING MARKER H FOR USE ON BOTTOM ARM REQUISITION SHOULD SPECIFY FOR APPLICATION TO 5 INCH MAST OR 1¼ INCH PIPE.
2. ALL OPENINGS IN BACKGROUND SHALL BE CUT, THOSE NOT USED SHALL BE COVERED WITH COPPER BEARING SHEET STEEL DISCS.
3. TAKE SIDING INDICATOR SHALL NOT BE PROVIDED WITH BACKGROUND.
4. SIGNALS FOR BRIDGES SPANNING MORE THAN SIX TRACKS, AND WHERE DEPTH OF CHORDS IS OTHER THAN 6 FT. OR 7 FT., ARE SPECIAL; CROSS-SECTION OF BRIDGE CHORDS SHALL ACCOMPANY ORDER.
5. FOR ARRANGEMENT OF TERMINALS IN JUNCTION BOX, SEE P.R.R. DRAWING S-858.
6. WHERE NO DETAIL REFERENCE IS SHOWN, THE MANUFACTURER'S STANDARD APPARATUS SHALL BE FURNISHED.
7. WHEN REQUIRED, DRILL 5" MAST FOR WIRE AND CABLE OUTLETS AS INDICATED IN DIAGRAM H.
8. WHERE SIGNAL G1 OR G2 IS LOCATED BETWEEN TRACKS, THE CENTER LINE OF THE TRACKS SHALL BE SPACED 25'-0" C. TO C. WHERE PRACTICAL. MINIMUM TRACK CENTERS SHALL BE IN ACCORDANCE WITH CE-78.
9. IF SPECIAL COMBINATIONS ARE DESIRED FOR ROUNDEL AND COVER GLASS, SPECIFY ON ORDER.
10. PAINT SHALL BE APPLIED IN ACCORDANCE WITH A.A.R. SIG. SEC. SPECIFICATION 120, MANUAL PART 110. MANUFACTURER SHALL FURNISH THE POSITION LIGHT SIGNALS AND ALL PARTS THEREOF WITH A FINISH COAT OF DULL BLACK ENAMEL, S.C.R. 47-3208 APPLIED TO ALL EXTERIOR METAL PARTS. THE GROUND POLE SIGNALS SHALL, AFTER INSTALLATION, HAVE A FINISH COAT OF ALUMINUM PAINT, S.C.R. 47-3159 APPLIED TO THE MAST BASE AND ON THE MAST FOR A DISTANCE OF 6'-0" ABOVE THE SIGNAL FOUNDATION. ALL OTHER PARTS FLAT BLACK.

NOTES:-

1. MECHANISM DWG. 3564-71 IS "GRAVITY DOWN TYPE" (U.S.&S.CO.) FOR HIGHWAY ARM ONLY.
2. " " 3564-72 " " " " " " AND SIDEWALK ARMS.
3. " " 3564-181 " POWER " " " " " ARM ONLY.
4. " " 3564-182 " " " " " " AND SIDEWALK ARMS.
5. " " 3561-216L-90 IS GRAVITY " " (G.R.S.CO.) " SIDEWALK ARM ONLY.
6. " " 3564-72, 3564-71, X501-216L APPLIED WHERE ARMS ARE NOT OVER 34 FEET.
7. " " 3564-182, 3564-121 APPLIED WHERE ARMS ARE OVER 34 FEET OR OTHERWISE REQ.
8. PAINTING SHALL BE IN ACCORDANCE WITH AAR 316. SPEC. SPEC. No. 120 MANUAL PART 1-10 AND DWG. 169C. FRONT EXPOSED PORTIONS OF LIGHT UNITS, GATE LAMPS, HOODS AND BACKGROUNDS SHALL BE PAINTED WITH A FINISH COAT OF DUCO DULL FINISH BLACK S.C.R. 41-2020. ALL OTHER PARTS SHALL BE PAINTED ALUMINUM.
9. FOR SIDEWALK ARMS ONLY, USE FND. 4983, EXCEPT APPLY 4-4983D INSTEAD OF 6.
10. WHERE POWER LINES PASS HIGHWAY GATE ARMS, CARE SHOULD BE EXERCISED TO MAKE CERTAIN THAT GATE ARM WILL AT ALL TIMES BE SAFELY CLEAR OF SUCH POWER WIRES. GATE MECHANISMS SHALL BE GROUNDED.
11. GATE ARM LAMPS F1 AND F2 SHALL FLASH IN UNISON WITH THE HC81 UNITS, LAMP S SHALL SHOW STEADY LIGHT.
12. THE USE OF PHANKILL SHIELD TO THE HC81 UNITS TO BE MADE AS REQUIRED.
13. THE OPERATING MECHANISM SHALL MEET THE REQUIREMENTS OF AAR SIG. SEC. SPEC. No. 199, MANUAL PART 9K, AND SHALL BE COMPLETE WITH ALL PARTS READY FOR OPERATION AND CLAMPING TO STANDARD 5" PIPE.
14. FLASHING LIGHT SIGNALS SHALL BE MOUNTED ON SAME MAST AS CROSSING SIGN, BEING LOCATED IN ACCORDANCE WITH SHEET No. 1 OF THIS DRAWING.
15. PARTS MARKED WITH (A) REFER TO CURRENT ISSUE OF AAR SIG. SEC. DRAWINGS.
16. FOR CONTROL CIRCUITS FOR MECHANISMS, LIGHTS AND BELL SEE DRAWING S-460.
17. CROSSING SIGN (A) 16429, AS INDICATED, SHALL BE APPLIED AS STANDARD. OTHER CROSSING SIGN, ALSO ILLUMINATED STOP SIGN AAR SIG. SEC. DWG. 1656 E IN LIEU OF "STOP ON RED SIGNAL" SIGN ARE PERMISSIBLE WHERE REQUIRED BY LOCAL OR STATE AUTHORITIES.
18. STAINING OF GATE ARMS SHALL BE IN ACCORDANCE WITH AAR 516. SEC. DWG. No. 1491.
19. HIGHWAY GATE ARMS SHOULD NOT EXCEED 34 FEET IN LENGTH, EXCEPT WHEN REQUIRED BY STATE, LOCAL AUTHORITIES, OR LOCAL CONDITIONS. DRIVE DOWN TYPE MECHANISMS SHALL BE USED FOR GATES OVER 34 FT. IN LENGTH OR WHERE TROUBLE MAY BE ANTICIPATED FROM WIND, ICE OR SNOW.
20. LAMP S FOR SIDEWALK ARM SHALL BE LOCATED AT CENTER OF ARM. SEE TABLE HL FOR SPACING OF LAMPS ON HIGHWAY ARM.
21. WHEN ORDERING SPECIFY LENGTH L1 & L2 OF HIGHWAY AND SIDEWALK ARMS, IF ARMS ONLY, ALSO SPECIFY TYPE OF GATE ARM CASTING.
22. FOUNDATIONS SHALL BE ORDERED SEPARATELY.
23. FOUNDATION BOLTS SHALL NOT BE FURNISHED WITH FIGURES A, B & C.
24. ONE HIGHWAY CROSSING BELL, LOCATED ON TOP OF MAST, SHALL BE INSTALLED AT EACH CROSSING, EXCEPT WHERE LOCAL CONDITIONS, OR LOCAL, STATE, OR FEDERAL AUTHORITIES REQUIRE OTHERWISE.
25. INSTALLATION AND MAINTENANCE OF OPERATING MECHANISMS SHALL BE IN ACCORDANCE WITH MANUFACTURER'S INSTRUCTIONS.
26. SIDEWALK GATE ARM ONLY, ORDER NUMBER 4626 SHALL APPLY AT LOCATIONS WHERE OTHER GATE ARM MECHANISMS ARE OF THE SAME TYPE, PROVIDED THERE IS SUFFICIENT SPACE FOR PARTS TO CLEAR HIGHWAY. AT LOCATIONS WHERE THE CLEARANCE MENTIONED IS NOT SUFFICIENT AND AT LOCATIONS WHERE THE TYPE OF MECHANISM DOES NOT MAKE ANY MATERIAL DIFFERENCE, ORDER NUMBER 4627 SHALL BE APPLIED.
27. USE 10 V.-18 W. LAMPS PC. 151138 (U.S.&S.CO.) FOR "HC-81" UNITS AND FOR S, F1 & F2 LIGHTS ON GATE ARMS, WITH CIRCUITS ARRANGED TO PROVIDE 9.0 TO 9.5 VOLTS AT LAMPS.

LIGHT BEAMS:- FOR GROUND MASTS: FRONT AND BACK LIGHTS SHALL BE PROVIDED WITH 30° HORIZONTAL SPREAD AND 15° DOWNWARD DEFLECTING COVER GLASS. FOR UNUSUAL FIELD CONDITIONS SPECIAL LENS COMBINATIONS MAY BE OBTAINED.

THE PENNSYLVANIA RAILROAD
STANDARD
HIGHWAY CROSSING SIGNS
REFLECTORIZED ALUMINUM

OFFICE OF CHIEF ENGINEER,
PHILA., PA., MARCH 22, 1960.
APPROVED:—

CHIEF ENGINEER

SPECIFICATION FOR REFLECTOR UNITS.
(A.R.A. SIGNAL SECTION SPECIFICATION 15633.)

1. PURPOSE.
(a) THE PURPOSE OF THIS SPECIFICATION IS TO PROVIDE A REFLECTOR UNIT FOR REFLECTOR SIGNS FOR RAILROAD HIGHWAY GRADE CROSSING PROTECTION.

2. TENDER.
(a) THE TENDER SHALL BE FOR APPARATUS MEETING THE REQUIREMENTS OF THIS SPECIFICATION. IF THE CONTRACTOR WISHES TO VARY FROM THE SPECIFICATION, A TENDER MAY BE SUBMITTED COVERING THE APPARATUS HE DESIRES TO FURNISH. THIS TENDER SHALL BE ACCOMPANIED BY FULL INFORMATION SHOWING WHEREIN THE REQUIREMENTS OF THIS SPECIFICATION ARE NOT MET.

3. MATERIAL AND WORKMANSHIP.
(a) MATERIAL AND WORKMANSHIP SHALL BE FIRST-CLASS IN EVERY RESPECT.

4. TYPE.
(a) THE REFLECTOR UNIT SHALL BE OF THE SINGLE OR DOUBLE REFRACTION TYPE AND SHALL BE IN ACCORDANCE WITH PURCHASER'S REQUIREMENTS.

5. LENSES.
(a) THE LENS SHALL BE MADE OF CLEAR COLORLESS OR CANARY YELLOW GLASS OF UNIFORM REFLECTING POWER. IT SHALL BE ACCURATELY FORMED AND FREE FROM ALL DEFECTS WHICH WOULD AFFECT ITS OPTICAL OR PHYSICAL PROPERTIES. IT SHALL BE PRACTICALLY FREE FROM CHROMATIC ABERRATION WHEN VIEWED WITHIN AN ANGLE OF 30 DEG. FROM ITS AXIS.
(b) THE LENS SHALL BE SO DESIGNED THAT A LIGHT AT ANY POINT WITHIN 30 DEG. OF THE AXIS OF THE LENS WILL BE REFLECTED TO A POINT 40 IN. ABOVE THE SOURCE WITH SATISFACTORY INTENSITY. THE SOURCE OF LIGHT SHALL BE AN APPROVED TYPE OF AUTOMOBILE HEADLIGHT AND SHALL BE LOCATED 300 FT. FROM REFLECTOR UNIT.

6. REFLECTOR UNITS.
(a) THE REFLECTOR UNIT SHALL BE OF SUBSTANTIAL DESIGN, ACCURATELY FORMED AND CONSTRUCTED FOR CORRECT FOCUS.
(b) IF THE REFLECTOR UNIT IS OF THE DOUBLE REFRACTION TYPE, IT SHALL BE ACCURATELY FITTED TO THE LENS AND THE TWO SHALL BE SEALED INTO A CORROSION RESISTING RETAINER SO AS TO FORM A JOINT THAT WILL PREVENT THE ADMISSION OF LIQUID OR GAS BETWEEN THE REFLECTOR AND LENS.
(c) IF THE REFLECTOR UNIT IS OF THE SINGLE REFRACTION TYPE, THE REFLECTOR BACKING SHALL CONSIST OF A HEAVY COAT OF METALLIC SILVER. IT SHALL BE HOMOGENEOUS, EVENLY APPLIED TO THE SURFACE OF THE GLASS AND BE SO FITTED AS TO FORM AN AIR-TIGHT JOINT BETWEEN IT AND THE GLASS. THE BACKING SHALL BE SUCH THAT IT WILL PREVENT THE ADMISSION OF AIR OR ANY FOREIGN SUBSTANCE BETWEEN IT AND THE GLASS. OVER THE REFLECTIVE BACKING SHALL BE PLACED A PROTECTIVE BACKING OF ONE HEAVY COAT OF METALLIC COPPER, AND OVER THIS COPPER PLATE A COATING OF PROTECTIVE MATERIAL WHICH SHALL SO SEAL THE BACKING AS TO RENDER IT WATERPROOF AND AIR-TIGHT.

7. MOUNTING.
(a) THE REFLECTOR UNIT SHALL BE DESIGNED SO AS TO ENTER THE APERTURE IN THE FACE OF SIGN FROM THE REAR AND SHALL BE HELD IN A FIXED RELATION TO THE FACE OF SIGN WITH ITS AXIS NORMAL TO THE APERTURE.
(b) THE REFLECTOR UNIT SHALL BE SO CONSTRUCTED THAT NOT MORE THAN 1/32 IN. OF THE RETAINER OR HOUSING SHALL BE EXPOSED TO VIEW WHEN THE REFLECTOR UNIT IS ASSEMBLED IN THE SIGN.

8. INSPECTION.
(a) PURCHASER MAY INSPECT MATERIAL AT ALL STAGES OF MANUFACTURE.
(b) PURCHASER MAY INSPECT THE COMPLETED PRODUCT TO DETERMINE THAT THE REQUIREMENTS OF THIS SPECIFICATION HAVE BEEN MET.
(c) IF MATERIAL HAS NOT BEEN ACCEPTED AT POINT OF PRODUCTION AND IF, UPON ARRIVAL AT DESTINATION, IT DOES NOT MEET THE REQUIREMENTS OF THIS SPECIFICATION, IT MAY BE REJECTED, AND THE CONTRACTOR, UPON REQUEST, SHALL ADVISE THE PURCHASER WHAT DISPOSITION IS TO BE MADE OF THE DEFECTIVE MATERIAL. CONTRACTOR SHALL PAY ALL FREIGHT CHARGES.
(d) IF PURCHASER IS TO MAKE INSPECTION AT POINT OF PRODUCTION IT SHALL BE SO STATED.

9. TESTS.
(a) TESTS MAY BE MADE AT POINT OF PRODUCTION, OR ON SAMPLES SUBMITTED, AND MAY ALSO BE MADE AT DESTINATION.
(b) CONTRACTOR SHALL GIVE THE PURCHASER SUFFICIENT NOTICE OF TIME WHEN MATERIAL WILL BE READY FOR TESTING.
(c) CONTRACTOR SHALL PROVIDE, AT POINT OF PRODUCTION, APPARATUS AND LABOR FOR MAKING REQUIRED TESTS UNDER SUPERVISION OF THE PURCHASER.
(d) IF TESTS ARE TO BE MADE AT POINT OF PRODUCTION, THE PURCHASER SHALL SO STATE AND ALSO INDICATE WHICH OF THE TESTS HEREIN SPECIFIED ARE TO BE MADE AND WHAT PORTION OF THE MATERIAL SHALL BE TESTED.
(e) THE FOLLOWING TESTS SHALL BE MADE:
1. ABILITY TO RESIST CORROSION.
2. INTEGRITY OF SEALING.
(a) IMMERSION TEST.
(b) HYDRAULIC PRESSURE.
(f) SAMPLING.
1. ONE HUNDRED REFLECTOR UNITS WILL BE SELECTED BY THE PURCHASER AT RANDOM FROM A LOT OF AT LEAST 2500.
2. FROM THE GROUP OF 100 UNITS, 25 WILL BE SELECTED AT RANDOM FOR TESTS.

10. DESCRIPTION OF TESTS.
(a) SALT-WATER SPRAY (CORROSION TEST).
1. THE COMPLETE REFLECTOR UNITS AS USED IN THE SIGN SHALL BE SPRAYED WITH A 20 PER CENT SALT-WATER SOLUTION FOR 48 HOURS. REFLECTOR UNITS SHALL THEN BE EXAMINED FOR EVIDENCE OF CORROSION; IF ANY APPEAR THE LOT REPRESENTED BY THE SAMPLES SHALL BE REJECTED.
(b) IF THE REFLECTOR UNIT IS OF THE DOUBLE REFRACTION TYPE:
1. THE REFLECTOR UNIT SHALL BE ALTERNATELY IMMERSED FOR TEN MINUTES IN TWO BATHS OF COLORED WATER, ONE AT A TEMPERATURE APPROXIMATELY 33 DEG. F., THE OTHER 170 DEG. F. REPEAT THIS ALTERNATE IMMERSION TEN TIMES, AFTER WHICH THE REFLECTOR UNITS SHALL BE EXAMINED FOR LEAKAGE. IF LEAKAGE HAS OCCURRED THE LOT REPRESENTED BY THE SAMPLES SHALL BE REJECTED.
2. THE SEALING BETWEEN THE LENS AND THE CAP OF THE REFLECTOR UNIT SHALL BE SUCH AS TO BE WATER-TIGHT UNDER A HYDRAULIC PRESSURE OF 10 LB. PER SQUARE INCH IN COLORED WATER FOR A PERIOD OF 1 MINUTE. AFTER THE REFLECTOR UNITS HAVE BEEN SUBJECTED TO THIS TEST THEY SHALL BE EXAMINED FOR LEAKAGE. IF LEAKAGE HAS OCCURRED THE LOT REPRESENTED BY THE SAMPLES SHALL BE REJECTED.
(c) IF THE REFLECTOR UNIT IS OF THE SINGLE REFRACTION TYPE:
1. THE BACKING SHALL NOT BE AFFECTED BY EITHER 20 PER CENT SALT-WATER SOLUTION AT ROOM TEMPERATURE, FRESH WATER AT 170 DEG. F., OR A DRY TEMPERATURE OF 170 DEG. F. THE BACKING SHALL BE SUBJECTED TO THE SALT WATER FOR A PERIOD OF 24 HOURS AND TO THE FRESH WATER FOR A PERIOD OF 4 HOURS IMMEDIATELY FOLLOWING THE SALT-WATER IMMERSION AND THEN KEPT AT A DRY TEMPERATURE OF 170 DEG. F. FOR 4 HOURS. THE PROTECTIVE COATING SHALL BE OF SUCH MATERIAL AND SO APPLIED AS NOT TO BE READILY RUBBED OFF AFTER THE ABOVE TESTS HAVE BEEN MADE CONSECUTIVELY. IF GLASS HAS CRACKED DURING THE TEST OR IF REFLECTIVE BACKING HAS BEEN DAMAGED OR IF PROTECTIVE COATING IS READILY RUBBED OFF, THE LOT REPRESENTED BY THE SAMPLES SHALL BE REJECTED.

11. PACKING.
(a) MATERIAL SHALL BE SO PREPARED AS TO PERMIT CONVENIENT HANDLING AND TO PROTECT AGAINST LOSS OR DAMAGE DURING SHIPMENT.

12. MARKING.
(a) PURCHASER'S ORDER, REQUISITION AND PACKAGE NUMBER, NAME OF CONSIGNOR, AND NAME AND ADDRESS OF CONSIGNEE, SHALL BE PLAINLY MARKED ON OUTSIDE OF PACKAGE.

13. WARRANTY.
(a) CONTRACTOR SHALL WARRANT THE MATERIAL COVERED BY THIS SPECIFICATION TO BE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP UNDER ORDINARY USE AND SERVICE, HIS OBLIGATION UNDER THIS WARRANTY BEING LIMITED TO MAKING, AT POINT OF PRODUCTION, ANY PART OR PARTS TO REPLACE THOSE WHICH SHALL BE FOUND DEFECTIVE WITHIN TWO YEARS AFTER SHIPMENT TO PURCHASER. THIS WARRANTY SHALL NOT APPLY TO ANY APPARATUS WHICH SHALL HAVE BEEN REPAIRED OR ALTERED IN ANY WAY BY ANYONE OTHER THAN THE MANUFACTURER THEREOF, SO AS TO AFFECT, IN THE CONTRACTOR'S JUDGEMENT, ITS PROPER FUNCTIONING OR RELIABILITY, OR WHICH HAS BEEN SUBJECT TO MISUSE, NEGLIGENCE OR ACCIDENT.

SPECIFICATION FOR REFLECTOR SIGNS.
(A.R.A. SIGNAL SECTION SPECIFICATION 15593)

1. PURPOSE.
(a) THE PURPOSE OF THIS SPECIFICATION IS TO PROVIDE SIGNS OF VARIOUS DESIGNS FOR RAILROAD HIGHWAY GRADE CROSSING PROTECTION.

2. TENDER.
(a) THE TENDER SHALL BE FOR APPARATUS MEETING THE REQUIREMENTS OF THIS SPECIFICATION. IF THE CONTRACTOR WISHES TO VARY FROM THE SPECIFICATION, A TENDER MAY BE SUBMITTED COVERING THE APPARATUS HE DESIRES TO FURNISH. THIS TENDER SHALL BE ACCOMPANIED BY FULL INFORMATION SHOWING WHEREIN THE REQUIREMENTS OF THIS SPECIFICATION ARE NOT MET.

3. MATERIAL AND WORKMANSHIP.
(a) MATERIAL AND WORKMANSHIP SHALL BE FIRST-CLASS IN EVERY RESPECT.

4. SHEET STEEL.
(a) SHEET STEEL SHALL BE CORROSION RESISTING. THE TOTAL AMOUNT OF CARBON, MANGANESE, PHOSPHORUS, SULPHUR AND SILICON SHALL NOT EXCEED 0.70 PER CENT. IF THE TOTAL AMOUNT OF THESE FIVE ELEMENTS EQUALS OR EXCEEDS 0.20 PER CENT THE METAL SHALL CONTAIN NOT LESS THAN 0.17 PER CENT COPPER AND NOT MORE THAN 0.06 PER CENT SULPHUR. IF THE TOTAL OF THESE FIVE ELEMENTS IS LESS THAN 0.20 PER CENT AND SULPHUR IS NOT GREATER THAN 0.04 PER CENT THE PRESENCE OF COPPER IS OPTIONAL.
(b) THE BASE METAL SHALL BE UNIFORMLY COATED WITH A GOOD QUALITY OF ZINC AND THE SURFACE OF THE COATED METAL SHALL BE OF SUCH NATURE THAT THE PRIMER SPECIFIED WILL ADHERE FIRMLY. THE ZINC COATING SHALL BE APPLIED BY THE HOT DIP PROCESS AND HEAT-TREATED AFTER COATING IN SUCH A MANNER AS TO GIVE A TIGHT DULL COAT WHICH WILL NOT PEEL NOR FLAKE ON THE OUTSIDE OF A BEND WHEN BENT DOWN FLAT. THE DULL COATED SURFACE OF THE SHEET SHALL HAVE THE CHARACTERISTICS OF A MATTE AND SHALL BE FREE FROM BRIGHT OR GLOSSY SPANGLE.

5. REFLECTOR UNITS.
(a) REFLECTOR UNITS SHALL CONFORM TO SPECIFICATION SHOWN ON THIS SHEET.
(b) REFLECTOR UNITS, ASSEMBLED IN SIGNS WHICH CARRY A LEGEND, SHALL BE COLORLESS.
(c) REFLECTOR UNITS, ASSEMBLED IN MARKER SIGN WHICH CARRIES NO LEGEND, SHALL BE CANARY YELLOW.
(d) REFLECTOR UNITS HAVING AN EXPOSED DIAMETER OF 0.40 TO 0.50 IN. SHALL BE USED IN LETTERS 4 INCHES IN HEIGHT. REFLECTOR UNITS HAVING AN EXPOSED DIAMETER OF 0.590 TO 0.688 IN. SHALL BE USED IN LETTERS AND NUMERALS 5 1/2 INCHES IN HEIGHT AND ALSO IN MARKER SIGN.
(e) REFLECTOR UNITS SHALL BE HELD IN A FIXED RELATION TO THE APERTURE WITH THEIR AXES NORMAL TO THE FACE OF SIGN.
(f) REFLECTOR UNITS SHALL BE HELD IN POSITION IN FRONT PLATE BY MEANS OF AN INTERMEDIATE PLATE. THE INTERMEDIATE PLATE SHALL BE READILY REMOVABLE AND REPLACEABLE WITHOUT THE USE OF TOOLS AND WHEN REMOVED SHALL RELEASE REFLECTOR UNITS.
(g) REFLECTOR UNITS SHALL PROJECT NOT MORE THAN 1/4 IN. OUTSIDE OF APERTURE.
(h) A DURABLE WATERPROOFING GASKET OF NON-CORROSIVE MATERIAL SHALL BE USED BETWEEN REFLECTOR UNITS AND FRONT PLATE.

6. DESIGN, SHEET STEEL SIGNS.
(a) THE FRONT, BACK, AND INTERMEDIATE PLATES SHALL BE NO. 16 U.S. STANDARD GAUGE (0.0625 IN.).
(b) REINFORCING METAL PARTS OR SUPPORTING PLATES USED IN BACK OF SIGNS SHALL BE 1/4 INCH IN THICKNESS.
(c) THE EDGES OF THE SIGN SHALL BE FLANGED TO A DEPTH OF NOT LESS THAN 3/4 IN.
(d) FLANGES SHALL BE WELDED AT CORNERS.
(e) THE FRONT PLATE SHALL BE SLIGHTLY LARGER THAN THE BACK PLATE SO THAT IT WILL FREELY TELESCOPE OVER THE FLANGES OF THE BACK PLATE.
(f) THE FRONT PLATE SHALL HAVE THE LEGEND OF THE SIGN EMBOSSED UPON IT. THE EMBOSSED NUMERALS AND LETTERS SHALL BE RAISED NOT LESS THAN 0.085 IN. NOR MORE THAN 0.125 IN.
(g) THE DIMENSION, INSIDE, BETWEEN THE FRONT AND BACK PLATES SHALL BE SUCH AS IS NECESSARY TO MEET THE REQUIREMENTS OF THIS SPECIFICATION AND THE PARTICULAR REFLECTOR UNIT ASSEMBLED IN THE SIGN.
(h) THE FRONT PLATE SHALL BE ATTACHED TO THE BACK PLATE BY BRONZE SCREWS OF SPECIAL DESIGN WHICH CANNOT BE REMOVED WITH AN ORDINARY SCREW DRIVER. IF NUTS ARE USED THEY SHALL BE SO DESIGNED THAT THEY CANNOT BE REMOVED WITH ORDINARY PLIERS, WRENCH, OR SCREW DRIVER.

7. ENAMELING, SHEET STEEL SIGNS.
(a) METAL SHALL BE THOROUGHLY CLEANED IN ORDER TO SECURE A PERFECT SURFACE FOR PAINTING.
(b) ONE COAT OF SUITABLE IRON OXIDE PRIMER OF THE LONG OIL TYPE SHALL BE APPLIED TO ALL SURFACES.
(c) SUBSEQUENT TO THE PRIMING COAT ON SIGNS BEARING A LEGEND, ALL SURFACES SHALL BE GIVEN THREE COATS OF BLACK EGGSHELL FINISH HIGH GRADE SYNTHETIC ENAMEL.
(d) SUBSEQUENT TO THE PRIMING COAT ON MARKER SIGN BEARING NO LEGEND, ALL SURFACES SHALL BE GIVEN THREE COATS OF SEMI-GLOSS PERMANENT LEMON YELLOW HIGH GRADE SYNTHETIC ENAMEL.
(e) THREE COATS OF SEMI-GLOSS PERMANENT WHITE HIGH GRADE SYNTHETIC ENAMEL SHALL BE APPLIED TO THE EMBOSSED PORTION OF THE SIGN.
(f) MATERIALS USED IN THE ENAMEL SHALL BE SUCH THAT PREMATURE CHALKING WILL NOT TAKE PLACE. EACH COAT SHALL BE THOROUGHLY DRY BEFORE SUBSEQUENT COAT IS APPLIED.
(g) THE FINISHED DESIGN SHALL BE CLEAR CUT AND SHARP AND THE LINES EVEN AND TRUE.
(h) THE FINISH PRODUCED ON THE SIGNS SHALL BE A TOUGH FLEXIBLE COATING, FREE FROM CRACKS, SHRINKAGE, WRINKLES, BLISTERS, OR OTHER BLEMISHES AND SHALL WITHSTAND THE FOLLOWING TESTS:
1. THE FINISH SHALL NOT CHIP NOR FLAKE WHEN TESTED WITH THE POINT OF A KNIFE.
2. THE FINISH SHALL WITHSTAND A GASOLENE TEST MADE BY RUBBING WITH A CLEAN WHITE RAG SOAKED IN GASOLENE.
3. THE FINISH SHALL POSSESS SUCH ELASTICITY AND ADHERING QUALITIES THAT IT WILL NOT CRACK NOR SEPARATE FROM THE SIGN WHEN STRUCK A LIGHT BLOW WITH A HAMMER.

8. IDENTIFICATION.
(a) INSIDE OF SIGN SHALL BE PLAINLY MARKED WITH NAME OF MANUFACTURER.

9. INSPECTION.
(a) PURCHASER MAY INSPECT MATERIAL AT ALL STAGES OF MANUFACTURE.
(b) PURCHASER MAY INSPECT THE COMPLETED PRODUCT TO DETERMINE THAT THE REQUIREMENTS OF THIS SPECIFICATION HAVE BEEN MET.
(c) IF MATERIAL HAS NOT BEEN ACCEPTED AT POINT OF PRODUCTION AND IF, UPON ARRIVAL AT DESTINATION, IT DOES NOT MEET THE REQUIREMENTS OF THIS SPECIFICATION, IT MAY BE REJECTED, AND THE CONTRACTOR, UPON REQUEST, SHALL ADVISE THE PURCHASER WHAT DISPOSITION IS TO BE MADE OF THE DEFECTIVE MATERIAL. CONTRACTOR SHALL PAY ALL FREIGHT CHARGES.
(d) IF PURCHASER IS TO MAKE INSPECTION AT POINT OF PRODUCTION IT SHALL BE SO STATED.

10. TESTS.
(a) TESTS MAY BE MADE AT POINT OF PRODUCTION, OR ON SAMPLES SUBMITTED, AND MAY ALSO BE MADE AT DESTINATION.
(b) CONTRACTOR SHALL GIVE THE PURCHASER SUFFICIENT NOTICE OF TIME WHEN MATERIAL WILL BE READY FOR TESTING.
(c) CONTRACTOR SHALL PROVIDE, AT POINT OF PRODUCTION, APPARATUS AND LABOR FOR MAKING REQUIRED TESTS UNDER SUPERVISION OF THE PURCHASER.
(d) IF TESTS ARE TO BE MADE AT POINT OF PRODUCTION, THE PURCHASER SHALL SO STATE AND ALSO INDICATE WHICH OF THE TESTS HEREIN SPECIFIED ARE TO BE MADE AND WHAT PORTION OF THE MATERIAL SHALL BE TESTED.

11. PACKING.
(a) MATERIAL SHALL BE SO PREPARED AS TO PERMIT CONVENIENT HANDLING AND TO PROTECT AGAINST LOSS OR DAMAGE DURING SHIPMENT.

12. MARKING.
(a) PURCHASER'S ORDER, REQUISITION AND PACKAGE NUMBER, NAME OF CONSIGNOR, AND NAME AND ADDRESS OF CONSIGNEE, SHALL BE PLAINLY MARKED ON OUTSIDE OF PACKAGE.
(b) DETAIL LIST OF LOOSE PIECES, CONTAINERS AND THEIR CONTENTS SHALL BE FURNISHED FOR EACH SHIPMENT.

13. WARRANTY.
(a) CONTRACTOR SHALL WARRANT THE MATERIAL COVERED BY THIS SPECIFICATION TO BE FREE FROM DEFECTS IN MATERIAL AND WORKMANSHIP UNDER ORDINARY USE AND SERVICE, HIS OBLIGATION UNDER THIS WARRANTY BEING LIMITED TO MAKING, AT POINT OF PRODUCTION, ANY PART OR PARTS TO REPLACE THOSE WHICH SHALL BE FOUND DEFECTIVE WITHIN TWO YEARS AFTER SHIPMENT TO PURCHASER. THIS WARRANTY SHALL NOT APPLY TO ANY APPARATUS WHICH SHALL HAVE BEEN REPAIRED OR ALTERED IN ANY WAY BY ANYONE OTHER THAN THE MANUFACTURER THEREOF, SO AS TO AFFECT, IN THE CONTRACTOR'S JUDGEMENT, ITS PROPER FUNCTIONING OR RELIABILITY, OR WHICH HAS BEEN SUBJECT TO MISUSE, NEGLIGENCE OR ACCIDENT.

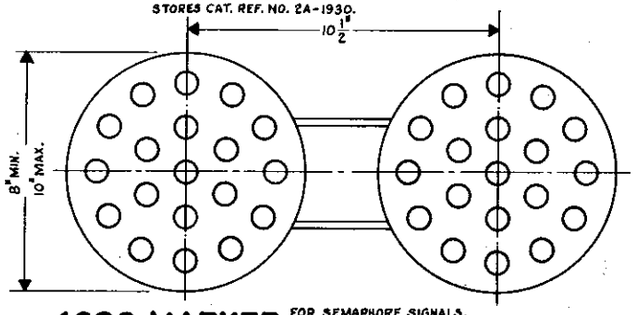
RED REFLECTOR UNITS, RED FACE PLATE.
STORES CAT. REF. NO. 2A-1417

4682 MARKER

FOR SEMAPHORE SIGNALS.
YELLOW REFLECTOR UNITS, YELLOW FACE PLATE.
STORES CAT. REF. NO. 2A-1930.



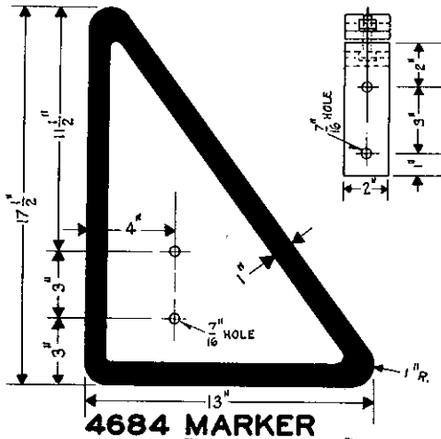
4683 MARKER

FOR SEMAPHORE SIGNALS.
RED REFLECTOR UNITS, RED FACE PLATE.
STORES CAT. REF. NO. 2A-1419.

ATTACHMENT TO LAMP BRACKET SHALL BE SO THAT THE CENTER OF THE LEFT HAND MARKER (4683) WILL BE 11 1/16 INCHES FROM CENTER LINE OF SIGNAL MAST.

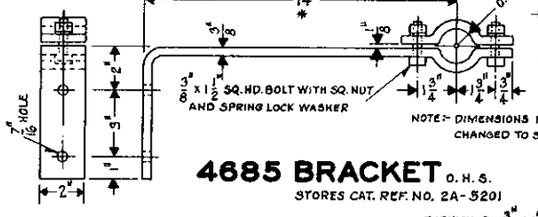
SPECIFICATION FOR MARKERS (SEMAPHORE SIGNALS)

1. PURPOSE:
   (a) THE PURPOSE OF THIS SPECIFICATION IS TO PROVIDE SINGLE AND DOUBLE MARKER UNITS OF THE REFLECTOR TYPE FOR SEMAPHORE SIGNALS.
2. TENDER:
   (a) THE TENDER SHALL BE FOR APPARATUS MEETING THE REQUIREMENTS OF THIS SPECIFICATION. IF THE CONTRACTOR WISHES TO VARY FROM THE SPECIFICATION, A TENDER MAY BE SUBMITTED COVERING THE APPARATUS HE DESIRES TO FURNISH.
3. MATERIAL AND WORKMANSHIP:
   (a) MATERIAL AND WORKMANSHIP SHALL BE FIRST-CLASS IN EVERY RESPECT.
4. GENERAL REQUIREMENTS:
   (a) MARKERS SHALL BE FURNISHED COMPLETE WITH ALL NECESSARY PARTS FOR SECURING TO LAMP BRACKET AS SHOWN ON A.A.R. SIGNAL SECTION DRAWING 1049-A.
   (b) MARKERS SHALL BE CIRCULAR IN SHAPE AND SHALL HAVE NOT LESS THAN 19 REFLECTOR UNITS.
   (c) THE DIAMETER OF EACH MARKER SHALL BE 8 INCHES MINIMUM, 10 INCHES MAXIMUM.
   (d) DOUBLE MARKERS SHALL BE SPACED HORIZONTALLY 10 1/2 INCHES, FROM CENTER TO CENTER.
5. COLOR:
   (a) THE COLOR OF THE REFLECTOR UNITS AND FACE PLATE SHALL BE THE SAME.
   (b) EDGES AND BACK OF THE HOUSING SHALL BE BLACK.
6. REFLECTOR UNIT HOUSING:
   (a) THE REFLECTOR UNIT HOUSING SHALL BE IN ACCORDANCE WITH SIGNAL SECTION SPECIFICATION 155-42 FOR RAILROAD HIGHWAY GRADE CROSSING SIGNS AS FAR AS APPLICABLE. THE FINISH SHALL BE ACID RESISTING VITREOUS ENAMEL.
7. REFLECTOR UNITS:
   (a) THE REFLECTOR UNITS SHALL BE IN ACCORDANCE WITH A.A.R. SIGNAL SECTION SPECIFICATION 156-40 FOR REFLECTOR UNIT. 7/8 INCH DIAMETER REFLECTOR UNITS MAY BE FURNISHED.



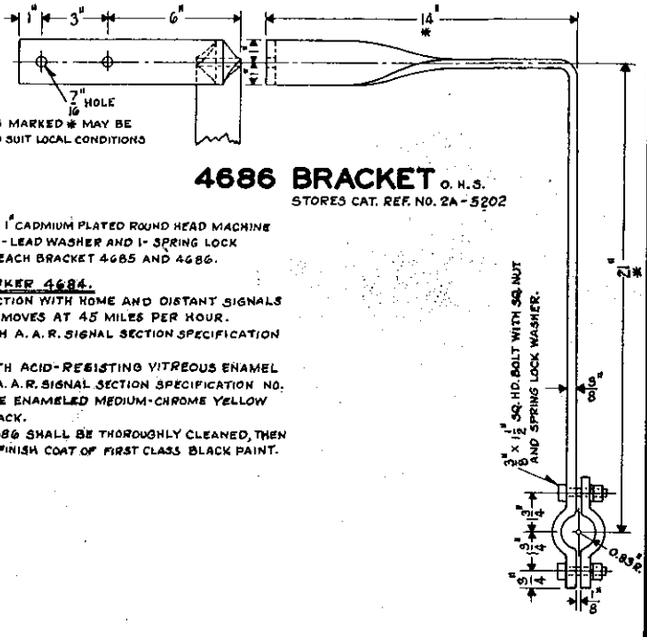
4684 MARKER

*12 U.S. STD. GAUGE (.109") ENAMELING STEEL.
STORES CAT. REF. NO. 2A-5200



4685 BRACKET O.H.S.

STORES CAT. REF. NO. 2A-5201



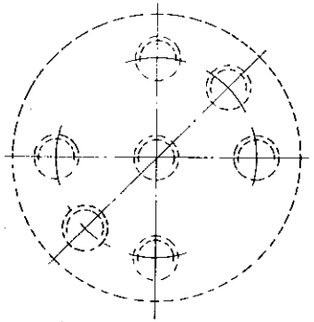
4686 BRACKET O.H.S.

STORES CAT. REF. NO. 2A-5202

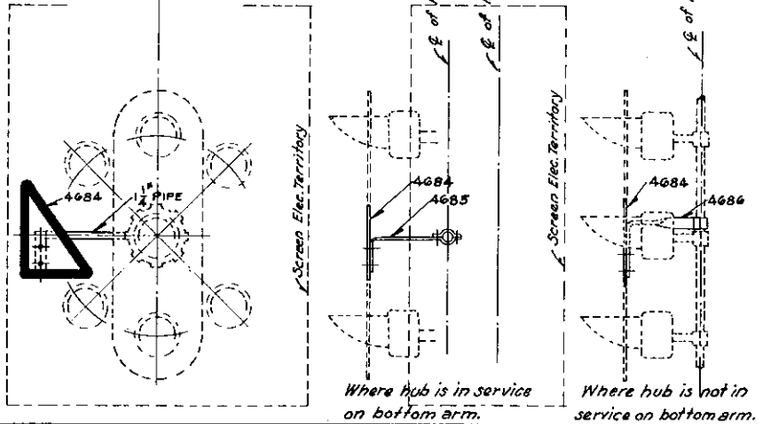
FURNISH 2- 3/8" X 1" CADMIUM PLATED ROUND HEAD MACHINE SCREWS WITH 1- LEAD WASHER AND 1- SPRING LOCK WASHER WITH EACH BRACKET 4685 AND 4686.

SPECIFICATION FOR MARKER 4684.

1. MARKER 4684 IS FOR USE IN CONJUNCTION WITH HOME AND DISTANT SIGNALS PERMITTING TRAINS TO MAKE DIVERTING MOVES AT 45 MILES PER HOUR.
2. MATERIAL SHALL BE IN ACCORDANCE WITH A.A.R. SIGNAL SECTION SPECIFICATION NO. 155-42
3. MARKER 4684 SHALL BE COATED WITH ACID-RESISTING VITREOUS ENAMEL (SEMI-GLOSS FINISH) IN ACCORDANCE WITH A.A.R. SIGNAL SECTION SPECIFICATION NO. 155-42. THE FACE OF THE MARKER SHALL BE ENAMELED MEDIUM-CHROME YELLOW WITH THE EDGES AND BACK ENAMELED BLACK.
4. ALL PARTS OF BRACKETS 4685 AND 4686 SHALL BE THOROUGHLY CLEANED, THEN GIVEN A PRIMARY COAT OF RED LEAD AND A FINISH COAT OF FIRST CLASS BLACK PAINT.



APPLICATIONS OF MARKER 4684.



REVISIONS

REDRAWN FROM APPROVED PLAN S-468-A, DATED SEPT. 28, 1937. MARKER 4684 AND BRACKETS 4685 AND 4686 ADDED.

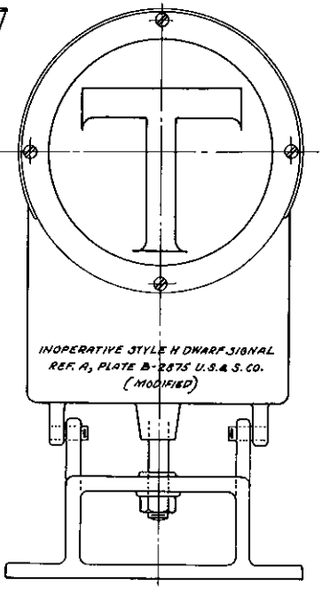
ARRANGEMENT OF LENSES, T STENCIL AND REFLECTOR FOR 4695.



4695 T-SIGN COMPLETE
STORES CAT. REF. NO. 2A-5655

NOTE:-

1. OUTER COVER GLASS OF 4691, 4692, 4693 & 4694 IS CLEAR ON OUTSIDE AND SAND BLASTED ON INSIDE.
2. STENCILS 4696, 4697, 4698 & 4699 ARE CLEAR ON CONCAVE SIDE, AND PAINTED BLACK ON CONVEX SIDE, EXCEPT LETTERS WHICH ARE CLEAR.
3. STENCIL 46910 IS CLEAR GLASS, PAINTED BLACK ON SIDE TOWARD LENS, EXCEPT LETTER T WHICH REMAINS CLEAR.
4. STENCIL 4696 IS FOR USE IN CONNECTION WITH DRAGGING EQUIPMENT DETECTOR DEVICE.
5. STENCIL 4697 IS FOR USE AS TRAIN ORDER SIGN.
6. STENCILS 4698 AND 4699 ARE FOR USE IN CONNECTION WITH NO RIGHT TURN AND NO LEFT TURN SIGNS AT HIGHWAY CROSSINGS, WHERE REQUIRED.
7. STENCIL 46910 IS FOR USE IN CONNECTION WITH TORPEDO PLACING MACHINE.
8. THE USE OF PHANKILL UNIT IS OPTIONAL, DEPENDING UPON LOCAL CONDITIONS. IF IT IS NOT DESIRED, REQUISITION SHOULD STATE "WITHOUT PHANKILL UNIT".
9. "DE" STENCIL 4696 TO BE USED AS INDICATOR, IN ACCORDANCE WITH ADJUNCT AS RECOMMENDED BY S.T.R.C. DOCKET 38-2, REVISED.
10. WHERE THE HC9 ILLUMINATED SIGN IS LOCATED UPON A PLATFORM, IT MAY BE APPLIED IN ACCORDANCE WITH U.S. & S. CO. DRAWING NO. B 8912 SHEET 198.

4691 SIGN WITH BACKGROUND Complete with Attachment Ref. 7, Pl. K-162. Specify pipe size and Stencil 4696 or 4697 as required.
STORES CAT. REF. NO. 2A-5651

4692 SIGN WITH BACKGROUND and without Attachment Ref. 7, Pl. K-162 but with Stencil 4696 or 4697 as required.
STORES CAT. REF. NO. 2A-5652

4693 SIGN WITHOUT BACKGROUND Complete with Attachment Ref. 7, Pl. K-162. Specify pipe size and Stencil 4698 or 4699 as required.
STORES CAT. REF. NO. 2A-5653

4694 SIGN WITHOUT BACKGROUND and without Attachment Ref. 7, Pl. K-162 but with Stencil 4698 or 4699 as required.

NOTES:-

1. MATERIAL FOR FRONT PLATE AND BACK PLATE OF SIGN 4721 AND SIGN PLATE OF SIGN 4722 SHALL BE #16 GAGE GALVANNEALED STEEL, OR STEEL PARKERIZED AFTER FABRICATION. LETTERS ON BOTH SIGNS SHALL BE EMBOSSED.
2. FOR SIGN 4721, THE COLOR OF BACKGROUND AND BACK OF FRONT PLATE SHALL BE BLACK BAKED-ON ENAMEL. COLOR OF LETTERS SHALL BE WHITE BAKED-ON ENAMEL. FRONT AND BACK OF BACK PLATE SHALL BE BLACK BAKED-ON ENAMEL.
3. FOR SIGN 4722, THE COLOR OF BACKGROUND AND BACK OF SIGN SHALL BE WHITE BAKED-ON ENAMEL. COLOR OF LETTERS SHALL BE BLACK BAKED-ON ENAMEL.
4. REFLECTOR BUTTONS FOR SIGN 4721 SHALL BE ROUND, OF THE PRISMATIC TYPE 1/2 INCH IN DIAMETER, #5 CLEAR FLAT STIMSONITE, ALL PLASTIC, MOUNTED BETWEEN FRONT AND BACK PLATES. NUMBER OF BUTTONS AS INDICATED.
5. MANUFACTURER OF SIGNS SHALL FURNISH SIGN 4721 OR SIGN 4722 ONLY.
6. LETTERS OF SIGNS SHALL BE PROPORTIONED IN ACCORDANCE WITH UNITED STATES PUBLIC ROADS ADMINISTRATION, FEDERAL WORKS AGENCY DESIGN, SERIES D, BOOKLET P-3378
7. SIGN 4722 SHALL BE LOCATED, LONGITUDINALLY, 10 FEET BACK OF A POINT, WHERE TRACK CENTERS BETWEEN MAIN TRACK AND TRACK TO WHICH SIGN APPLIES ARE SEPARATED AT LEAST 12 FEET-2 INCHES.
8. SIGNS SHALL BE ATTACHED TO SIGN POST 4723 ONLY.
9. SIGN POST 4723 SHALL BE DRIVEN INTO GROUND AT LOCATION SELECTED, AFTER WHICH SIGN 4721 OR SIGN 4722 SHALL BE MOUNTED THEREON AS SHOWN IN DETAIL ON THIS DRAWING.
10. THE 3/8" BUSHING INDICATED IN DETAIL OF MOUNTING, SHALL BE OF SUCH LENGTH THAT SIGN WILL BEAR FIRMLY AGAINST POST, BUT NOT TO BEND SIGN.
11. FRONT AND BACK PLATES OF SIGN 4721 SHALL BE FIRMLY HELD TOGETHER WITH TWELVE 19/24 x 5/16" ALUMINUM ASSEMBLY BOLTS WITH VANDAL RESISTING NUTS.

SPECIFICATION.

1. Body of Lamp shall be made of No. 18 sheet steel, tinned.
2. Rivets shall be used in the construction of the body of the Lamp for holding the parts together.
3. Handle of Lamp shall be No. 4 B. W. G. steel wire.
4. Door shall have water-shed so arranged as to prevent rain entering the Lamp, and door shall raise high enough to make the opening six and five-eighths (6⅝) inches.
5. Lamp shall have top draft ventilation. (Ventilation will be tested, when required, at the factory as follows: (A) Wind velocity equivalent to eighty (80) m. p. h., for two (2) minutes: (B) Still air temperature, one hundred and ten (110) degrees Fahr. for two (2) hours. If either of the above tests extinguishes flame, Lamp will be rejected.)
6. Lens shall be five (5) inches in diameter, with three and one-half (3½) inch focus.
7. Lens Coupling Ring shall be arranged so that Lens can be easily removed and shall completely encircle the Lens.
8. Back-light and peep-hole glasses shall be held in place by screw retaining rings. Back-light glass shall be covered with a metal disc placed between the glass and retaining ring.

SPECIFICATIONS FOR CHIMNEYS

1. GENERAL DESCRIPTION:
   This specification covers Long Time Burner Chimneys.
2. KIND OF GLASS:
   Chimneys shall be made of LOW EXPANSION HEAT RESISTING GLASS.
3. ORDERING:
   As far as possible Chimneys shall be ordered in multiples of standard package quantities.
4. BOILING WATER TESTS:
   Chimneys shall stand immersion in boiling water (distilled) for two (2) hours without showing any disintegration.
5. CHILLING TESTS:
   (a) In making this test the Chimney is placed on a suitable Burner and the flame is turned up as far as possible without smoking. The lamp is then tilted to an angle of forty-five (45) degrees, in a direction parallel to the slot in the Burner, and allowed to remain in this position for five (5) minutes. During this period the flame shall be regulated, if necessary, so that a strip not to exceed three-eighths (⅜) of an inch wide running the length of the Chimney and parallel to its axis is smoked. The Chimney is then removed from the Burner, and immediately dropped, top downward, into a vessel of Ice water, maintained at a temperature of between forty-three (43) and fifty (50) degrees Fahr., care being taken that the Chimney does not strike the Ice.
   (b) Chimneys tested as described in 5a shall not show breakage in excess of three (3) in twenty-four (24) tested.
   (c) If the first twenty-four (24) samples fail to pass the Chilling test, an additional twenty-four (24) samples shall be taken for a second test, and if the average of breakage of the two (2) tests does not exceed twelve and one-half (12½) per cent. the material is acceptable.
6. PERMISSIVE VARIATIONS:
   Chimneys shall conform to approved drawings.
7. MARKING:
   Chimneys shall show the Manufacturer's Trade Mark.
8. PACKING:
   Chimneys shall be carefully packed, each package containing twelve (12) dozen Chimneys, in suitable containers, marked to show quantity, requisition number, order number, and, name and address of Consignee.
9. WORKMANSHIP:
   Chimneys shall be clear, of smooth surface, and have both ends finished without sharp edges.
10. REHEARING:
    When tests are made at the Purchaser's laboratory, samples of rejected material will be held for one month from the date of test report. In case the Manufacturer is dissatisfied with results of test, he may make claim for rehearing within that time. Failure to raise a question within one month, will be construed as evidence of satisfaction with results of test. The samples will be scrapped and claim for a rehearing will not be considered.
11. FREIGHT CHARGES:
    Rejected material will be returned to the Manufacturer, who shall pay freight charges both ways.

REVISIONS

Curves "A" and "B" for Blade, Spectacle and Roundels, 0° to 90°.
Curve "C" for Spectacle and Roundels (without Blade and Fastenings) 0° to 90°.

Note:-

1. Blades shall be made of Open Hearth Enameling Steel and Enameled with not less than Three (3) coats of Vitreous Enamel.
2. Enamel back of Blades Black.
3. Yellow shall be Medium Chrome.
4. Unless otherwise specified, Blades shall be furnished with Fastenings to fit A.R.A. Standard Semaphore Spectacle.
5. Torque Curves and Wind Pressure Test not applicable to Blade 4845.

Wind Pressure Test.

Attach the Blade to A.R.A. Standard Semaphore Spectacle; with surfaces of Blade, first the front and then the back, parallel to and towards the floor. Apply a load of 60 pounds at the geometric center of that portion of the Blade extending beyond the fastenings. During either of the above tests, the Blade shall not take a permanent set.

NOTES:-

1. FOUNDATIONS SHOWN ON SHEETS 1 AND 2 OF THIS DRAWING, S-496 (CURRENT ISSUE), SHALL BE MANUFACTURED IN ACCORDWITH A. S. T. M. SPECIFICATIONS C76-41. CONCRETE SHALL TEST 4500 POUNDS PER SQUARE INCH IN 28 DAYS, AND EACH UNIT SHALL BE PLAINLY MARKED WITH THE MANUFACTURER'S NAME.
2. ALL BOLTS, NUTS AND WASHERS SHALL BE GALVANIZED.
3. THE REINFORCING IN BODIES 4964, 4965, 4963 AND 49616 SHALL BE 3" x 8", #5 GAUGE x #8 GAUGE WELDED WIRE FABRIC FORMED INTO A CAGE, WITH THE #5 GAUGE WIRES PLACED IN THE ANNULAR POSITION, THE #5 WIRES LAPPED AT LEAST 6" AND SECURELY TIED TOGETHER. IN ADDITION ⅜" ϕ LONGITUDINAL BARS, & ⅜" ϕ ANNULAR BARS IN 4964, SHALL BE IMBEDDED AS SHOWN.
4. THE REINFORCING IN COVERS 4967 AND 49617 SHALL BE ⅜" ϕ BARS, SPACED 3" CENTERS EACH WAY AND SECURELY TIED TOGETHER.
5. FOUNDATIONS 4961, 4962, 4963 AND 49615 SHALL BE SHIPPED KNOCKED-DOWN, WITH ALL BOLTS, WASHERS, ETC. FOR ASSEMBLING IN THE FIELD.
6. FOUNDATION 49615 IS FOR USE WITH SIGNAL 4102 DRAWING S-410. FOR APPLICATION OF FOUNDATIONS 4961, 4962, & 4963 SEE DIAGRAM "D" SHEET NO. 1 LOCATING CENTER OF MAST 10'-0" FROM GAUGE LINE OF NEAREST RAIL OF TRACK GOVERNED. LOCATION OF FOUNDATION 49615 FROM GAUGE LINE SHALL BE GOVERNED BY LOCAL CONDITIONS. IN ALL CASES DRAINAGE SHALL NOT BE OBSTRUCTED.
7. PRE-CAST CONCRETE FOUNDATIONS SHALL BE AS SHOWN ON DRAWING, SHEETS 1 & 2, OR SIMILAR IN CONSTRUCTION IF APPROVED BY THE ASSISTANT CHIEF ENGINEER-SIGNALS.
8. INSPECTION OF PRE-CAST CONCRETE FOUNDATIONS SHALL COVER THE MANUFACTURER'S PLANT TO DETERMINE IF PROPER FACILITIES ARE AVAILABLE TO MANUFACTURE THE PRODUCTS IN ACCORDANCE WITH THE DRAWING AND THAT HE UNDERSTANDS WHAT IS REQUIRED. THIS INSPECTION SHALL BE MADE DURING THE PROCESS OF CONSTRUCTION TO INSURE THAT THE PROPER QUALITY AND QUANTITY OF CONCRETE IS BEING USED, AND THAT THE LOCATIONS AND DETAILS OF THE REINFORCEMENT ETC. ARE IN ACCORDANCE WITH THE DRAWING.

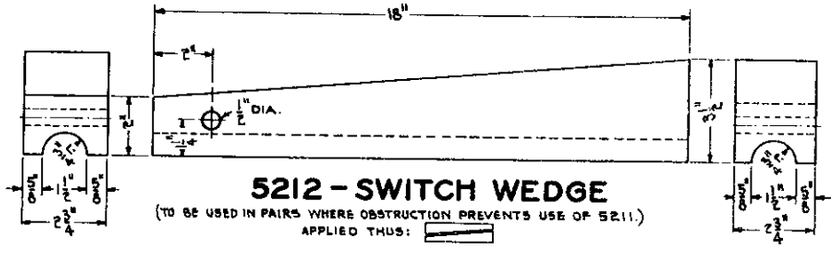
5211 – SWITCH WEDGE



5212 – SWITCH WEDGE

(TO BE USED IN PAIRS WHERE OBSTRUCTION PREVENTS USE OF 5211.)
APPLIED THUS:

— SPECIFICATION —

MATERIAL: SWEET BIRCH, DOGWOOD, HORNBEAM, LOCUST, HARD MAPLE, OAK (EXCEPT SO-CALLED SWAMP OR WATER OAKS).

PHYSICAL REQUIREMENTS: SWITCH WEDGES SHALL BE FREE FROM DECAY, HOLES, KNOTS, SHAKES, SPLIT, WANE, GRAIN WITH SLANT GREATER THAN ONE IN TWENTY AND MOISTURE IN EXCESS OF 20%.

DESIGN: SWITCH WEDGES SHALL CONFORM TO THE SHAPES AND SIZES SPECIFIED. ALL DIMENSIONS SHOWN ARE MINIMA.

MANUFACTURE: SWITCH WEDGES SHALL BE STRAIGHT, CUT SQUARE AT THE ENDS, HAVE SMOOTH GROOVE, AND BE SURFACED ON ALL PLANES.

— FIELD NOTES —

WHERE SWITCH POINT OPENING IS SUCH THAT WEDGE 5211 CANNOT BE DRIVEN BETWEEN STOCK RAIL AND SWITCH POINT A SUFFICIENT DISTANCE TO INSURE A SAFE WEDGE, THAT SURFACE OF WEDGE WHICH IS PLACED AGAINST STOCK RAIL MAY BE CUT BACK TO OBTAIN THE DESIRED RESULTS.

WHERE UNUSUAL OBSTRUCTIONS, SUCH AS BOLT HEADS, ETC, PREVENT THE APPLICATION OF WEDGE 5212 AS INTENDED, THE LENGTH MAY BE REDUCED TO NOT LESS THAN NINE INCHES, BY SAWING OFF THE ENDS, TO MEET LOCAL CONDITIONS.

PRECAUTIONS MUST BE TAKEN TO INSURE WEDGES ALTERED TO MEET AN UNUSUAL CONDITION, SUCH AS OUTLINED ABOVE, ARE NOT USED WHERE STANDARD WEDGES 5211 OR 5212 CAN BE APPLIED.

WHEN APPLYING TERMINALS 322307 AND 322313, CARE SHOULD BE TAKEN IN CUTTING BACK THE INSULATION, SO THAT WHEN THE TERMINAL IS CRIMPED, ALL THE COPPER STRANDS WILL BE FULLY ENCLOSED WITHIN THE CRIMPED BARREL AND THAT THE INSULATION OF THE WIRE IS FULLY GRIPPED BY THE CRIMPED INSULATION SUPPORT. (SEE SKETCH A)
2. USE RACO EYELET PLIERS NO. 530-10 OR SIMILAR FOR ATTACHING EYELETS TO 5281, 5282, 52817 AND 52818 TO CONDUCTORS. FOR ATTACHING EYELETS 5283 AND 52852 TO CONDUCTORS USE FLAT NOSED PLIERS WITH PARALLEL JAWS.
3. WHEN CONNECTORS ARE APPLIED TO BINDING POSTS, THEY SHOULD BE ARRANGED TO INSURE "NO CONTACT BETWEEN ADJACENT CONNECTORS."
4. AMP TERMINAL 322313 (25E-13332) TO BE USED ALSO ON THE FOLLOWING CABLES USING TOOL * 48049
   1. *14 (37 STRAND) 5/64" T.C. GREEN (2A-471).
   2. *14 (37 STRAND) 3/64" INS 2/64 NEOPRENE JACKET (2A-3016).

REVISIONS
REDRAWN FROM APPROVED DRAWING S-528-J, DATED MAY 7, 1945, LAST REVISED MAY 17, 1950 AND REVISED AS FOLLOWS:- TWIN GRIP CONNECTORS 52811 TO 52816 INCL. AND TAG 52825 OBSOLETED. RELAY CONNECTORS 52855 TO 52862 INCL. AND TERMINAL 52853 ADDED. MINOR CHANGES IN NOTES.

SPECIFICATIONS

1. GENERAL:

(a) INSTRUMENT CASES UNDER THESE SPECIFICATIONS SHALL BE MADE IN FOUR SIZES. THE OVERALL LENGTH, WIDTH AND HEIGHT AND THE FOUNDATION BOLT HOLE SPACING SHALL BE AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER.

(b) INSIDE OF EACH CASE SHALL BE ARRANGED AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER SO THAT WITH THE ROOF FORMED IN ACCORDANCE WITH SECTION 4 OF THESE SPECIFICATIONS, TERMINAL WALL SHALL HAVE A CLEAR SPACE "T", FREE OF METAL BETWEEN SHELVES, AND EXTENDING THE ENTIRE LENGTH OF THE CASE.

(c) A CLEAR SPACE APPROXIMATELY 6½ INCHES WIDE EXTENDING THE FULL LENGTH OF CASE SHALL BE PROVIDED BETWEEN THE TERMINAL WALL AND REAR PANELS.

(d) EACH CASE SHALL BE PROVIDED WITH SHELVES AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER, THE FULL INSIDE LENGTH OF CASE AND EXTENDING BACK TO THE TERMINAL WALL.

(e) ALL SHEET METAL PARTS SHALL BE MADE OF COPPER BEARING STEEL, PATENT LEVELED AND RESQUARED. ROOF AND WEATHER EXPOSED WALLS SHALL BE MADE OF #14 U.S.GAGE. SHELVES, TERMINAL WALL SUPPORTS ETC. SHALL BE MADE OF #16 U.S.GAGE. MATERIAL FOR BASE FRAME SHALL BE AS SPECIFIED UNDER SECTION 2.

(f) THE DESIGN AND CONSTRUCTION OF CASE WHICH MANUFACTURER PROPOSES TO FURNISH SHALL MEET THE APPROVAL OF THE ASSISTANT CHIEF ENGINEER-SIGNALS.

2. BASE FRAME:

(a) BASE FRAME SHALL BE CONSTRUCTED OF O.H. STEEL ANGLES WITH CROSS TIES IF NECESSARY TO PROVIDE A FRAME OF PROPER RIGIDITY.

(b) THE ENTIRE BASE FRAME SHALL BE FIRMLY WELDED TOGETHER.

(c) EACH BASE SHALL BE PROVIDED WITH CABLE ENTRANCE OPENINGS COVERED WITH PLATE 5308, THE NUMBER OF OPENINGS FOR EACH CASE SHALL BE AS SHOWN ON PLAN S-530 SHEET NO. 2 BASIC NUMBER.

3. UPRIGHTS:

(a) THE END UPRIGHTS SHALL BE OF ONE PIECE, IN CHANNEL SECTION, OF A SIZE SUFFICIENT TO FORM END OF CASE AND SIDE OF FRAME FOR DOORS AND BACK PANELS. THEY SHALL BE MOUNTED AGAINST OUTSIDE OF BASE FRAME AND SUBSTANTIALLY WELDED TO IT.

(b) IN CENTER OF FRONT AND REAR OF CASES 5303 AND 5304 SHALL BE FORMED CHANNEL-SECTION UPRIGHTS. THE FRONT CHANNEL SHALL FORM A PART OF DOOR FRAME, THE REAR CHANNEL SHALL FORM A PART OF BACK FRAME TO HELP SUPPORT BACK PANELS AND TO SERVE AS A STIFFENER. BOTH CHANNELS SHALL BE SECURELY WELDED TO TOP RAIL AND BASE FRAME.

(c) THE END UPRIGHTS SHALL BE PROVIDED WITH CABLE OPENING AND PLATE 5306 BOLTED TO END WALL WITH NUTS AND LOCK WASHERS INSIDE OF CASE.

4. ROOF:

(a) ROOF, WATERSHED OVER DOORS, AND REAR PANELS SHALL BE FORMED FROM ONE PIECE OF SHEET METAL WITH A ROOF SLOPE DOWNWARD TO THE REAR, OF 1½ INCHES TO THE FOOT.

(b) ENDS AND FRONT SHALL BE STRUCK DOWN VERTICALLY AND SECURELY WELDED TO VERTICAL WALL WITH FILLET WELDS 1½ INCHES LONG, ON 10¾ INCH CENTERS.

(c) BACK OF ROOF SHALL BE STRUCK DOWN AT AN ANGLE, AS INDICATED ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER TO A POINT 1¼ INCHES FROM CASE TO PRODUCE A SUBSTANTIAL WATERSHED.

(d) FRONT OF ROOF SHALL BE FORMED DIRECTLY OVER DOORS WITH A SLOPE OF 45 DEGREES AS SHOWN AND EXTEND TO A POINT NOT LESS THAN 1 INCH FROM CASE, TO PRODUCE A SUBSTANTIAL WATERSHED.

(e) CORNERS OF ROOF SHALL BE WELDED TO PRODUCE A WATERPROOF SEAM.

5. DOOR AND PANEL FRAMES:

(a) SUITABLY FORMED HORIZONTAL ANGULAR SHAPES, FORMING DOOR AND PANEL FRAME, SHALL BE SECURELY WELDED TO BASE FRAME, ROOF AND UPRIGHTS, FRONT AND BACK.

(b) ALL PERMANENT JOINTS AT THE JUNCTION OF SHAPES, FORMING DOOR AND PANEL FRAMES SHALL BE SEAM-WELDED TO PRODUCE A ONE-PIECE WATERPROOF FRAME.

6. DOORS.

(a) EACH DOOR SHALL BE FORMED INTO A CHANNEL SECTION FROM ONE PIECE, WITH CORNERS SEAM-WELDED, AND SHALL BE REINFORCED WITH A CHANNEL BRACE 12 INCHES WIDE, BETWEEN THE LOUVRES, WELDED TO INSIDE OF DOOR.

(b) EACH DOOR SHALL BE PROVIDED WITH 2 THREE-LOUVRE VENTILATORS AND SLIDING REMOVABLE BRASS SCREENS (0.0135 INCH WIRE, 24 WIRES PER INCH) AS INDICATED ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER. LOUVRES SHALL BE PUNCHED 1 INCH HIGH AND 6 INCHES WIDE ON APPROXIMATELY 1⅜ INCH CENTERS.

(c) EACH DOOR SHALL BE SUPPORTED BY SUITABLE HEAVY BLANK HINGES, SECURELY WELDED TO DOOR AND FRAME AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER.

(d) EACH PAIR OF DOORS, OR SINGLE DOOR SHALL BE EQUIPPED WITH A SUBSTANTIAL THREE POINT LOCKING DEVICE, LOCKING AT TOP, BOTTOM AND CENTER OF DOOR. A STOP TO PREVENT LOCKING DEVICE BEING LOCKED BEFORE DOOR IS FULLY CLOSED SHALL BE WELDED TO FRAME DIRECTLY OVER TOP OF DOOR AND ON BASE UNDER BOTTOM OF DOOR.

(e) EACH DOOR SHALL BE EQUIPPED WITH A DEVICE FOR SECURING IT IN THE OPEN POSITION.

(f) HANDLE, OPERATING LOCKING DEVICE, SHALL BE SO MADE AND ASSOCIATED WITH AN ANGLE PLATE OR EQUIVALENT, WELDED TO THE DOOR, THAT A PADLOCK HAVING A ⅜ INCH BAIL MAY BE APPLIED.

(h) EACH DOOR SHALL BE SO CONSTRUCTED THAT WHEN IT IS CLOSED AGAINST A SUITABLE FABRICATED PACKING SECURELY MOUNTED TO DOOR FRAME, IT SHALL BE PRACTICALLY WATERPROOF.

7. PANELS:

(a) BACK OF CASE EXCEPT FRAME SHALL BE REMOVABLE AND SHALL CONSIST OF SUITABLE VERTICAL PANELS, EACH FORMED IN CHANNEL SECTION FROM ONE PIECE WITH CORNERS WELDED. EACH CASE SHALL HAVE THE SAME NUMBER OF PANELS AS DOORS.

(b) EACH REAR DOOR PANEL SHALL BE HELD IN ITS VERTICAL POSITION BY ONE SUPPORT WELDED TO THE CENTER OF THE LOWER INSIDE OF THE DOOR SO THE END OF SUPPORT WILL REST ON THE DOOR PACKING GROOVE. THE DOOR PANEL IS TO BE SECURED TO THE CASE WITH ⅜ INCH CAP SCREWS, LOCATED ONE ON EACH SIDE, APPROXIMATELY 10 INCHES FROM THE BOTTOM OF THE DOOR. THE TWO CAP SCREWS ARRANGED SO THAT THEY CANNOT BE REMOVED FROM DOOR.

8. SHELVES:

(a) SHELVES 14 INCHES WIDE (TOLERANCE ¼ INCH) SHALL BE FORMED WITH 1½ INCH FLANGE BENT DOWN IN FRONT AND BENT UP IN BACK AND WELDED IN PLACE. THE ENDS OF SHELVES SHALL BE WELDED TO END WALLS.

(b) BACK FLANGE SHALL BE PROVIDED WITH SUITABLE HOLES FOR ¼ INCH STOVE BOLTS PROPERLY SPACED FOR SUPPORTING THE TERMINAL WALL, AS SHOWN IN SKETCH "A" PLAN S-530 SHEET NO. 2. BASIC NUMBER.

(c) ALL SHELVES, EXCEPT BOTTOM OF CASE, SHALL BE PROVIDED WITH VENTILATION OPENINGS AS SHOWN ON PLAN S-530 SHEET NO. 2.

9. TERMINAL WALL:

(a) TERMINAL WALL SHALL CONSIST OF ½ INCH THICK HARD ASBESTOS BOARD OR EQUIVALENT (IF APPROVED BY THE ASSISTANT CHIEF ENGINEER-SIGNALS) THE FULL LENGTH AND HEIGHT OF CASE AS INDICATED ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER. THE SECTIONS OF ASBESTOS BOARD SHALL RUN HORIZONTALLY, JOINING THE SECTIONS AT BACK OF EACH SHELF, AND SHALL BE SECURELY BOLTED TO BACK OF SHELVES, ALSO TOP AND BOTTOM HORIZONTAL SHAPES, WITH ¼ INCH ROUND HEAD STOVE BOLTS IN ACCORDANCE WITH SKETCH "A" PLAN S-530 SHEET NO. 2, EXCEPT CASES 5303 & 5304 ARE PROVIDED WITH A VERTICAL UPRIGHT 3½ INCHES WIDE MOUNTED DIRECTLY AGAINST BACK OF SHELVES MIDWAY BETWEEN END WALLS. THE ASBESTOS BOARDS FOR THESE TWO CASES BUTT AGAINST THIS UPRIGHT.

10. FINISH:

(a) THE ENTIRE CASE SHALL BE THOROUGHLY CLEANED BEFORE PAINTING.

(b) ALL METAL PARTS, INSIDE AND OUTSIDE, SHALL BE GIVEN ONE COAT OF RED LEAD OR EQUAL, THEN TWO COATS OF A HIGH GRADE ALUMINUM PAINT INSIDE, AND TWO COATS OF A HIGH GRADE BLACK PAINT OUTSIDE. (UNLESS OTHERWISE APPROVED BY THE ASSISTANT CHIEF ENGINEER-SIGNALS)

(c) A FINAL COAT OF CLEAR VARNISH SHALL BE GIVEN TO THE INSIDE OF CASE OVER THE LAST COAT OF ALUMINUM PAINT.

(d) TERMINAL WALL SHALL NOT BE PAINTED.

11. SHIPMENT:

(a) ALL CASES SHALL BE SHIPPED INTACT MOUNTED ON TWO 2 INCH x 4 INCH WOOD SKIDS.

(b) TWO 1½ INCH x 2 INCH WOOD SKIDS SHALL EXTEND THE FULL LENGTH OF CASE AT TOP, ONE IN BACK AND ONE IN FRONT, AND SHALL BE SECURELY WIRED IN PLACE AS A PROTECTION TO THE TOP OF CASE.

SPECIFICATIONS

1. GENERAL:

(a) INSTRUMENT CASES UNDER THESE SPECIFICATIONS SHALL BE MADE IN FOUR SIZES. THE OVERALL LENGTH, WIDTH AND HEIGHT AND THE FOUNDATION BOLT HOLE SPACING SHALL BE AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER.

(b) INSIDE OF EACH CASE SHALL BE ARRANGED AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER SO THAT WITH THE ROOF FORMED IN ACCORDANCE WITH SECTION 4 OF THESE SPECIFICATIONS, TERMINAL WALL SHALL HAVE A CLEAR SPACE "T", FREE OF METAL BETWEEN SHELVES, AND EXTENDING THE ENTIRE LENGTH OF THE CASE.

(c) A CLEAR SPACE APPROXIMATELY 6½ INCHES WIDE EXTENDING THE FULL LENGTH OF CASE SHALL BE PROVIDED BETWEEN THE TERMINAL WALL AND REAR PANELS.

(d) EACH CASE SHALL BE PROVIDED WITH SHELVES AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER, THE FULL INSIDE LENGTH OF CASE AND EXTENDING BACK TO THE TERMINAL WALL.

(e) ALL SHEET METAL PARTS SHALL BE MADE OF COPPER BEARING STEEL, PATENT LEVELED. ROOF AND WEATHER EXPOSED WALLS SHALL BE MADE OF #14 U.S. STD. GAGE. SHELVES, TERMINAL WALL SUPPORTS ETC. SHALL BE MADE OF #16 U.S. STD. GAGE. MATERIAL FOR BASE SHALL BE AS SPECIFIED UNDER SECTION 2 OF THIS SPECIFICATION.

(f) THE DESIGN AND CONSTRUCTION OF CASE WHICH MANUFACTURER PROPOSES TO FURNISH SHALL MEET THE APPROVAL OF THE ASSISTANT CHIEF ENGINEER – T. C. & S.

2. BASE:

(a) THE BASE SHALL BE FORMED TO SPECIAL CHANNEL CROSS SECTION BY BENDING AS INDICATED BY SECTION "B" SHOWN ON SHEET 1 OF THIS PLAN.

(b) THE REQUIRED END PLATES AND CROSS RIBS ARE TO BE ASSEMBLED WITH THE LONGEST RECTANGULAR SECTION IN A VERTICAL POSITION WITH RESPECT TO THE FOUNDATION AND SUITABLY WELDED IN PLACE TO PROVIDE THE NECESSARY STRENGTH AND RIGIDITY.

(c) EACH BASE SHALL BE PROVIDED WITH CABLE ENTRANCE OPENINGS COVERED WITH PLATE 5308, THE NUMBER OF OPENINGS FOR EACH CASE SHALL BE AS SHOWN ON PLAN S-530 SHEET NO. 2 BASIC NUMBER.

3. UPRIGHTS AND WALLS.

(a) THE END WALLS SHALL EACH BE OF ONE PIECE, OF CHANNEL-SECTION, OF A SIZE SUFFICIENT TO FORM END OF CASE AND SIDE OF FRAME FOR DOORS AND BACK PANELS. THEY SHALL BE MOUNTED AGAINST OUTSIDE OF BASE SUBSTANTIALLY ATTACHED BY WELDING.

(b) UPRIGHT SUPPORTS OF FORMED CHANNEL-SECTION ARE TO BE ASSEMBLED IN FRONT AND REAR OF CASES 5303 AND 5304 AT CENTER TO FORM A PART OF DOOR AND PANEL FRAMES, AND TO PROVIDE THE NECESSARY RIGIDITY OF CASE. UPRIGHT SUPPORTS SHALL BE SECURELY WELDED TO ROOF AND BASE.

(c) EACH END WALL SHALL BE PROVIDED WITH A CABLE OPENING APPROX. 13 SQ. INCHES AREA. A COVER PLATE 5306 SHALL BE ASSEMBLED WITH SUITABLE SEALING COMPOUND BETWEEN THE PLATE AND WALL, AND HELD IN PLACE BY FOUR ⅜" X 1" HEX. HEAD CAD. PLATED TAP BOLTS ASSEMBLED WITH THE NUT INSIDE THE CASE.

4. ROOF:

(a) ROOF, WATERSHED OVER DOORS, AND REAR PANELS SHALL BE FORMED FROM ONE PIECE OF SHEET METAL WITH A ROOF SLOPE DOWNWARD TO THE REAR, OF 1½ INCHES TO THE FOOT.

(b) ENDS AND FRONT SHALL BE STRUCK DOWN VERTICALLY AND SECURELY WELDED TO WALL WITH FILLET WELDS 1½" LONG, ON 10¾" CENTERS.

(c) BACK OF ROOF SHALL BE STRUCK DOWN AT AN ANGLE, AS INDICATED ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER TO A POINT 1¼ INCHES FROM CASE TO PRODUCE A SUBSTANTIAL WATERSHED.

(d) FRONT OF ROOF SHALL BE FORMED DIRECTLY OVER DOORS WITH A SLOPE OF 45 DEGREES AS SHOWN AND EXTEND TO A POINT NOT LESS THAN 1 INCH FROM CASE, TO PRODUCE A SUBSTANTIAL WATERSHED.

(e) CORNERS OF ROOF SHALL BE WELDED TO PRODUCE A WATERPROOF SEAM.

5. DOOR AND PANEL FRAMES:

(a) SUITABLY FORMED HORIZONTAL ANGULAR SHAPES, FORMING DOOR AND PANEL FRAME, SHALL BE SECURELY WELDED TO BASE, ROOF AND UPRIGHTS, FRONT AND BACK.

(b) ALL JOINTS AT THE JUNCTION OF SHAPES, FORMING DOOR AND PANEL FRAMES SHALL BE SEAM-WELDED TO PRODUCE A ONE-PIECE WATERPROOF JOINT.

6. DOORS:

(a) EACH DOOR SHALL BE FORMED TO A CHANNEL SECTION FROM ONE PIECE WITH CORNERS WELDED. SATISFACTORY RIGIDITY OF THE DOOR SHALL BE PROVIDED WITH A SUITABLE DESIGN OF X-BRACE WELDED TO THE CHANNEL-FORMED SECTION.

(b) EACH DOOR SHALL BE PROVIDED WITH 2 THREE-LOUVRE VENTILATORS AND SLIDING REMOVABLE BRASS SCREENS (0.0135 INCH WIRE, 24 WIRES PER INCH) AS INDICATED ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER. LOUVRES SHALL BE PUNCHED 1 INCH HIGH AND 6 INCHES WIDE ON APPROXIMATELY 1⅜ INCH CENTERS.

(c) EACH DOOR SHALL BE SUPPORTED BY SUITABLE HEAVY BLANK HINGES, SECURELY WELDED TO DOOR AND FRAME AS SHOWN ON DRAWING S-530 SHEET NO. 1 BASIC NUMBER.

(d) EACH PAIR OF DOORS FOR CASES 5302 AND 5304 AND EACH DOOR FOR CASE 5303 SHALL BE PROVIDED WITH A SUBSTANTIAL THREE POINT LOCKING DEVICE, LOCKING AT TOP, BOTTOM AND CENTER OF DOOR. DOOR FOR CASE 5301 SHALL BE PROVIDED WITH A SUBSTANTIAL TWO POINT LOCKING DEVICE.

(e) EACH DOOR SHALL BE EQUIPPED WITH A DEVICE FOR SECURING IT IN THE OPEN POSITION. DEVICE SHALL BE APPROVED BY THE ASST. CHF. ENGR. T.C.&S.

(f) HANDLE, OPERATING LOCKING DEVICE, SHALL BE SO MADE AND ASSOCIATED WITH AN ANGLE PLATE OR EQUIVALENT, WELDED TO THE DOOR, THAT A PADLOCK HAVING A ⅜ INCH BAIL MAY BE APPLIED.

(h) EACH DOOR SHALL BE SO CONSTRUCTED THAT WHEN IT IS CLOSED AGAINST A SUITABLE FABRICATED PACKING SECURELY MOUNTED TO DOOR FRAME, IT SHALL BE PRACTICALLY WATERPROOF.

7. PANELS:

(a) BACK OF CASE SHALL BE PROVIDED WITH REMOVABLE PANELS, EACH FORMED TO CHANNEL-SECTION FROM ONE PIECE WITH CORNERS WELDED. EACH CASE SHALL HAVE THE SAME NUMBER OF PANELS AS DOORS.

(b) EACH REAR PANEL SHALL BE POSITIONED VERTICALLY BY ONE SUPPORT WELDED TO THE LOWER INSIDE OF THE PANEL AT THE CENTER TO LOCATE THE PANEL VERTICALLY FOR ALIGNMENT OF ATTACHMENT SCREWS. EACH PANEL SHALL BE SECURED TO THE CASE WITH FOUR ⅜" CAP SCREWS, ONE LOCATED ON EACH SIDE APPROX. 10" FROM THE TOP, AND ONE ON EACH SIDE APPROX. 10" FROM THE BOTTOM OF THE PANEL. CAP SCREWS ARE TO HAVE NUTS ASSEMBLED INSIDE THE PANEL, SECURED AGAINST LOOSENING SO THE CAP SCREWS WILL BE RETAINED AS A PART OF THE PANEL ASSEMBLY.

8. SHELVES:

(a) SHELVES 14" WIDE ± ¼" SHALL BE FORMED TO HAVE 1½" TURN-DOWN IN FRONT AND 1½" TURN-UP IN BACK, AND ARE TO BE SECURELY WELDED TO END WALLS AND UPRIGHTS.

(b) BACK TURN-UP SHALL BE PROVIDED WITH SUITABLE HOLES FOR ¼" STOVE BOLTS PROPERLY SPACED FOR SUPPORTING THE TERMINAL WALL, AS SHOWN IN SKETCH "A" ON THIS PLAN.

(c) ALL SHELVES, EXCEPT BOTTOM OF CASE, SHALL BE PROVIDED WITH VENTILATION OPENINGS AS SHOWN ON THIS PLAN.

9. TERMINAL WALL:

(a) TERMINAL WALL SHALL CONSIST OF ½" THICK TRANSITE ASBESTOS BOARD OR EQUIVALENT (IF APPROVED BY ASST. CHIEF ENGR. – T.C.&S.) THE FULL LENGTH AND HEIGHT OF CASE AS INDICATED ON SHEET NO. 1 OF THIS PLAN. THE SECTIONS OF ASBESTOS BOARD SHALL RUN HORIZONTALLY, JOINING THE SECTIONS AT BACK OF EACH SHELF, AND SHALL BE SECURELY BOLTED TO BACK OF SHELVES, ALSO TOP AND BOTTOM HORIZONTAL SHAPES, WITH ¼" ROUND HEAD STOVE BOLTS IN ACCORDANCE WITH SKETCH "A" SHOWN ON THIS PLAN, EXCEPT, CASES 5303 & 5304 ARE PROVIDED WITH A VERTICAL UPRIGHT 3½" WIDE MOUNTED DIRECTLY AGAINST BACK OF SHELVES MIDWAY BETWEEN END WALLS. THE ASBESTOS BOARDS FOR THESE TWO CASES BUTT AGAINST THIS UPRIGHT.

10. PAINTING:

(a) THE ENTIRE CASE SHALL BE THOROUGHLY CLEANED BEFORE PAINTING.

(b) ALL METAL PARTS SHALL BE PRIMED WITH ONE COAT OF RED LEAD OR EQUAL BEFORE ASSEMBLING. AFTER ASSEMBLY, ALL WELDED AND BURNED AREAS SHALL BE THOROUGHLY CLEANED OF SCALE, AND GIVEN ONE COAT OF RUST-INHIBITOR SUCH AS "PARCOLITE B" AND THE WELDED AND BURNED AREAS REPRIMED; THEN APPLY TWO COATS OF A HIGH-GRADE ALUMINUN PAINT INSIDE AND TWO COATS OF A HIGH-GRADE BLACK PAINT OUTSIDE (UNLESS OTHERWISE APPROVED BY THE ASST. CHIEF ENGR. T.C.&S.

(c) A FINAL COAT OF CLEAR VARNISH SHALL BE GIVEN TO THE INSIDE OF CASE OVER THE LAST COAT OF ALUMINUM PAINT.

(d) TERMINAL WALL SHALL NOT BE PAINTED.

11. SHIPMENT:

(a) ALL CASES SHALL BE SHIPPED MOUNTED ON TWO 2" x 4" WOOD SKIDS.

(b) TWO 1½" x 2" WOOD SKIDS SHALL EXTEND THE FULL LENGTH OF CASE AT TOP, ONE IN BACK AND ONE IN FRONT, AND SHALL BE SECURELY WIRED IN PLACED AS A PROTECTION TO THE TOP OF CASE.

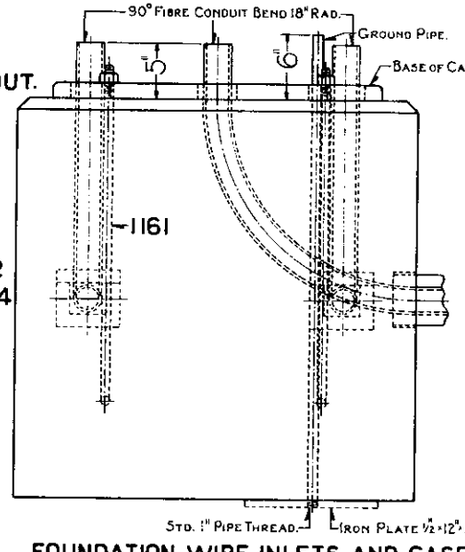
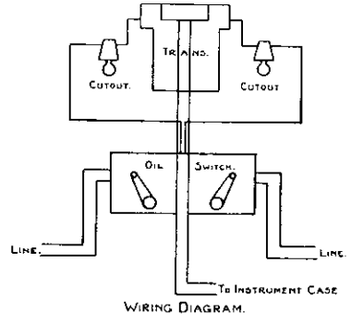
SECTIONALIZING CASE.



FOUNDATION, WIRE INLETS AND CASE DRILLING



Wiring Diagram.

NOTES.

Where possible, a one (1) inch galvanized iron pipe shall be driven, not less than five (5) feet below bottom of foundation, extending six (6) inches above top of foundation through opening provided in bottom of case. It shall be connected to case by a number 6 A. W. G. copper wire, secured to top of pipe and side of case by bolts 5377. Where conditions will not permit driving pipe below bottom of foundation, an iron plate shall be fastened to lower end of pipe as shown.

Foremen should use their best judgment as to proper depth of foundation, to be governed by the nature of the ground, and in no case should it be less than three (3) feet.

Wire inlets may be located to suit local conditions.

Case shall be so placed that the door opens away from the main track.

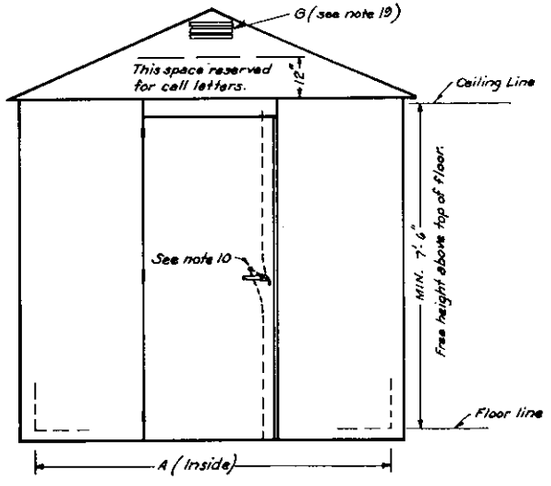
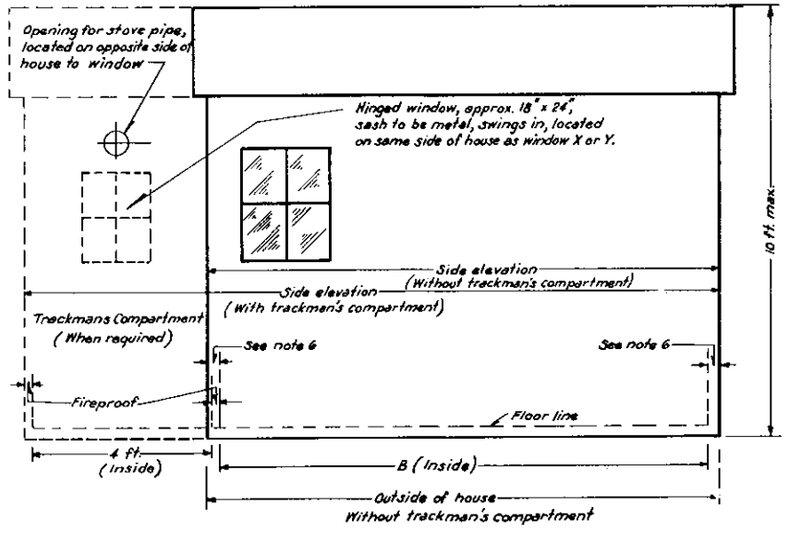
Note:-
Provide intermediate piers M when B = 11' or 14'.
Provide intermediate piers N when B = 19'.





GENERAL SPECIFICATIONS.

1. DESIGN AND CONSTRUCTION SHALL BE STRONG ENOUGH TO WITHSTAND ANY DETRIMENTAL REACTION FROM HIGH WIND AND STORM.
2. ALL SHEET METAL PARTS SHALL BE CONSTRUCTED OF COPPER BEARING STEEL, OR EQUAL IN RUST RESISTING PROPERTIES.
3. THE HOUSE SHALL BE CONSTRUCTED EITHER IN SECTIONS FOR DISASSEMBLING AT THE FACTORY AND REASSEMBLING IN THE FIELD, OR CONSTRUCTED AS A UNIT IN ACCORDANCE WITH ORDERING INFORMATION CONTAINED IN THE REQUISITION. REQUISITION SHALL CLEARLY INDICATE WHETHER OR NOT A SECTIONAL HOUSE IS DESIRED.
4. ALL METAL PARTS SHALL BE PRIMED WITH ONE COAT OF RED OXIDE OR EQUAL BEFORE ASSEMBLING. TO PERMIT ADHESION OF BOTH PRIMING AND FINISHING COATS OF PAINT, ALL WELDED AND BURNED AREAS SHALL BE PROPERLY TREATED. THE WSIDE SHALL THEN BE GIVEN TWO COATS OF HIGH GRADE ALUMINUM PAINT, AND THE OUTSIDE TWO COATS OF A FIRST GRADE PAINT - COLOR PENNSYLVANIA RAILROAD STANDARD LIGHT, ROOF BLACK, AND TRIM (WHERE PROVIDED) PENNSYLVANIA RAILROAD STANDARD DARK (BUILDING PAINT).
5. ALL JOININGS OF SECTIONS SHALL BE CLOSE FITTING, RIGID AND SECURE, SO THAT THE ENTIRE HOUSE WILL BE WEATHERPROOF.
6. ALL WALLS, ROOF AND DOORS, EXCEPT TRACKMAN'S COMPARTMENT (IF REQUIRED), SHALL BE PROVIDED WITH INSULATION AGAINST TRANSFER OF HEAT EQUIVALENT TO 12 INCHES OF BRICK.
7. DOOR FRAME SHALL PROVIDE NOT LESS THAN 30 INCHES CLEAR ENTRANCE SPACE.
8. THICKNESS OF SHEET METAL SHALL BE NOT LESS THAN # 22 GAGE FOR PANELS, # 18 GAGE FOR ROOF, AND # 12 GAGE FOR DOOR FRAME.
9. HOUSES SHALL BE PROVIDED WITH LOUVRES OR EQUIVALENT FOR PROPER VENTILATION.
10. DOOR SHALL BE PROVIDED WITH A SUBSTANTIAL THREE POINT LOCKING DEVICE, LOCKING DOOR AT TOP, BOTTOM AND CENTER. THE HANDLE AT THE CENTER, OPERATING THE DEVICE, TO BE SO ARRANGED AS TO PERMIT IT TO BE LOCKED WITH A SIGNAL DEPARTMENT PADLOCK.
11. PANELS IN BOTH SIDES, AND END OPPOSITE ENTRANCE DOOR, SHALL BE MADE REMOVABLE, FROM THE OUTSIDE.
12. BASE FRAME (WITH OR WITHOUT FLOOR) SHALL BE CONSTRUCTED WITH SUFFICIENT STRENGTH TO SUPPORT THE ENTIRE HOUSE. HOUSES FURNISHED WITHOUT FLOOR SHALL BE PROVIDED WITH BASE ANGLE TO PERMIT SECURING TO FLOOR (FLOOR WILL BE CONSTRUCTED IN THE FIELD). HOUSES FURNISHED WITH FLOOR (SEE NOTE 13) AND TO BE SUPPORTED AS INDICATED IN DIAGRAM F. HOLES NOT LESS THAN 1 INCH DIA. SHALL BE PROVIDED IN BASE FRAME FOR SECURING BASE FRAME TO FOUNDATION.
13. FLOORS, WHEN PROVIDED AS A PART OF THE HOUSES, SHALL BE CONSTRUCTED TO WITHSTAND A LOADING OF 125 POUNDS PER SQUARE FOOT.
14. OPENINGS IN HOUSES FOR CABLES AND WIRES (WITH OR WITHOUT FLOOR) IF REQUIRED, SHALL BE SPECIFIED ON REQUISITION.
15. THE ENTIRE HOUSE SHALL BE ERECTED AT THE FACTORY FOR INSPECTION BY PENNSYLVANIA RAILROAD REPRESENTATIVES.
16. CONCRETE WALLS OR PIERS, AND FLOOR (WHEN NOT PROVIDED WITH HOUSE), SHALL BE CONSTRUCTED BY THE PENNSYLVANIA RAILROAD FORCES.
17. MANUFACTURER SHALL SUBMIT DRAWINGS, INDICATING THEIR PROPOSAL, TO THE CHIEF ENGINEER, PENNSYLVANIA RAILROAD FOR APPROVAL.
18. WHEN WINDOW IS DESIRED, REQUISITION SHALL SPECIFY WHETHER IT IS TO BE LOCATED AT X OR Y.
19. REQUISITION SHALL SPECIFY IF TRACKMAN'S COMPARTMENT IS DESIRED. WHEN FURNISHED A LOUVRE FOR VENTILATION SHALL BE PROVIDED IN GABLE OVER DOOR AS INDICATED AT G.

SPECIFICATIONS:-

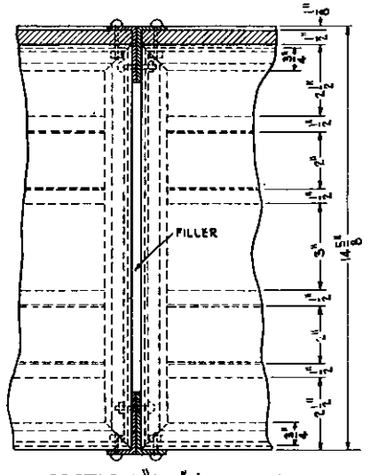
INSTRUMENT RACKS SHALL BE BUILT IN SECTIONS OF 3 OR 4 FT. UNLESS OTHERWISE SPECIFIED.

PROVISION SHALL BE MADE AT ENDS OF SECTION FOR SECURELY BOLTING TO ADJOINING SECTIONS. WHERE SECTIONS ARE BOLTED TOGETHER FILLER SHALL BE PROVIDED FOR ANY OPENING AT JUNCTION OF SHELVES TO PREVENT SMALL OBJECTS FALLING THROUGH.

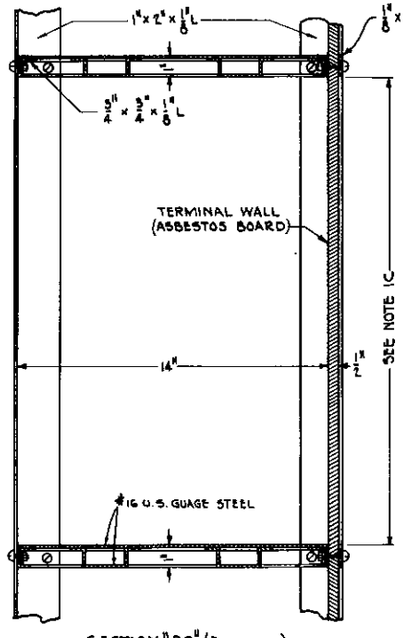
THE ENTIRE BACK SHALL CONSIST OF ONE-HALF INCH HARD ASBESTOS BOARD SECURED DIRECTLY AGAINST SHELVES. SPLICES IN ASBESTOS SHALL BE MADE IN BACK OF SHELVES.

ALL METAL SURFACES SHALL BE GIVEN ONE COAT OF RED OXIDE AND TWO COATS OF OLIVE GREEN PAINT. ASBESTOS SHALL NOT BE PAINTED.

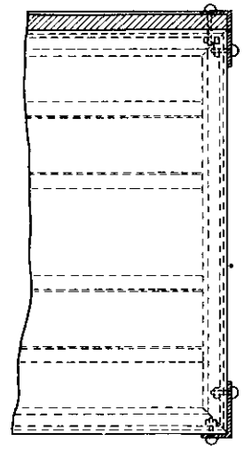
WORKMANSHIP SHALL BE OF THE BEST, ALL SHELVES, ETC BEING PROPERLY IN ALIGNMENT AND RIGIDLY FIXED IN PLACE.



SECTION "AA" (ENLARGED)



SECTION "BB" (ENLARGED)



SECTION "CC" (ENLARGED)

NOTE:-

1.- REQUISITIONS FOR INSTRUMENT RACKS SHALL STATE:-
(A) THE NUMBER AND LENGTH OF SECTIONS.
(B) THE NUMBER OF SHELVES IN EACH. (TOP NOT CONSIDERED A SHELF)
(C) THE DISTANCE BETWEEN SHELVES. (18" OR 21")
(D) WHETHER OR NOT THE RACKS ARE TO BE ERECTED ON THE GROUND BY THE MANUFACTURER OR SHIPPED KNOCKED DOWN TO BE ASSEMBLED BY P.R.R. FORCES. WHERE ERECTED BY MANUFACTURER STARTING AND COMPLETION DATES SHALL BE GIVEN.

2. WHERE CONDITIONS ARE SUCH THAT STANDARD LENGTH SECTIONS CANNOT CONVENIENTLY BE USED A SKETCH SHALL BE ATTACHED TO EACH COPY OF REQUISITION SHOWING THE DESIRED ARRANGEMENT.
